Malaysia	1800 816 446

A recording of the conference will be made available on the newly launched CathRx website, [www.cathrx.com](http://www.cathrx.com).

End

### About CathRx

CathRx is a medical device company which designs reprocessable cardiac catheter solutions for the treatment of people suffering from electrical problems of the heart known as cardiac arrhythmias. CathRx's proprietary diagnostic and therapeutic catheters are designed to give physicians the tools to cost effectively treat patients with speed, safety and precision.

### About cardiac arrhythmias

Cardiac arrhythmia describes a group of increasingly common conditions where there is abnormal electrical activity in the heart. The beating of a normal heart is controlled by electrical impulses. When these impulses are uncoordinated the heart fails to function properly. This can result in complications ranging from fatigue to stroke and even death. More than 10 million people worldwide suffer from abnormal heart rhythms. Atrial fibrillation is the most common form of arrhythmia and affects over 5 million people worldwide. Current drug therapies often fail to control the problem and can have side effects. Cardiologists worldwide are increasingly using cardiac catheters to diagnose and successfully treat arrhythmias.
