The Macquarie Winton Global Opportunities Trust (the "Trust") has exposure to the Alpha Select Winton FF Limited, a managed account with essentially the same trading strategy as the Winton Futures Fund, as outlined in section 3 of the Trust's Product Disclosure Statement (PDS)².

Comment from Winton Capital

The month of June was clearly a "game of two halves", with a subtle and possibly significant change in recent investor appetite for risky assets being reversed intra month. Initially, equities and commodities continued to rally. Stronger than expected Non Farm Payroll numbers lead to market expectations for early rate hikes. 10 year US Bond yields were up as much as 0.5% at one stage.

This flurry of "green shoots" of recovery, which started mid March, began to wane (at least temporarily), and there is renewed talk of "yellow weeds" appearing. As such, Equities came off the boil (S&P ended flat and markets such as Russia fell 20% from their highs). Commodities, in particular Base Metals, retreated and the 10 year Bond yields finished the month up only 0.07%.

Winton's returns were dominated by the volatile interest rate moves; with the Fund losing 0.6% in the Bond sector and a similar sum in Short Term Rates. Against this, Crops did well with a positive 0.5% contribution.

The outlook clearly remains mixed with volatility, (as measured by Vix) being down from 28.9 to 26.35 and now at lower than "pre-Lehman" levels for the first time. Margin to Equity levels did increase a little (5.9%) reflecting gently increased exposure.

How the Trust is managed

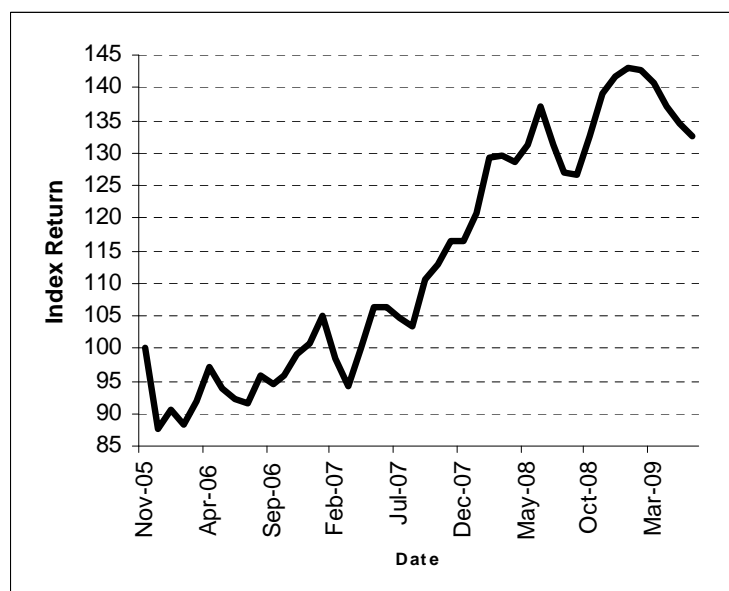

The Trust has been designed to offer investors a way to access the investment management expertise of Winton with the security of capital protection of the Trust's underlying investment at 30 November 2012.

The Trust's managed futures exposure is managed in accordance with the Alpha Select Winton FF Limited's investment strategy.

This strategy aims to identify a market trend, assess the likelihood of its continuation and extent, and invest to profit from that view. Winton's investment philosophy is that specific market behaviour and trends can be identified and profitably exploited.

Winton's trading model and research program studies the interaction between price and other data series to identify and assess trends with the aim of profiting from them.
