## **Announcement to the Australian Securities Exchange Limited**

### **MIKOH Teams With Accenture for US Navy AIT Project**

#### **Key Points:**

- **MIKOH joins Accenture's team bidding for the US Navy Automatic Identification Technology (AIT) Project**
- **AIT to become the cornerstone of DoD plan to improve asset visibility**

Global securities solutions provider MIKOH Corporation Limited (ASX: MIK) today announced it has entered into a Teaming Agreement with global consulting and technology services firm Accenture. Under the agreement, MIKOH joins Accenture's team in bidding for the upcoming US Navy and Marine Corps Automatic Identification Technology (AIT) project.

The aim of the AIT project is to improve asset visibility within the US Navy's logistics pipeline. Accenture's proposed solution will be differentiated through the inclusion of MIKOH's Smart&Secure and TransitVault technologies, providing tamper evident security in addition to asset tracking and identification.

The AIT contract, which is due to be awarded during second quarter of 2011, is expected to have a budget ceiling of US\$75M over 5 years, with several incumbents.

According to the Navy Supply Corps Newsletter\*, "With a \$70 billion inventory, \$6 billion of which is in-transit at any given moment, Automatic Identification Technology (AIT) is quickly becoming the cornerstone of the Department of Defense's (DoD) plan to improve asset visibility within the logistics pipeline. ... There are more than 1,000 Navy and Marine Corps logistics operations, ashore and afloat, that are viable candidates for AIT implementation."

\*Navy Supply Corps Newsletter (September/October 2009):

#### **About MIKOH:**

MIKOH Corporation is a high tech global security solutions provider, specialising in tamper-evident techniques for security seals, smart RFID tags, and encrypted data on networks.

MIKOH develops technologies and designs and implements security solutions that identify, seal, authenticate, monitor, track, protect and control all types of sensitive assets, both physical and data/communications.

These tailored end-to-end security systems employ custom digitally-marked tamper-evident seals, patented tamper-proof RFID labels and tags, licensed NSA (National Security Agency) closure devices for containers, and patented biometric authentication for secure online identification of people and data on encrypted networks and the Internet.

MIKOH also prints custom 'diplomatic' seals and digital markings for governments, embassies and diplomats worldwide.

MIKOH focuses on security solutions for Electronic Vehicle Registration (EVR) & Automatic Vehicle Identification (AVI); secure asset management and tracking (objects, containers and vehicles); tamper detection (seals, labels and laser sub-surface digital markings); and for secure network transmissions, thereby enhancing both corporate and national security. MIKOH is currently deploying an EVR/AVI system across Thailand.

MIKOH Corporation Ltd has its Headquarters in Sydney, Australia, with offices in Canberra and Singapore. MIKOH Corporation (US) has its Headquarters in McLean VA.
