

30 January 2015

Australian Securities Exchange

Techniche Limited - ASX Code TCN

Market Update

Techniche Limited ("the Company") advises that it is now forecasting a half-year net profit after tax in the range of \$1,200,000 to \$1,300,000.

The Company further advises that it expects its full year net profit after tax to be approximately \$2,400,000.

The improvements in the half year profit are as a result of a number of factors including:

- Increased revenue in December which was originally forecast to occur in the 2nd half of the year, including a significant new order
- Exchange rate improvements
- Prior and current year tax benefits.

The Company continues to remind shareholders that its revenue and profits are impacted by the size and timing of some orders and major currency fluctuations. A further market update may be provided with the publication of the Company's half year results.
