

STOCK EXCHANGE ANNOUNCEMENT

13 June 2012

IDM to Ship 11,000 Tons of SpheriChrome™ to China

IDM International Limited (ASX: IDM, ADR: ILMCY) announces loading of its first large bulk shipment is planned to begin 20 June 2012. The 11,000 tons of SpheriChrome™ is now staged at a dock and warehouse facility in Coos Bay for loading next week and bound for China. This shipment of SpheriChrome™ is being purchased by a leading marketing company in the mineral sands industry.

"The customers recognize that IDM produces high quality foundry sand suitable for challenging foundry applications" said Brianna Hanson, Director of Marketing of IDM. "This material is destined for a number of foundries in China and we are looking forward to further market acceptance in the large Chinese foundry industry similar to what IDM has achieved in North America."

Mr. Wayne Knott the Company's new Chief Operating Officer, commented: "the plant modifications have been progressing well and production levels have increased. It is expected that the modifications and enhancements will support the ongoing marketing efforts by providing increased certainty in both product quality and quantity. The bulk shipment and improved plant performance are gratifying events to conclude an otherwise challenging start-up year for the Company. We are looking forward to improved results as we begin our next fiscal year"

About SpheriChrome™

SpheriChrome™ is a specialty casting sand mined in Coos Bay Oregon State by Oregon Resources Corporation, a wholly owned subsidiary of the Company. It became available in the fall of 2011 and is a chromite sand with a round grain structure and is finer than typical chromite sand making it unique. The United States distributor is HA International. In the USA foundry industry publication 'Modern Castings' a short article was published this month describing the product, some applications and its use by Columbus Castings, the largest single-site steel foundry in the world. We are seeking similar market application in China.
