TTG Introduction

A Financial Services Company registered in HK in 2010 and listed on ASX in 2012

✓ Core Value:

We have developed and own our intellectual property (IP) regarding data and transaction integrity, which helps our partners to connect and manage their transaction payment, settlement and data management

✓ Service:

Payment route switching, completion of online offline transaction data loop, clearance of transactions involving numerous parties, smart point of sales (POS) supporting diversified payment methodologies and an open platform to accommodate the above services

TTG Introduction

Mission: Allowing operating partners to enjoy benefits, aimed at mutual win-win. Our products serve the needs of partners instead of promoting TTG's own brand

Development Plan: Financial Electronic Authentication (FEA) & T-Linx development and expansion in both China and overseas. Ultimate goal to become the leading "invisible digital account service organisation"

Management: Xiong Qiang, graduated from Jiangxi University of Finance & Economics and has over 15 years experience in internet industry.

Business model: A combination of transaction fee sharing + system monthly fee + system development fee + solution service fee + processing fee

Competition: TTG accommodates varying payment methodologies and cooperates with all major partners including First Data which has authorised its PRC subsidiary to co-develop its FirstPOS in China

Our Partners

In negotiation with Alipay and Wechat Pay

Covering major Chinese commercial banks, insurance companies, financial internet platforms, property development and management companies.

Financial Electronic Authentication

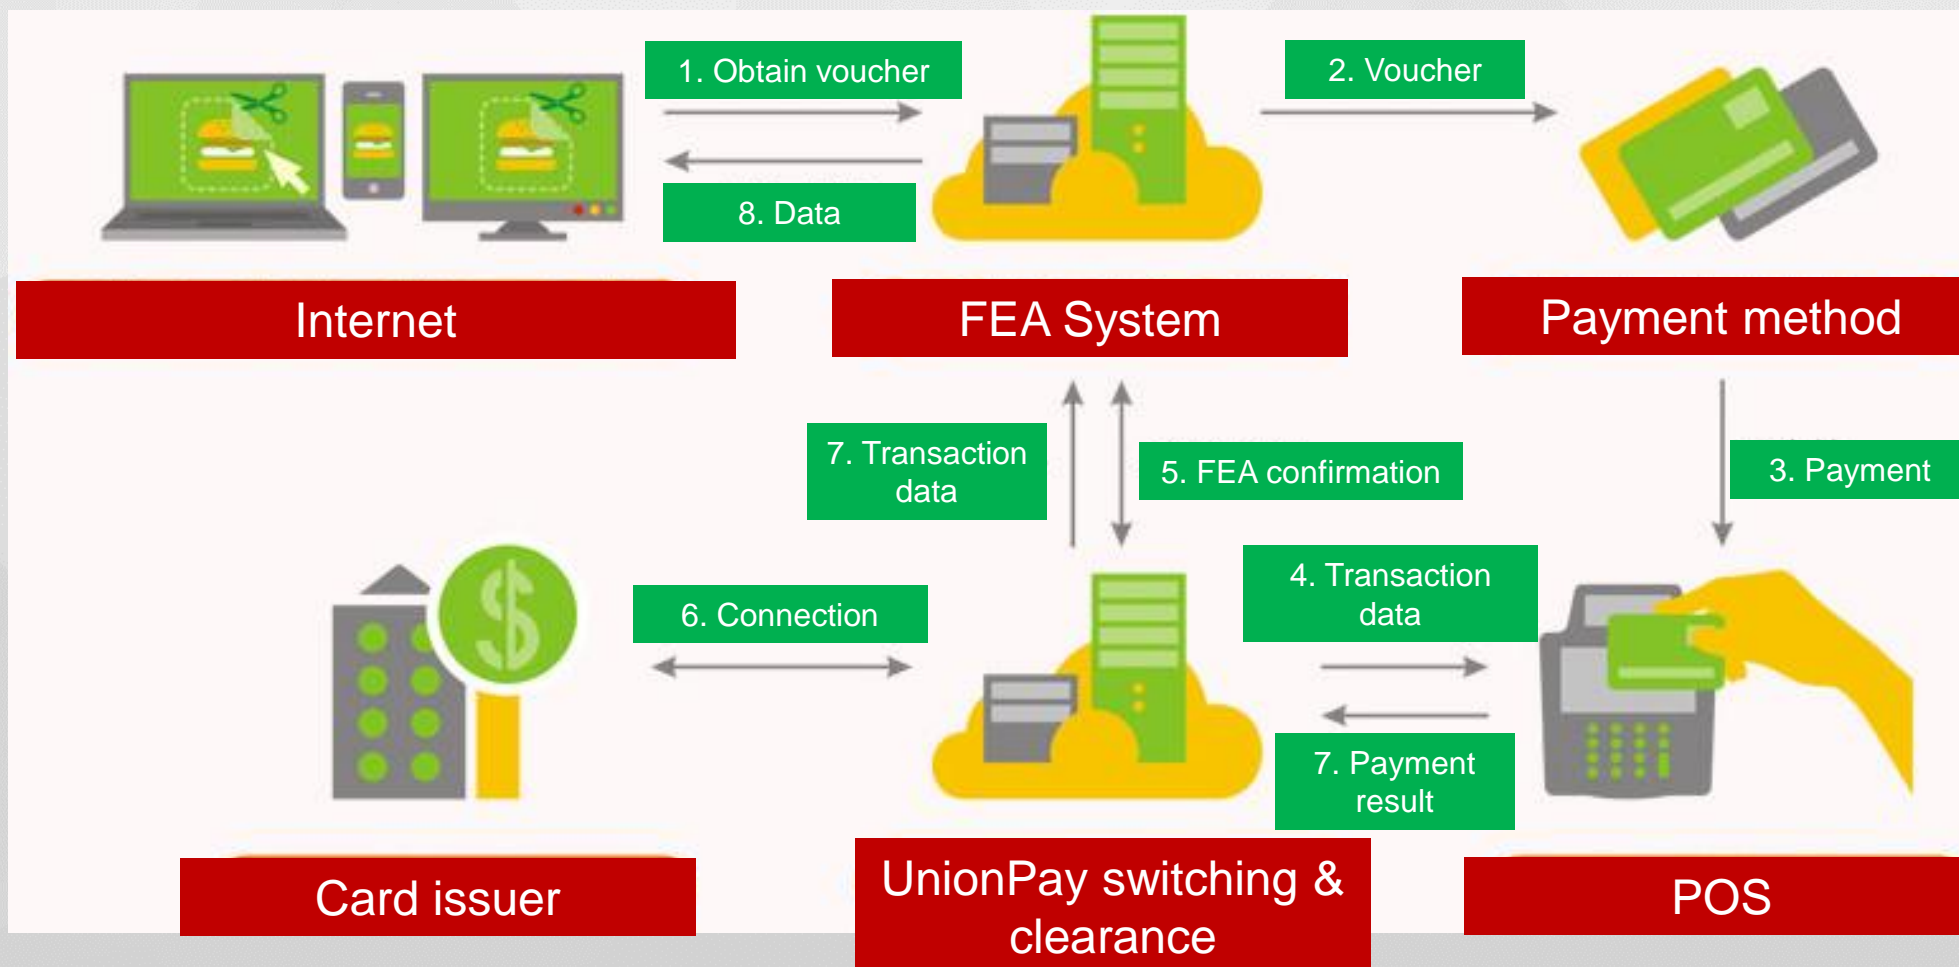

Our product:

TTG has developed its FEA and applications through the use of UnionPay POS, allowing online offline settlement, clearance and data loop closure. The use of FEA can now serve all major financial institutions, POS acquirers, all online and offline enterprises, and allow all UnionPay cardholders to enjoy instant value added services.

TTG's FEA service platform ensures a continuing reliable transaction ecosystem
