

ASX Announcement CPT Global Limited (CGO)

Market Update

CPT's first half financial performance has been negatively impacted by delays in signing a number of new contracts in the International markets, particularly in Europe. Significant investments have been made in the pursuit of these contracts and a number of opportunities exist, however until recently contracts have not been completed. As a result, revenues have fallen short of target and an operating loss after tax in the vicinity of \$1,000,000 will result in the first half of 2012/13.

The Australian business remains strong and has met its half year targets, even in the current challenging economic conditions. The International business has recently seen the signing of three new contracts and in addition there is an expectation that another two contracts will be signed within the next two months. With the signing of these new contracts it is expected that the company will return to profitability in the second half of 2012/13.
