AGREEMENT WITH HIGH - GRADE GOLD PRODUCER RAMELIUS RESOURCES FOR GOLD PROJECT GENERATION IN THE UNITED STATES

Marmota and Ramelius in alliance for gold project generation in Nevada

Marmota Energy Limited Limited (ASX: MEU) is pleased to announce that it has entered into an agreement with Ramelius Resources Limited (ASX: RMS) for gold project generation in the gold fields of Nevada, considered to be the gold mining capital of the United States.

Marmota will have the right to earn 40% of any interest in any gold projects that Ramelius sources under the terms of the agreement. The terms and timeframes of individual projects will be announced as they emerge.

Gold mining is a major industry in Nevada and is one of the largest sources of gold in the world. Nevada currently produces 82% of all the gold mined in the United States, with 5.7 million ounces mined in 2008. A number of major mining companies, including Newmont Mining and Barrick Gold operate gold projects in the State.

Marmota believes that the agreement with Ramelius will offer Marmota's shareholders exposure to projects with high gold potential in a region of proven high grade, large tonnage mine capability. This is in line with Marmota's corporate strategy of acquiring advanced projects or a known resource with significant expansion potential, located in established mining provinces.

Mr Dom Calandro
MANAGING DIRECTOR
