## DRILLING COMPLETED AT PLUMRIDGE GOLD PROJECT

Segue Resources Limited (**Segue** or the **Company**) is pleased to announce that the recent aircore drilling at the Plumridge Gold Project in the Fraser Range Province of Western Australia has been completed. The programme consisted of 3,147m drilled over 57 holes along the southern extent of the well mineralised Harris Lake Shear Zone.

Figure 1: Plumridge Gold Project showing Harris Lake Shear Zone, gold prospects and 8ppb gold contour

Geological review of the drill chips confirms that the drilling intersected similar stratigraphy and alteration as observed at the Corvette gold prospect further to the north along the Harris Lake Shear Zone. Assay results from the programme are expected to be received by the end of August 2016.
