

METAL STORM LIMITED
ACN 064 270 006

WEAPON SUPPLY CONTRACT

Brisbane, Australia – Friday, 6 November 2009: Metal Storm Limited (ASX trading code: MST, OTC Symbol: MTSXY).

Metal Storm Limited is pleased to advise that Metal Storm Inc has received an order from Defence Research and Development Canada to purchase three Metal Storm MAUL™ 12 gauge Multi-shot Accessory Under-barrel Launchers together with ammunition. Further details will be made available upon approval by the customer, which is currently being sought.

MAUL™ is a small 12 gauge 5 shot semi-automatic shotgun weighing just 800 grams that can be underslung on an assault rifle, fired stand alone with a shoulder stock, or as a pistol with its pistol grip attachment. Intended mission capabilities include door breaching, less lethal payload delivery for crowd control and law enforcement, as well as providing lethal ammunition options.

About Metal Storm

Metal Storm Limited is a multi-national defence technology company engaged in the development of electronically initiated ballistics systems using its unique “stacked projectile” technology. The company is headquartered in Brisbane, Australia and incorporated in Australia. Metal Storm Limited technology and products are represented in the USA by Metal Storm Inc., which has offices in Arlington Virginia.

Metal Storm is working with government agencies and departments, as well as industry, to develop a variety of systems utilising the Metal Storm non-mechanical, electronically fired stacked ammunition system.

Metal Storm's weapon technology uses computer-controlled electronic ignition and a system of stacked projectiles, to achieve a completely non-mechanical gun that is very lightweight and compact, providing a very high firepower to weight ratio. The Metal Storm weapons system utilizes multiple barrels mounted together on one platform which allows varying munitions types to be deployed in a single, low cost, lightweight weapon system. Firing the weapons by electronic ignition requires no moving parts, allowing reliable long term unattended weapon operation.
