Market Update

Wills Groups Inc. signs agreement with Urgent Technology to provide API eMaintenance

Techniche Limited is pleased to announce that Urgent Technology, a wholly owned subsidiary, has been awarded a contract with the Wills Group to provide Facility Management and Maintenance Solutions to its over 200 convenience store locations.

Whilst the signing of the contract itself is not expected to materially improve profitability in the current financial year, this is an important order for Techniche and Urgent, as management is focussed on broadening our customer base and revenues in the USA.

Urgent's web based facilities enterprise software will be utilized by The Wills Group to manage all their maintenance requests, including scheduling of routine planned maintenance activities, contractor management, compliance testing tasks and asset management. Urgent's solution will provide The Wills Group complete transparency and real time management of the entire contractor lifecycle from safety and certification to performance management and invoicing.

Ron Thompson, the Project Manager with The Wills Group commented, "After reviewing several products, it was clear to us that API eMaintenance provided the essential features we needed to efficiently streamline our maintenance practices. We were drawn to the web-based portal and its ability to provide real-time data to our stakeholders. From invoicing and incident reporting to preventative maintenance and asset management, this system provides the flexibility we need, as well as adaptability for future growth. With a strong customer service back drop, it's the perfect tool to manage our maintenance needs."

About The Wills Group

The Wills Group, Inc., through its subsidiaries, operates and distributes petroleum products in the Mid-Atlantic are to retail gas stations and convenience stores in Maryland, Delaware, and Virginia. They also provide heating oil, propane, and HVAC equipment in the Mid-Atlantic Market. In addition, its convenience stores provide food products and fuel, as well as breakfast, lunch, and dinner options. Further, the company provides franchise opportunities. The Wills Group, Inc. was founded in 1926 and is based in La Plata, Maryland, USA.

About Api eMaintenance

Urgent Technology has collaborated with the **American Petroleum Institute** to deliver eMaintenance solutions. API is the oil and natural gas industry's main trade association in the USA. API endorses the eMaintenance system as the leading maintenance and asset management software.
