Proof of Concept Updates

Highlights

- Zyber continues working through features and testing with REDtrac, Cynosure and T&T POC's with additional details provided below

Zyber Holdings Limited (ASX: ZYB) ('Zyber' or 'the Company') is pleased to provide the following update in relation to the ongoing POC trials with REDtrac, Cynosure and T&T.

REDtrac

The REDtrac POC is to enable secure sharing on engineering drawings and O&M water well site documents with contracted field crews via their mobile devices. Furthermore, they require the solution to automatically retrieve and back up water well sensor data used for utility re-billing.

Additionally, REDtrac would like the Zyber platform to retrieve well site diagnostics daily and place that data in readily retrievable files on their corporate Zyber drive and also on their corporate DropBox Cloud.

T&T

The T&T POC is to utilize Zyber to share and disseminate data securely with multiple stores and groups of stores, allowing employees to have access to their data via existing mobile devices.

Zyber has also been tasked to provide a solution that has the ability to retrieve store specific data and files, spread across multiple legacy enterprise systems (accounting, purchasing, private directories etc).

Cynosure

The Cynosure POC is to provide a solution to secure and share secret client portfolio data with remote employees via their existing mobile devices and to easily retrieve, aggregate and collate client portfolio data (files) spread across multiple enterprise based legacy systems.

CEO Update

"I will be in Southern California during the first week of October, at the REDtrac offices for platform training with their team, **and to also meet with an additional POC** prospect in Southern California (a large utility), to demonstrate the Zyber platform, as requested by the utility," says Ben Daly, Zyber CEO.

"The overall corporate burn rate has been substantially reduced. This was achieved through a reduction of headcount in several areas (IT, Sales and Operations), and through the reduction of several recurring variable expenses. The August expenses came in under the original revised budget set forth in June, before the aforementioned cuts".
