### 18<sup>th</sup> January 2010 Earning's Guidance

AFT Corporation Pty Ltd's Artemis Building products division continues to grow its business as a national distributor of Suntech Power, a world-class photovoltaic products manufacture listed in United States.

Due to increased sales demand including the recent installtion at Sydney Town Hall, revenues for the full year to 31<sup>st</sup> December 2009 are expected to be approximately \$7,200,000 which is up from the estimate at half year of \$5,000,000 to \$5,500,000.

The estimated net loss before tax and interest for the year ended 31 december 2009 is expected to be approximately (\$50,000) which is significantly lower than the half year estimate which was (\$300,000).

The sales revenue and net profit before interest and tax is subject to final confirmation by the company's auditors.

The anticipated result is based on a trend of increasing monthly revenues, an improving sales pipeline and through instigating a number of cost control measures including reductions of management salaries.
