Vista Cinema achieves homologation in Brazil

Vista Entertainment Solutions Limited (VES) has gained homologation for the licensing of its world leading Vista Cinema software for the majority of states in Brazil.

Vista Group identified Brazil as a growth market during the period of the company's Initial Public Offering in August 2014, and has been working since, to obtain the regulatory approvals (homologation) required to offer its Vista Cinema software in the market.

Now that homologation has been achieved, customers using Vista Cinema in other territories, that also own and operate cinemas in Brazil, are able to deploy Vista Cinema to their Brazilian cinema sites should they wish to do so. Vista's reseller in the territory can also commence marketing Vista Cinema to new customers in Brazil.
