**ikeGPS Announces Integration With ProntoForms**

**– Joint solution improves mobile workforce productivity across numerous industries –**

BROOMFIELD, Colo.—ikeGPS (NZX:IKE) announces that its smart laser measurement solution, Spike, is now integrated with cloud-based mobile forms software from ProntoForms (TSXV:PFM), the leading provider of mobile data collection and analytics platforms for enterprises and small- to medium-size businesses.

ProntoForms serves more than 55,000 subscribers and 3,500 customers in a wide range of industries. Additionally, ProntoForms has strategic partnerships with some of the mobility industry's leading brands, including Apple, Google, AT&T, HP, Samsung and Unilever.

ProntoForms users can now attach a Spike device to their iOS smartphone or tablet to easily capture area and linear measurements and have the data automatically embed into their mobile forms and take advantage of all the output and connectivity capabilities that the ProntoForms solution offers. This makes it easy for remote workers to quickly complete and submit detailed customer estimates, work orders and property inspection reports directly from the field.

Users can collect as many measurements as required and add other necessary information, such as estimated costs and customer signatures. Completed forms, including all photos and measurements, can be submitted in real time to customers as PDFs and back-office systems with just the touch of a button.

"ProntoForms has thousands of end users who measure something every day, typically by using a traditional tape measure and ladder," says Jeff Ross, senior vice president of new market development at ikeGPS. "This new integration will enable ProntoForms customers to dramatically reduce the time it takes to measure homes, office buildings, structures and other objects."

"The integration between ProntoForms and Spike from ikeGPS demonstrates early success of our new partner and integration strategy with a market leader," says Mansell Nelson, senior vice president of business development at ProntoForms. "We're the recognized leader in the North American mobile forms market, which has an estimated 42 million subscribers, and believe that our partnership strategy, alongside our direct and channels sales, will help accelerate our market share growth through connected and embedded solutions."

## About ikeGPS

[ikeGPS](#) is changing the way the world is measured, utilizing its smart laser measurement solutions to capture, record and export measurement data. Numerous vertical industries and field data collection-based professionals use ikeGPS products to modernize the way measurements are taken and shared. ikeGPS's product portfolio includes IKE and Spike.

[IKE](#) is an all-in-one, configurable hardware and software solution that increases accuracy and quality while reducing costs for electric utilities, communication companies and engineering service providers engaged in aerial fiber deployments, joint-use applications and utility pole-related construction projects. IKE solutions have also been successfully adopted by public safety, civil engineering, transportation, federal and city governments, and intelligence agencies for a variety of field data collection needs.

[Spike](#) is a comprehensive but simple-to-use smartphone measurement solution. The Spike device, Spike mobile and web apps, and commercial smartphone or tablets work together to change the way measurements are taken and shared. From a Spike photo, a user can capture measurements, including height, width, area, length and target location. Measurements and location data are saved with the picture and can be easily shared in real time or uploaded to the Spike cloud for further analysis. Spike has been rapidly adopted by numerous industries, including construction, real estate, and sign and graphics for property inspection and building measurements.

ikeGPS is headquartered in Wellington, New Zealand, and is listed on the New Zealand Stock Exchange under the stock symbol IKE. The company's global sales, marketing and customer support teams are based in Broomfield, Colorado, with a regional office in Seattle.

## About ProntoForms

ProntoForms is a mobile workflow platform used by more than 3,500 businesses and 55,000 subscribers to collect and analyze field data with smartphones and tablets. Our product delivers an intuitive, secure and scalable solution for mobilizing business processes, with a low total cost of ownership. Our customers harness the solution to increase productivity and reduce cost, improve quality of service and mitigate risks.

ProntoForms Corporation is the winner of the 2015 Frost & Sullivan Competitive Strategy Innovation and Leadership Award for the Mobile Forms Industry.

The Company trades on the TSXV under the symbol PFM. ProntoForms is the registered trademark of ProntoForms Inc., a wholly owned subsidiary of ProntoForms Corporation.
