New China contract with Shanxi Jinshen Energy Co for \$4.8m

- Industrea Wadam signs contract with Shanxi Jinshen Energy Co
- Contract for supply of 3 x 50T LWC roof support carriers for approximately \$4.8m

Global mining products and services provider, Industrea Limited (ASX: IDL), today announced the signing of a contract for the supply of three 50 tonne longwall roof support carriers for sale to China.

Industrea wholly owned subsidiary, Industrea Wadam Pty Ltd signed the \$4.8m contract for supply of three 50 tonne Caterpillar 3126 powered low emission machines to Shanxi Jinshen Energy Co for use in its Heqiu mine in Shanxi province. Shanxi Jinshen Energy Co is a joint venture between Shenhua Group and Shanxi Coal Transportation Company producing approximately 10 million tonnes of coal per annum. The order includes associated spares and training.

The order for Industrea Mining Equipment (IME) roof support carriers is already under production at its Thornton facility in New South Wales with delivery expected in late June 2012.

Industrea's Managing Director and CEO, Robin Levison, said this new joint venture customer highlights the strength of our relationship with Shenhua Group. This also creates opportunities for sales and support of additional equipment in this important region where many of our existing customers are supported.

"This latest order increases the already large installed base of IME equipment in China and opportunities for our service capability from our Shijiazhuang facility," said Mr Levison.
