### **Japanese Patent Granted**

NeuroDiscovery is pleased to announce that its wholly owned subsidiary in the UK, Enigma Therapeutics Ltd, received Notification of Grant by the Japanese Patent Office for patent application 2008-327809 entitled "Devices and methods for the treatment of cancer". The patent which is already granted in the US, Europe, Australia, New Zealand, Singapore and Canada, gives further protection to Enigma Therapeutics key anti-cancer technology until February 2022.

The granted patent claims "an internal therapeutic product for the treatment of cancer by brachytherapy (intra-tumoural injection) comprising a radionuclide anti-cancer component that is located in a microparticle."

The Company's Executive Chairman Roger Aston stated "We are pleased to have further strengthened our intellectual property protection for this important technology as we now enter the next key phase of the clinical development of Oncosil™."

ENDS

Yours faithfully
