1. SIGNIFICANT ACCOUNTING POLICIES

SECURITY VALUATION

The securities and other assets of each Fund are valued pursuant to the pricing policy and procedures approved by the Board of Trustees of the Trust. Effective April 1, 2008, the Funds adopted Financial Accounting Standards Board (“FASB”) Statement of Financial Accounting Standards No. 157 (“FAS 157”), “Fair Value Measurements.” This standard establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value into three broad levels. Inputs may be based on independent market data (“observable inputs”) or they may be internally developed (“unobservable inputs”). The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy under FAS 157 are as follows:

- Level 1 – Inputs that reflect unadjusted quoted prices in active markets for identical assets or liabilities that the Fund has the ability to access at the measurement date;
- Level 2 – Inputs other than quoted prices included within Level 1 that are observable for the asset or liability either directly or indirectly, including quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not considered to be active, inputs other than quoted prices that are observable for the asset or liability, and inputs that are derived principally from or corroborated by observable market data by correlation or other means;
- Level 3 – Inputs that are unobservable for the asset or liability.

Inputs are used in applying the various valuation techniques and broadly refer to the assumptions that market participants use to make valuation decisions, including assumptions about risk. Inputs may include price information, volatility statistics, specific and broad credit data, liquidity statistics, and other factors. The level of a value determined for a financial instrument within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement in its entirety. However, the determination of what constitutes an “observable” input may require significant judgment by the Funds. The Funds consider observable inputs to be market data that is readily available, regularly distributed or updated, reliable and verifiable, and provided by independent sources that are actively involved in the relevant market. The categorization of a value determined for a financial instrument within the hierarchy is based upon the pricing transparency of the instrument and does not necessarily correspond to the Funds’ perceived risk of that instrument.

1GXVZPFZLF88VKG

Investments whose values are based on quoted market prices in active markets, and whose values are therefore classified within Level 1, include active listed equities and certain U.S. government securities. The Funds do not adjust the quoted price for such instruments, even in situations where the Funds hold a large position and a sale could reasonably impact the quoted price.

Investments that trade in markets that are not considered to be active, but whose values are based on quoted market prices, dealer quotations or valuations provided by alternative pricing sources supported by observable inputs are classified within Level 2. These generally include certain U.S. government and sovereign obligations, most government agency securities, investment-grade corporate bonds, certain mortgage products, less liquid listed equities, and state, municipal and provincial obligations. As Level 2 investments include positions that are not traded in active markets and/or are subject to transfer restrictions, valuations may be adjusted to reflect illiquidity and/or non-transferability, which are generally based on available market information.

Investments classified within Level 3 have significant unobservable inputs, as they may trade infrequently or not at all. Level 3 instruments may include unlisted securities related to corporate actions, securities whose trading have been suspended or which have been de-listed from their primary trading exchange, less liquid corporate debt securities (including distressed debt instruments), collateralized debt obligations, and less liquid mortgage securities (backed by either commercial or residential real estate). When observable prices are not available for these securities, the Funds use one or more valuation techniques (e.g., the market approach or the income approach) for which sufficient and reliable data is available. Within Level 3, the use of the market approach generally consists of using comparable market transactions, while the use of the income approach generally consists of the net present value of estimated future cash flows, adjusted as appropriate for liquidity, credit, market and/or other risk factors.

The inputs used by the Funds in estimating the value of Level 3 investments may include the original transaction price, recent transactions in the same or similar instruments, completed or pending third-party transactions in the underlying investment or comparable issuers, and changes in financial ratios or cash flows. Level 3 investments may also be adjusted to reflect illiquidity and/or non-transferability, with the amount of such discount estimated by the Funds in the absence of market information. The fair value measurement of Level 3 investments does not include transaction costs that may have been capitalized as part of the security's cost basis. Assumptions used by the Funds due to the lack of observable inputs may significantly impact the resulting fair value and therefore the Funds' results of operations.

Fair value pricing could result in a difference between the prices used to calculate a Fund's net asset value and the prices used by the Fund's benchmark index, which in turn could result in a difference between the Fund's performance and the performance of the Fund's benchmark index.

The following table summarizes the inputs used in valuing the Funds' investments as of December 31, 2008:

FOREIGN CURRENCY TRANSLATION

The accounting records of the Funds are maintained in U.S. dollars. Foreign currencies, as well as investment securities and other assets and liabilities denominated in foreign currencies are translated into U.S. dollars using exchange rates deemed appropriate by the investment adviser. Purchases and sales of securities, income receipts and expense payments are translated into U.S. dollars on the respective dates of such transactions.

2. TRANSACTIONS WITH AFFILIATES

Each Fund may invest in the Institutional Shares of certain money market funds managed by Barclays Global Fund Advisors (“BGFA”), the Funds’ investment adviser, including the Government Money Market Fund (“GMMF”), Institutional Money Market Fund (“IMMF”), Prime Money Market Fund (“PMMF”) and Treasury Money Market Fund (“TMMF”) of Barclays Global Investors Funds. These money market funds seek to achieve their investment objectives by investing in high-quality, short-term money market instruments that, at the time of investment, have remaining maturities of 397 calendar days or less from the date of acquisition. The GMMF, IMMF, PMMF and TMMF are feeder funds in a master/feeder fund structure that invest substantially all of their assets in the Government Money Market Master Portfolio, Money Market Master Portfolio, Prime Money Market Master Portfolio and Treasury Money Market Master Portfolio (collectively, the “Money Market Master Portfolios”), respectively, which are also managed by BGFA. While the GMMF, IMMF, PMMF and TMMF do not directly charge an investment advisory fee, the Money Market Master Portfolios in which they invest do charge an investment advisory fee.

The following table provides information about the direct investment by certain Funds (exclusive of short-term investments) in issuers of which BGFA is an affiliate or issuers of which the Fund owns 5% or more of the outstanding voting securities, for the nine months ended December 31, 2008.

3. LOANS OF PORTFOLIO SECURITIES

Each Fund may lend its investment securities to approved borrowers, such as brokers, dealers and other financial institutions. The borrower pledges and maintains with the Fund collateral consisting of cash, an irrevocable letter of credit issued by a bank, or securities issued or guaranteed by the U.S. government. The initial collateral received by each Fund is required to have a value of at least 102% of the market value of the loaned securities for securities traded on U.S. exchanges and a value of at least 105% for all other securities. The collateral is maintained thereafter, at a value equal to at least 100% of the current market value of the securities on loan. The risks to the Funds of securities lending include the risk that the borrower may not provide additional collateral when required or may not return the securities when due. Any securities lending cash collateral may be reinvested in certain short-term instruments either directly on behalf of a Fund or through one or more joint accounts or money market funds, including those managed by BGFA; such reinvestments are subject to investment risk.

As of December 31, 2008, certain Funds had loaned securities which were collateralized by cash. The cash collateral received was invested in money market funds managed by BGFA.

Item 2. Controls and Procedures.

- (a) The President (the Registrant's Principal Executive Officer) and Chief Financial Officer (the Registrant's Principal Financial Officer) have concluded that, based on their evaluation as of a date within 90 days of the filing date of this report, the disclosure controls and procedures of the Registrant (as defined in Rule 30a-3(c) under the Investment Company Act of 1940) are reasonably designed to achieve the purposes described in Section 4(a) of the certifications filed with this Form N-Q.
- (b) There were no changes in the Registrant's internal control over financial reporting (as defined in Rule 30a-3(d) under the Investment Company Act of 1940) that occurred during the Registrant's last fiscal quarter that have materially affected, or are reasonably likely to materially affect, the Registrant's internal control over financial reporting.

Item 3. Exhibits.

- (a) Certifications of the President (the Registrant's Principal Executive Officer) and Chief Financial Officer (the Registrant's Principal Financial Officer) as required by Rule 30a-2(a) under the Investment Company Act of 1940 are filed with this Form N-Q as exhibits.
