ASX RELEASE

07 June 2021

ASX Code: CAE

DRILLING COMMENCES AT PICCADILLY GOLD PROJECT

Cannindah Resources Limited (ASX: CAE) is very pleased to announce that drilling at the highly prospective Piccadilly Gold project has commenced over the weekend. The initial program will cover approximately 23 locations with over 2500m of RC holes. The first batch of samples have been delivered back to our consulting geologists at Terra Search over the weekend for sorting prior to being sent to the lab for assay. The recent trenching results (ASX release dated 7th of May 2021) have provided excellent targets for follow up and the company intends to pursue these targets with current drilling along with other areas of interest within the project.

Cannindah Resources Limited's Executive Chairman Mr Tom Pickett stated "It was fantastic to witness the drilling activity on site at the Piccadilly project over the weekend. I am particularly pleased to have samples heading to the lab so soon. Cannindah Resources looks forward to updating shareholders with the outcome of this drilling program as soon as assaying and reporting of results has been completed by our consulting geologists."
