

ASX ANNOUNCEMENT

TTG signs Agreement with Bank of Jiujiang

29 January 2016 (ASX : TUP)

TTG Fintech Limited (**TTG**) today announces that it has signed a cooperation agreement with 九江銀行(Bank of Jiujiang, or JJB), a licensed commercial bank based in Jiangxi, China.

Under the terms of the agreement, TTG and TTG Jiangxi, a subsidiary of TTG based in Jiangxi will cooperate to service JJB as to:

1. Upgrading JJB's existing POS systems to Tlinx intelligence products which JJB will provide to its commercial clients;
2. Promote Tlinx products and FEA services to new users of JJB

In return, TTG will receive:

1. Customer service fees based on number of commercial clients using TTG's Tlinx
2. A percentage fee revenue share on the transactions executed by JJB's commercial clients who use TTG's Tlinx and FEA

"Our cooperation with Bank of Jiujiang opens a new page for TTG. It means that our products and services can accommodate the needs of commercial banks." TTG's Chairman Mr Xiong said today.

About Bank of Jiujiang

Bank of Jiujiang is based in Jiujiang City, Jiangxi Province. It has over 200 branches in locations including Jiangxi, Guangzhou, Beijing and Hefei . BJJ was incorporated in the year 2000 and is regarded as one of the most innovative commercial banks in China.

About TTG

TTG has developed Financial Electronic Authentication (“FEA”) technology. By combining bank-card and non-bank-card bank accounts, this FEA technology allows clearing and settlement of digital currencies and payment of commissions. With the use of FEA technology, currency is not just a medium and consideration of exchange, but also a means of communication, sharing, analysis, transmission, promotion, data sourcing and labelling, and targeted marketing. FEA technology is now used in TTG’s ULPOS platform, and is being extended to other applications.

Based on it’s FEA technology, TTG has developed it’s own smart cloud-supported POS system called Tlinx, which can be applied to different types of POS, both traditional and smart. Tlinx accomodates varying payment methodologies (e.g. cash, bank card, debit card, QR code, NFC, mobile payment, payment by royalty points, etc.) to be transacted on one hardware portal. Tlinx also allows for data transmission and supports numerous CRM functions (e.g. promotion of merchants, coupon, transaction data management, customer loyalty data analysis and management, etc) for diverse industries such as beverage, retail chain stores and B2C e-commerce.

TTG is entitled to a percentage of fees generated on the ULPOS platform and other transactions that employ the FEA and Tlinx.
