GLOBAL MINING
INVESTMENTS LIMITED

Agenda

- Financial Performance and Overview
- Business of the Meeting

Financial Performance and Overview

Overview of GMI

- Provides Australian investors with ready access to a diverse spread of the world's major mining companies through a single ASX listed company
- Portfolio managed by UK based BlackRock Investment Management – exclusive resource industry focus & broad international perspective
- Provides corporate, geographical & commodity diversity
- Gives local investors exposure to global mining companies active in Australia but not listed on ASX
- At 15 October 2009:
 - Portfolio value over \$250million
 - Net tangible assets before tax \$1.29 (estimated)
 - Approximately 55 holdings

Year ended 30 June 2009

- **Profit & Loss after tax but before impairment loss - \$37.5 million loss**
 - Dividend income \$6.4million
 - Realised losses on investment \$56.7million
- **Profit & loss after unrealised impairment loss - \$68.6 million loss**
 - Unrealised Impairment loss \$31.1million (net of tax)
- No Dividend Payable

Impairment Charge

- Accounting standards require an impairment charge where the market value of an investment is either:
 - Below cost for an extended period of time; or
 - Significantly below cost
- Required to make these adjustments even though we intend to hold investments for the long term
- If the adjustment was based on the value of investments at 30 September 09, impairment charge net of tax would have been \$12.3million (rather than \$31.1million net of tax)
- No impact on Net Tangible Assets
- It is expected that the Accounting Standards will be amended

Commodity & Geographic Exposure

Geographic

Commodity

Source: Internal as at 30 September 2009

Why is China so important?

- China is the largest consumer of almost all industrial commodities and it is the most important *growth* market

Powerful growth in Chinese consumption continues across commodities

Source: Macquarie

Improving demand outlook from the OECD

- Global outlook appears increasingly positive
- Stocks are beginning to price a meaningful recovery for Western economies in 2010

Source: OECD, Ecwin, Macquarie Research, September 2009

Steel demand – evidence of demand recovery

- **World ex-China steel demand – recovery continues**
- **Supportive of exposure to iron ore and coking coal**

Source: worldSteel, ISSB, Macquarie Research, October 2009

Copper – Why we remain overweight

- This chart shows why we remain bullish on copper in the medium to long term

Global Copper Demand Breakdown
(Index, 1980 = 100)

- This chart shows why we prefer to have exposure to upstream mining assets rather than downstream smelting or refining operations

Concentrate Production (Assuming Average Past 5 years Mine Disruptions)
(Kt of Copper)

Supply cuts are severely impacting an industry already under pressure

Source: Brook Hunt, Xstrata analysis

Planned Projects

- Many new mines or expansion plans cancelled altogether or significantly scaled back
- Juniors struggling to get financing in this new credit environment

Existing Operations

- Falling ore grade and production challenges make achieving nameplate capacity difficult
- Increased regulation, social and environmental pressures limiting growth at existing operations

GMI Investment Activity

- In Q4 2008, reduced exposure to higher risk, earlier stage mining companies in favour of more defensive established producers with stronger balance sheets
- Early 2009, took part in a number of extremely attractively priced financings
- Established position in high coupon convertible bonds issued by major mining companies
 - 6.0% of the portfolio in fixed income securities
- Fund positioned to benefit from continued recovery in demand for commodities

Source: Internal. As at October 2009, subject to change.

GMI Investment Strategy

- A portfolio of high calibre companies
 - High quality assets
 - Strong management
 - Robust balance sheets
- Focus on long life, low cost assets
 - Less prone to capex inflation
 - Most of capex already spent
- Significant exposure to diversified companies
 - High margins, high barriers to entry and consolidated supply ownership
- Low emphasis on explorer/ developers
- Current favoured sectors: bulk commodities, copper, platinum
- Underweight aluminium and zinc
