## COMMENCEMENT OF DRILLING AT THE KADOMA GOLD PROJECT

Cape Range Limited (CAG) is pleased to announce that it has commenced drilling at the Kadoma Gold Project in Zimbabwe.

As recently announced, the Company is extremely encouraged by the gold values received to date by previous explorers within the project area.

The Company has commissioned a well experienced international drilling crew from Ox Drilling. Ox Drilling is providing CAG with a Super-rock 5000 RC rig and the necessary equipment to run the drill program. This round of Reverse Circulation drilling should provide quick sample returns for the assay laboratories.

As part of its due diligence, the Company currently has a team of geological and technical staff carrying out geological mapping and generating drill holes over the three key gold prospects identified as priority drill target areas.

As recently announced, due to the Company's expansion and renewed focus, changes to the Board have taken place to reflect the extra corporate requirements for its growth.

Shareholders will be updated as the drill program progresses.
