# Meridian Energy monthly operating report for February 2016

15 March 2016

Attached is Meridian Energy Limited's monthly operating report for the month ended 29 February 2016.

Highlights this month include:

- In the month to 10 March 2016, national hydro storage increased from 90% to 102% of historical average
- South Island storage sat at 101% of average and North Island storage at 109% of average on 10 March 2016
- Meridian's February 2016 monthly inflows were 132% of historical average
- Meridian's Waitaki catchment storage increased from 93% to 98% of average at the end of February 2016
- National electricity demand in February 2016 was 2.6% higher than the same month last year
- This was driven by higher leap year working days with lower South Island irrigation
- Meridian's retail sales volumes in February 2016 decreased by 7.5% compared to February 2015, as a result of lower South Island irrigation and lower corporate sales volumes

# ***Better energy future***

# February highlights

In the month to 10 March 2016, national hydro storage increased from 90% to 102% of historical average

South Island storage sat at 101% of average and North Island storage at 109% of average on 10 March 2016

Meridian's February 2016 monthly inflows were 132% of historical average

Meridian's Waitaki catchment storage increased from 93% to 98% of historical average at the end of February 2016

National electricity demand in February 2016 was 2.6% higher than the same month last year

This was driven by higher leap year working days with lower South Island irrigation

Meridian's retail sales volumes in February 2016 decreased by 7.5% compared to February 2015, as a result of lower South Island irrigation and lower corporate sales volumes

# Market data

- National electricity demand in February 2016 was 2.6% higher than the same month last year
- This was driven by the positive leap year effect of one more working day in February 2016, impacted by lower South Island irrigation load
- Demand in the last 12 months was 1.2% higher than the preceding 12 months
- New Zealand Aluminium Smelter's average load was at the 572MW base quantity of the NZAS agreement during February 2016
- The number of switches for all retailers in January 2016 was 5.8% lower than the previous month and 13.8% higher than January 2015
- The 12 month average switching rate for all retailers was 20.6% at the end of January 2016

## NATIONAL DEMAND

## MARKET ICP SWITCHING (ALL RETAILERS)

# Market data

**OTAHUHU ASX FUTURES SETTLEMENT PRICE**

\$/MWh

**BENMORE ASX FUTURES SETTLEMENT PRICE**

\$/MWh

- February 2016 saw some downward movement in near-term ASX prices
- National storage increased from 90% of the 81 year average on 11 February 2016 to 102% of average on 10 March 2016
- South Island storage increased to 101% of historical average on 10 March 2016. North Island storage decreased to 109% of average

**NATIONAL HYDRO STORAGE (10 MARCH 2016)**

GWh

# Meridian operating information

- February 2016 monthly inflows were 132% of historical average
- Meridian's Waitaki catchment storage moved from 1,758GWh to 1,873GWh during February 2016
- Waitaki storage at the end of February 2016 was 98% of historical average, compared with the position a month earlier, where storage was at 93% of historical average
- Waitaki storage at the end of February 2016 was 15% higher than the same time last year
- Storage in Meridian's Waiau catchment was also rose during February 2016

**MERIDIAN'S COMBINED CATCHMENT INFLOWS**

**MERIDIAN'S WAITAKI STORAGE**

# Meridian operating information

- Meridian's New Zealand generation in February 2016 was 10.8% higher than the same month last year, reflecting both higher hydro and wind generation
- To date this financial year Meridian's New Zealand generation is 0.5% higher than the same period last year, reflecting higher wind generation and slightly lower hydro generation
- The average price Meridian received for its generation in February 2016 was 29.3% lower than the same month last year
- The average price Meridian paid to supply contracted sales in February 2016 was 26.9% lower than the same month last year
- To date this financial year, the average price Meridian has received for its generation is 16.7% lower than the same period last year

**MERIDIAN'S NEW ZEALAND GENERATION**

**MERIDIAN'S AVERAGE GENERATION PRICE\***

# Meridian operating information

- Meridian's New Zealand customer connection numbers rose slightly during February 2016
- Retail sales volumes in February 2016 decreased by 7.5% compared to February 2015
- Compared to February 2015, residential/SMB sales volumes decreased by 5.0% (reflecting lower irrigation volumes) and corporate sales volumes decreased by 11.7% (churn in time of use customers)
- To date this financial year Meridian's retail sales volumes are 1.3% higher than the same period last year
- This reflects a 2.0% increase in residential/SMB sales volumes and a 0.1% increase in corporate sales volumes

**MERIDIAN'S NEW ZEALAND CUSTOMER CONNECTIONS**

**MERIDIAN'S RETAIL SALES VOLUMES\***

# Glossary

<b>Acquired generation volumes</b>	buy-side electricity derivatives excluding the buy-side of virtual asset swaps
<b>Average generation price</b>	the volume weighted average price received for Meridian's physical generation
<b>Average retail contracted sales price</b>	volume weighted average electricity price received from retail customers, less distribution costs
<b>Average wholesale contracted sales price</b>	volume weighted average electricity price received from wholesale customers, including NZAS
<b>Combined catchment inflows</b>	combined water inflows into Meridian's Waitaki and Waiau hydro storage lakes
<b>Cost of acquired generation</b>	volume weighted average price Meridian pays for derivatives acquired to supplement generation
<b>Cost to supply contracted sales</b>	volume weighted average price Meridian pays to supply contracted customer sales
<b>Contracts for Difference (CFDs)</b>	an agreement between parties to pay the difference between the wholesale electricity price and an agreed fixed price for a specified volume of electricity. CFDs do not result in the physical supply of electricity
<b>Customer connections (NZ)</b>	number of installation control points, excluding vacants
<b>FRMP</b>	financially responsible market participant
<b>GWh</b>	gigawatt hour. Enough electricity for 125 average New Zealand households for one year
<b>Historic average inflows</b>	the historic average combined water inflows into Meridian's Waitaki and Waiau hydro storage lakes over the last 81 years
<b>Historic average storage</b>	the historic average level of storage in Meridian's Waitaki catchment since 1979
<b>HVDC</b>	high voltage direct current link between the North and South Islands of New Zealand
<b>ICP</b>	New Zealand installation control points, excluding vacants
<b>ICP switching</b>	the number of installation control points changing retailer supplier in New Zealand, recorded in the month the switch was initiated
<b>MWh</b>	megawatt hour. Enough electricity for one average New Zealand household for 46 days
<b>National demand</b>	Transpower's Daily Demand reporting, adjusted for embedded generation from Meridian's Te Uku, White Hill and Mill Creek wind farms
<b>NZAS</b>	New Zealand Aluminium Smelters Limited
<b>Retail sales volumes</b>	contract sales volumes to retail customers, including both non half hourly and half hourly metered customers
<b>Sell side derivatives</b>	sell-side electricity derivatives excluding the sell-side of virtual asset swaps
<b>Virtual Asset Swaps (VAS)</b>	CFDs Meridian has with Genesis Energy and Mightly River Power. They do not result in the physical supply of electricity
