

GOLDEN GATE PETROLEUM LTD ASX / MEDIA ANNOUNCEMENT

26 November 2012

Napoleonville Project Update – Hensarling #1 Well

Electric Logs Indicate Discovery

14-52 ("Desiree") Prospect, Hensarling # 1 well, Assumption Parish, Louisiana, Non-Operator, 3.99% WI

Golden Gate Petroleum Ltd (ASX: GGP) is pleased to announce that the Hensarling #1 well is presently being conditioned for re-logging.

Electric logs indicate net pay of 31 feet in the Cris II sands.

Initial log run encountered problems and was not able to get a full log over the deeper Cris III sands.

The Desiree prospect covers an area of 140 acres in Assumption Parish, Louisiana and is being operated by a large US oil and gas company. The operator is the same partner that is managing the Napoleonville salt dome project.

This well will be drilled to a total depth of 12,550 feet. Total drilling costs are US\$ 3.6 million. GGP's share of drilling costs was funded in August. The primary objectives are the Cris R II and III intervals which, based on Grand Gulf Energy's estimates, have the potential for 600,000 - 800,000 bbls of oil and secondary objectives in the Cris R IV and V intervals with 200,000 bbls oil and 15-30 BCF gas.

The well is up-dip and 270ft from the largest producer in the Napoleonville Field (2.3 MMBO – Cris R II & III) which was abandoned at low oil prices with split casing while still producing 100 bbls per day (collectively from Cris R II and III). If successful, the project offers long life reserves, with IP's of 400-800 bbls per day.

This is a proven productive fault block with a strong water drive in the primary objectives. The prospect has a significant oil column and long life production potential and was generated from 3D seismic and subsurface support for up-dip attic structure.

Partners in the Hensarling #1 well:

Grand Gulf Energy (ASX:GGE)	35.60%
Golden Gate Petroleum Ltd (ASX:GGP)	3.99%
Other Partners	60.41%
