#### **About MIKOH:**

MIKOH Corporation is a high tech global security solutions provider, specialising in tamper-evident techniques for security seals, smart RFID tags, and encrypted data on networks.

MIKOH develops technologies and designs and implements security solutions that identify, seal, authenticate, monitor, track, protect and control all types of sensitive assets, both physical and data/communications.

These tailored end-to-end security systems employ custom digitally-marked tamper-evident seals, patented tamper-proof RFID labels and tags, licensed NSA (National Security Agency) closure devices for containers, and patented biometric authentication for secure online identification of people and data on encrypted networks and the Internet.

MIKOH also prints custom 'diplomatic' seals and digital markings for governments, embassies and diplomats worldwide.

MIKOH focuses on security solutions for Electronic Vehicle Registration (EVR) & Automatic Vehicle Identification (AVI); secure asset management and tracking (objects, containers and vehicles); tamper detection (seals, labels and laser sub-surface digital markings); and for secure network transmissions, thereby enhancing both corporate and national security. MIKOH is currently deploying an EVR/AVI system across Thailand.

MIKOH Corporation Ltd has its Headquarters in Sydney, Australia, with offices in Canberra and Singapore. MIKOH Corporation (US) has its Headquarters in McLean VA.
