Flamingo Copper Project-Expansion of Mining Leases

Queensland Mining Corporation's (ASX: QMN) Flamingo Copper Project consists of two mining leases (ML90103 and ML90104) as well as EPMs centred approximately 110 km north-northwest of Cloncurry in NW Queensland. Extensive drilling has been undertaken on these leases and significant resources have been defined.

DME has approved and issued mining lease application numbers to QMC, covering approximately 300Ha which incorporates QMC's two MLs within these MLAs. The MLs are dissected by the Burke Development Road. Refer to Figure 1.

QMC is currently drilling on their two mining leases. The current RC drilling program of 4,500m is in progress with samples being forwarded to laboratories for assaying progressively.

QMC announced an inferred resource of 117,000 t @ 6% Cu and 1.8g/t Au, from previous drilling on the Eastern ML90103 and is continuing drilling on this lease. Refer to ASX announcement 25th Mar 10.

Currently, QMC is drilling on the western lease ML90104 following previous drilling where MIM encountered copper mineralisation in drill hole DY022R which intersected mineralization between 150-168 metres at an average grade of 1.26% Cu and 0.34g/t Au, including 4m @ 3.4% Cu, 0.65g/t Au and a further 4m intersected 1.6% Cu and 0.72g/t Au.

QMC is confident that the resource will be increased from the current drilling program on both MLs and the first drill results will be released in early May.

Yours Sincerely

Howard V. Renshaw
Managing Director

The information in this report that relates to Exploration Results is based on information compiled by Guojian Xu, a Member of Australasian Institute of Mining and Metallurgy and a Fellow of the Society of Economic Geologists. Dr Guojian Xu is a consultant to Queensland Mining Corporation Limited through Redrock Exploration Services Pty Ltd. Dr Xu has sufficient experience deemed relevant to the style of mineralization and type of deposit under consideration and to the activity, which he is undertaking to qualify as a Competent Person as defined in the 2004 Edition of the Australasian Code for Reporting Results, Mineral Resources and Ore Reserves. Dr Xu consents to the inclusion in the report of the matters based on his information in the form and context in which it appears.
