The Macquarie Winton Global Opportunities Trust (the "Trust") has exposure to the Alpha Select Winton FF Limited, a managed account with essentially the same trading strategy as the Winton Futures Fund, as outlined in section 3 of the Trust's Product Disclosure Statement (PDS)<sup>2</sup>.

## Comment from Winton Capital

This month saw some significant falls in Government Bonds, with US 10 year notes reaching levels not seen since October last year. It remains the case however that this represents a rise in yields from extremely low levels in response to more encouraging macro-data and despite comments from the Chairman of the US Federal Reserve that current high energy prices would act to slow growth. The price of Brent Crude did not increase substantially this month, but as a result of gains earlier in the year, it is at levels not seen since 2008. Concerns over energy prices did not seem to affect US equity markets, where the S&P 500 continued its ascent. European equity markets on the other hand lagged behind their US counterparts, with the restructuring of Greece's debt dominating the headlines.

The Fund ended the month down, with gains in equity indices and crops, not being enough to offset losses in bonds.

## Total return since inception (1 December 2005)

Source: Macquarie Group

Note: Total return index with price at 1 December 2005 = 100. All dates are as at month end.

## How the Trust is managed

The Trust has been designed to offer investors a way to access the investment management expertise of Winton with the security of capital protection of the Trust's underlying investment at 30 November 2012.

The Trust's managed futures exposure is managed in accordance with the Alpha Select Winton FF Limited's investment strategy.

This strategy aims to identify a market trend, assess the likelihood of its continuation and extent, and invest to profit from that view. Winton's investment philosophy is that specific market behaviour and trends can be identified and profitably exploited.

Winton's trading model and research program studies the interaction between price and other data series to identify and assess trends with the aim of profiting from them.
