## About Living Cell Technologies

Living Cell Technologies (LCT) is an Australasian biotechnology company researching and developing cell therapies to treat diseases with high unmet clinical need. LCT's lead product NTCELL<sup>®</sup> is an alginate coated capsule containing clusters of neonatal porcine choroid plexus cells. After transplantation NTCELL functions as a biological factory producing factors to promote new central nervous system growth and repair disease induced nerve degeneration.

NTCELL is in Phase I/IIa clinical trial in New Zealand for the treatment of Parkinson's disease. It has the potential to be used in a number of other central nervous system indications such as Huntington's, Alzheimer's and motor neurone diseases.

LCT's proprietary encapsulation technology, IMMUEP™, allows cell therapies to be used without the need for co-treatment with drugs that suppress the immune system.

LCT holds a 50% interest in Diatranz Otsuka Limited which is developing a cell therapy for type 1 diabetes.

LCT is listed on the Australian (ASX: LCT) and US (OTCQX: LVCLY) stock exchanges. The company is incorporated in Australia, with its operations based in New Zealand.
