

## Press Release

### Commencement of drilling at Central Murchison Gold Project

24 February 2010

Aragon Resources Limited (ASX: AAG) (“Aragon”) is pleased to advise that drilling has commenced at the Central Murchison Gold Project (“CMGP”).

The initial drilling programme consists of approximately 5,000 metres of reverse circulation and 7,500 metres of diamond drilling and will be targeting:

- resource extensions and at the Murchison Bell and Day Dawn mining centres;
- new discoveries based on a recent sub-audio magnetic survey around the Cuddingwarra mining centre; and
- testing the down plunge extensions of current resources at multiple locations.

Aragon anticipates that some initial results from this drilling programme will be available during the following quarter. This programme is an exciting first step towards the aim of developing mining operations at the prolific gold district of the CMGP.
