

ASX Announcement

29 January 2013

Longtom Operational Update

Nexus Energy Limited (**Nexus**) advises that, further to the operational update issued on 14 January, an offshore intervention program will commence shortly. A vessel with the capability to inspect and potentially rectify the electrical fault is due to arrive in the field on 1 February 2013, weather permitting.

The location of the fault that caused the suspension of production at the Longtom field could be within the Santos Limited (**Santos**) or Nexus offshore facilities. All parties are working co-operatively to identify and remedy the fault and return the plant to continuous production as quickly as possible.

Nexus will provide further updates as appropriate.

Lucio Della Martina
Managing Director & Chief Executive Officer
