**ANTEO TECHNOLOGIES ANNOUNCES FEASIBILITY STUDY WITH
COOK AUSTRALIA**

- **Fully funded feasibility study with Cook Australia involving Mix&Go technology**
- **Cook Australia is part of Cook Medical – world's largest private medical device manufacturer**
- **Marks Anteo's expansion into the in vivo medical devices sector**
- **Avenues for exposure of Mix&Go technology to the international Cook conglomerate**

Anteo Technologies Pty Ltd, a wholly owned subsidiary of Anteo Diagnostics Limited (ASX: ADO) is pleased to announce a fully funded feasibility study involving the company's patented Mix&Go technology with leading medical device company William A. Cook Australia Pty Ltd.

Cook Australia manufactures a diverse range of medical devices and is Queensland's largest exporter of non-mining products. It is part of the international Cook Group of companies, the world's largest private medical device manufacturer.

Dr Geoff Cumming, CEO, Anteo Technologies said: "Cook's history of innovation and invention that meets and exceeds customers' expectations is very much aligned with our philosophy at Anteo Technologies and we are very pleased to be collaborating with Cook Australia on this feasibility study,"

"Anteo will be formally assessing an opportunity to apply Anteo's patented Mix&Go technology to one of Cook's portfolio applications. This is a fully funded program, and our first commercial foray into the in vivo medical devices sector,"

"This follows a smaller paid scoping study that we undertook with Cook Australia last year as part of our work exploring opportunities for Anteo in our non-core areas," said Dr Cumming.

Anteo Technologies and Cook Australia are mainstays in their respective industries in Australia and both support advanced manufacturing in Australia.

Barry Thomas, Director, Asia Pacific and Vice President, Cook Incorporated said: "We are excited to collaborate with Anteo Technologies in Australia to develop high value technologies for the global market."

Dr Cumming added: “We see this partnership as an opportunity to demonstrate the value of our technology and we envisage that additional opportunities could arise in the future to work within the broader Cook Group of companies.”

Anteo Technologies Pty Ltd

www.anteotech.com

Anteo uses its patented technology to develop, manufacture and commercialise proprietary surface coatings for use in healthcare, life sciences and beyond. Its patented technology is applied in the Mix&Go product range, which delivers solutions to the challenges of establishing highly functional interfaces between fragile biomolecules, and synthetic, and often incompatible materials.

Cook Australia
