## ASX ANNOUNCEMENT

Thursday 18<sup>th</sup> February 2016

### Record Six International Phoslock Applications over next two months

Phoslock Water Solutions Limited (ASX: PHK) wishes to confirm the Company and its licensees over the next two months will apply Phoslock onto lakes and canals in six countries - Germany, Holland, UK, Canada, China and Brazil. The total contract value to PHK and its licensees is approx. \$850,000.

This period coincides with the northern hemisphere spring period where lakes have now thawed. It is also one of the optimal times annually for Phoslock to absorb phosphorus in the various water columns and sediments.

Additionally, the Brazilian consortium, in which PHK's Brazilian licensee is a major partner, is busy preparing for the first major application to Pampulha Lake in April-May. PHK is currently finalising shipping product to Brazil for this application.

### **Phoslock repays February Convertible Security instalment in cash**

The Board of PHK has again chosen to exercise its right to repay the 10th monthly instalment, paid on 15 February, 2016 under the Convertible Note facility **in cash**.

Under the Convertible Note facility with The Australian Special Opportunities Fund LP (ASOF), the Company may choose to pay monthly instalments in either shares or in cash.

This is the fifth consecutive repayment the Company has decided to repay in cash rather than shares. This is as a consequence of significantly improved cash flow from PHK projects. The total outstanding under the ASOF Convertible Security is currently \$383,335. This is repayable by 5 monthly payments of \$76,667. PHK will look at making future monthly repayments in cash, where cash-flow of the Company allows.

## PHOSLOCK WATER SOLUTIONS LIMITED (PHK)

PHK produces *Phoslock*, a patented technology which was developed by the Commonwealth Scientific and Industrial Research Organisation (“CSIRO”). PHK has lodged a subsequent patent application to protect the core Phoslock technology which is in an advanced stage of being granted in approx. 50 countries, with the intention of extending the core *Phoslock* technology to 2033.

PHK is headquartered in Sydney, Australia and has offices in Brisbane, Sichuan, China and Bremen, Germany covering Europe and South America. PHK is represented by licensees and agents in ten other countries including SePRO Corporation in the United States.

*Phoslock* is a certified NSF/ANSI Standard 60 product - North American Drinking Water (see websites [ansi.org](http://ansi.org) and [scc.ca](http://scc.ca)). This certification enables Phoslock to be applied to water bodies used for human consumption.

**Phoslock Water Solutions Ltd. is listed on the Australian Stock Exchange (ASX Code: PHK).**

### **ABOUT PHOSLOCK – the Product**

*Phoslock* is a unique water treatment product that binds phosphorus in water bodies such as lakes and dams. It provides a protective permeable layer to sediments, permanently preventing the re-release of phosphorus.

Retention of phosphorus reduces the level of algae by depriving it of nutrients. This in turn improves water quality, both for human use and aquatic life as well as preventing and controlling Harmful Algal Blooms (HAB).

*Phoslock* is primarily used as an in-water solution for lakes, drinking water reservoirs and other recreational water bodies. It is also used as a preventative product to absorb phosphorus before it is transported into water bodies by being applied in storm water basins and inflow channels, rivers and canals.

*Phoslock* is approved for use in North American Drinking Water Reservoirs via NSF/ANSI Standard 60 Certification. **This certifies that *Phoslock* is safe for use in drinking water.**

*Phoslock* has been used on many of high profile water bodies in Europe/UK, North America and Australia. To date over 250 initial and follow-up applications have been successfully made.

Over 35 peer reviewed scientific and technical papers, have been published on Phoslock in leading scientific journals. For access: [www.phoslock.com.au](http://www.phoslock.com.au)
