

## QUARTERLY ACTIVITIES REPORT Q3 JANUARY – MARCH 2013

### HIGHLIGHTS

- CGU set to become a cash generating unit in Peru
- New projects identified to provide additional higher-grade feed to the plant

### SUMMARY

Commissioners Gold Limited (ASX:CGU) is on the threshold of becoming a Cash Generating Unit, with production from the Mollehuaca Gold Plant expected to commence in the coming weeks.

The Board of Commissioners Gold Limited is confident that the current focus on Peru is well justified and expects that the Company's transition from an explorer to a modest producer will enable CGU to perform well even under current market conditions.

Shareholders can expect a steady stream of positive news coming out of the Company over the next quarter starting with plant commissioning, gold doré production and the development of plant-satellite mining projects.

### ASX AND MEDIA RELEASE

COMMISSIONERS GOLD LIMITED (ASX:CGU)

# Mollehuaca CIL Plant

## Commissioners Gold 25%

The Mollehuaca Gold Plant in southern Peru remains on track to commence gold production in the coming weeks.

The first phase of commissioning is designed to test the functionality of the CIL circuits by trial production of re-pulped tailings from Santa Rosa. The refurbished crushing circuit and remaining CIL capacity will be tested during phase 2 by the processing of local hard rock ore secured for this purpose.

Production is scheduled to commence in May 2013, after the completion of key components at the plant. Some delays have been incurred from the originally-expected March 2013 plant commissioning start date, largely due to a shortage of skilled workers, a backlog at the ball mill foundry and the short-term availability of some components.

A pre-commissioning audit is currently underway by an experienced third party metallurgical engineer. Engineer Barzola has direct experience with the Santa Rosa Tailings, and is presently working on the technical aspects of the re-pulping of the tailings and processing the material through the leach tanks.

Additional testing of the gold grades within the Santa Rosa Tailings was recently undertaken using cyanide leach methods. Out of 58 samples, seven returned values above the detection limit of 10 g/t Au – these samples are currently being retested to higher detection limits. A full set of results will be reported in detail at a later date once these overlimits have been re-assayed.

# Peru Project JV

## Commissioners Gold 50%

The Project Acquisition Joint Venture (JV) between CGU and Lima-based Australia Gold Corporation Limited has been operating since the beginning of July 2012, and is aimed at acquiring promising gold, copper, silver and other base metal projects in Peru. The JV has assessed numerous projects across Peru in the past nine months, and has completed advanced geological, legal and commercial due diligence on 15 quality projects. Each project meets the preliminary selection criteria of resource prospectivity, near-term production potential, scalability and modest entry cost.

Projects identified under the JV have been split into two separate project lines: those within proximity and treatment capacity of the Mollehuaca Plant and those more regional, larger opportunities.

## Satellite Mining

Projects within transport proximity to the Mollehuaca Plant are being targeted as a priority to provide additional and higher-grade feed for the central plant under a satellite mining strategy. A new vehicle company, of which CGU is a shareholder, is currently being incorporated to develop these assets. Initial focus of this vehicle will be on the **Saulito** gold-copper deposit, where a system of high-grade hydrothermal veins containing visible gold has been identified and is currently in small-scale production. Surface and underground mapping have been completed at Saulito, but assays remain incomplete at this stage.

**Other Opportunities**

Although the Company's immediate focus is on developing near-plant mining assets, other opportunities identified by the JV across Peru will not be ignored. These other new opportunities will be progressed to form a project pipeline of larger projects that may be proved up through exploration and development, either within the JV or with other resource companies.

# Cowarra Renewal

## **Commissioners Gold 50%; and may earn 85%**

CGU and project partner Capital Mining Limited (ASX:CMY) have submitted formal documents to renew EL 5939 “Cowarra” for an additional two years over the entire licence area. The Company has also officially registered its 50% interest in EL 5939 with the NSW Mines Department following the completion of CGU’s \$500,000 spend under phase 1 of the Cowarra JV with Capital Mining. CGU is currently sole-funding exploration and may earn an 85% JV interest by spending an additional \$350,000.

## Mining Exploration Entity Quarterly Report

### Compliance Statement

1. This statement has been prepared under accounting policies that comply with accounting standards as defined in the Corporations Act (except to the extent that information is not required because of note 2) or other standards acceptable to ASX (see note 4).
2. This statement gives a true and fair view of the matters disclosed.

Chris Battye – Executive Chairman

30 April 2013

Date

### Notes

1. The quarterly report provides a basis for informing the market how the entity's activities have been financed for the past quarter and the effect on its cash position. An entity wanting to disclose additional information is encouraged to do so, in a note or notes attached to this report.
2. The "Nature of interest" (items 6.1 and 6.2) includes options in respect of interests in mining tenements acquired, exercised or lapsed during the reporting period. If the entity is involved in a JV agreement, and there are conditions precedent that will change its percentage interest in a mining tenement, it should disclose the change of percentage interest and conditions precedent in the list required for items 6.1 and 6.2.
3. **Issued and quoted securities** - The issue price and amount paid up is not required in items 7.1 and 7.3 for fully paid securities.
4. The definitions in, and provisions of, *AASB 1022: Accounting for Extractive Industries* and *AASB 1026: Statement of Cash Flows* apply to this report.
5. **Accounting Standards** - ASX will accept, for example, the use of International Accounting Standards for foreign entities. If the standards used do not address a topic, the Australian standard on that topic (if any) must be complied with.

### Competent Person's Statement

The information in this report that relates to 'Exploration Results, Mineral Resources of Ore Reserves' is based on information compiled by Jason Needham BSc (Hons), who is a member of the Australian Institute of Geoscientists.

Mr Needham is an employee of Commissioners Gold Limited. He has sufficient experience deemed relevant to the style of mineralisation and type of deposit under consideration, and to the activity that he is undertaking to qualify as a Competent Person as defined in the 2004 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Mr Needham consents to the inclusion in this report of the matters based on his information in the form and context in which it appears.
