About Channel Infrastructure NZ

Channel Infrastructure's vision is to be a world-class infrastructure company, delivering resilient infrastructure solutions to help meet changing fuel and energy needs.

Channel Infrastructure's assets are a critical part of the Northland and Auckland fuel supply chain, supporting the delivery of around 40% of New Zealand's transport fuel demand and all of the jet fuel to the Auckland International Airport. Utilising the deep-water harbour and jetty infrastructure at Marsden Point, as well as 280 million litres of storage tanks, and the 170-kilometre pipeline from Marsden Point to Auckland we receive, store, test and distribute fuel owned by our customers. Channel Infrastructure's wholly-owned subsidiary, Independent Petroleum Laboratory Limited, provides fuel quality testing services at Marsden Point and around New Zealand.

Channel Infrastructure will seek to support New Zealand's decarbonisation ambitions, by utilising our strategically-located assets and our expertise in supply chain infrastructure. The Company remains focused on its future growth opportunities at the Marsden Point site and beyond, including additional fuel storage to support fuel security and studies underway with partners on hydrogen and sustainable aviation fuel opportunities.
