Serko has partnered with Qantas to achieve NDC Level 3 Certification

Serko Limited (NZX:SKO) announced today that Zeno, its next generation technology for travel and expense management, has been granted Level 3 Certification by IATA for native support of NDC with Qantas. Zeno becomes the first travel and expense platform globally to achieve this level of accreditation.

NDC (New Distribution Capability) is a travel industry-supported program launched by IATA for the development and market adoption of a new, XML-based data transmission standard that enhances the capability of communications between airlines, travel agents and aggregators.

Serko has entered into a strategic partnership with Qantas to enable NDC certification for Zeno.

As travel providers such as airlines increasingly look to engage directly with travellers to merchandise their offerings, Serko is ensuring its technology is capable of aggregating airlines rich content to facilitate this and create a seamless experience for corporate travel. Serko's strategy is to ensure that it has the breadth and depth of content required to provide an integrated itinerary across the entire journey.

Serko does not expect this to have a material impact to its results for the 2019 financial year.
