26 August 2019

Mr. Frederick L Hunt  
Company Secretary  
Mount Rommel Mining Limited  
P.O. Box 80  
Bundoora VIC Australia 3083

## WHAT IS THE GLENFINE PROCESS?

*The Glenfine (Tailings) Process* is a disruptive technology that unlocks the full value of “Stranded Assets” by enabling small scale, low cost, ore processing and environmental up-cycling. The core operating principals behind the *Glenfine Process* have been developed by Mr. Hunt, who is an industrial chemist with 30+ years of experience developing processing solutions for the chemical and pharmaceutical equipment manufacturing industries. Over the past 5 years Mr. Hunt has been developing and is now starting to operate the Glenfine 1.0 plant to successfully recover value from historic gold tailings at Glenfine, South of Ballarat, Victoria.

In light of the above please refer to the following:

- 1) Is there a commercial agreement between the Company and Atom Minerals?
- 2) Please explain whether the agreement has an impact on the assets of the Company? If so please elaborate on the impact.

Please provide the Exchange with a copy of the agreement/contract which will not be released to the market.

This request is made under, and in accordance with, Listing Rule 2.7. It goes to whether the Company is in compliance with Listing Rules Section IIA 6.4 and 6.5A.

Your response should be sent to me directly via email no later than 4 pm on 28 August 2019. Your response will be released to the market along with a copy of this letter. If you wish to discuss the content of your response, please do not hesitate to contact me as soon as possible.

Yours sincerely

**Ron Kaushik**  
Senior Manager, Market Surveillance
