# QUARTERLY ACTIVITIES REPORT

FOR THE PERIOD ENDED 30 JUNE 2022

- **Drilling commenced in April at Treasure Creek, located only 15km west of Kinross Gold's Fort Knox Gold Mine, with 70 holes for 7,715m completed by the end of June.**
- **At the end of June, Felix Gold had received approx. 150m of assays with results from hole 22TCRC002 reported: 28.9m @ 1.43 g/t Au from 24.4m.**
- **Felix undertook further consolidation of the Fairbanks Gold Mining District with the acquisition of the MHT tenure (6,403 acres), which is located within 400m of Kinross' Fort Knox mill and 200m from Freegold Ventures' Golden Summit Project.**
- **The MHT tenure holds multiple previous mine workings and evidence of extensive historical placer mining.**
- **Drilling is continuing with a total planned initial program of 10,000-15,000m across Treasure Creek, NE Fairbanks and the MHT tenure.**

Felix Gold Limited (ASX: FXG) (**Felix** or the **Company**) provides a summary of its operational and corporate activities for the quarter ended 30 June 2022.

## Background

Felix listed on the ASX in January 2022 after undertaking the largest consolidation of relatively underexplored tenure in the history of the Fairbanks Gold Mining District (**FGMD**) in Alaska. It now has the rights to the largest area of mineral claims in the FGMD.

The FGMD hosts Kinross Gold's Fort Knox Gold Mine, which has publicly stated its need for more ore supply. Current ore supply for Fort Knox includes its Gill-Sourdough satellite operation (10 Mt at 0.6 g/t for 193 koz Au), located approximately 13km east of Fort Knox.

Felix's primary objective is the discovery of a multi-million ounce gold deposit on its FGMD tenure that could be developed as a new standalone gold mine. The Company also recognises the significant value of discovering near surface gold mineralisation that could supply Fort Knox.

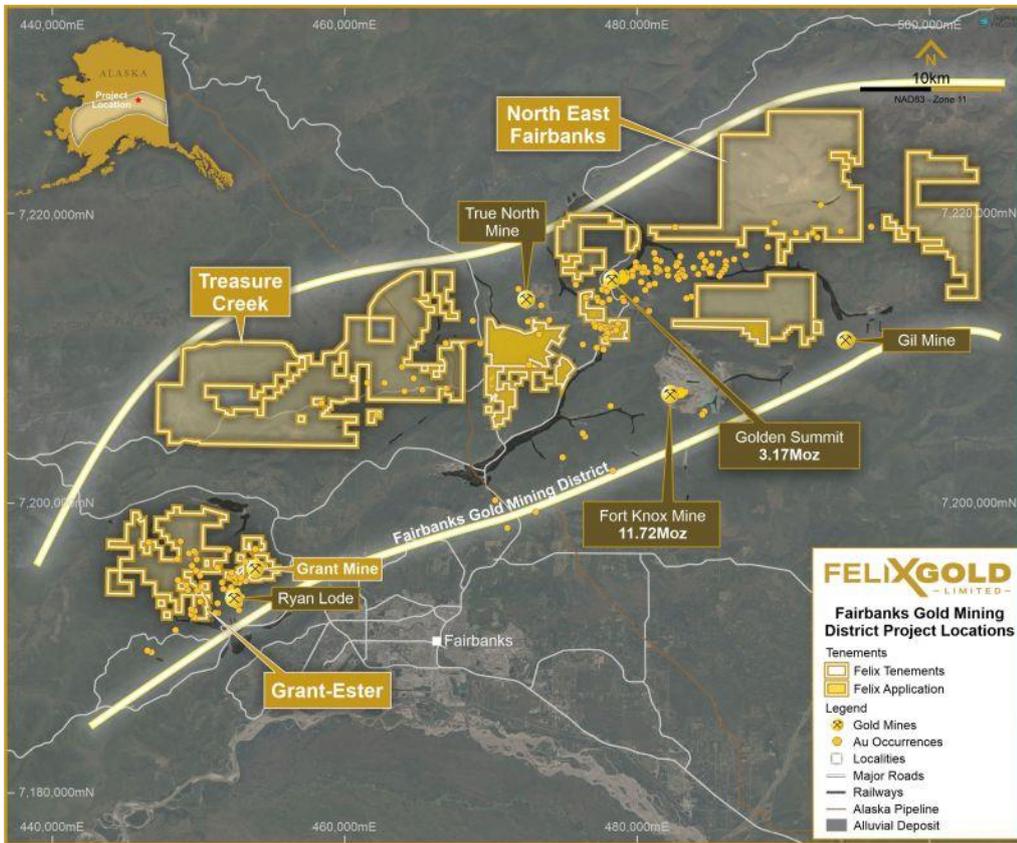

## Operations

### Exploration activities

RC drilling commenced at Treasure Creek in late April, located only 20km north of major mining and logistics hub, Fairbanks City. Approximately 70 holes for 7,715m were completed to the end of June.

The maiden program is focused on several prospect areas. Drilling continues at Treasure Creek and is then planned to move to NE Fairbanks and the newly acquired MHT tenure during Q3 2022. Key initial target zones coincide with areas delivering strong evidence of potential large-scale gold systems including extensive gold soil anomalism, coincident geophysical anomalies and significant previous drill intercepts.

**Figure 1: Felix Fairbanks Gold Mining District Project Locations (including MHT ground located centrally, shaded in darker yellow and labelled “Felix Application”)**

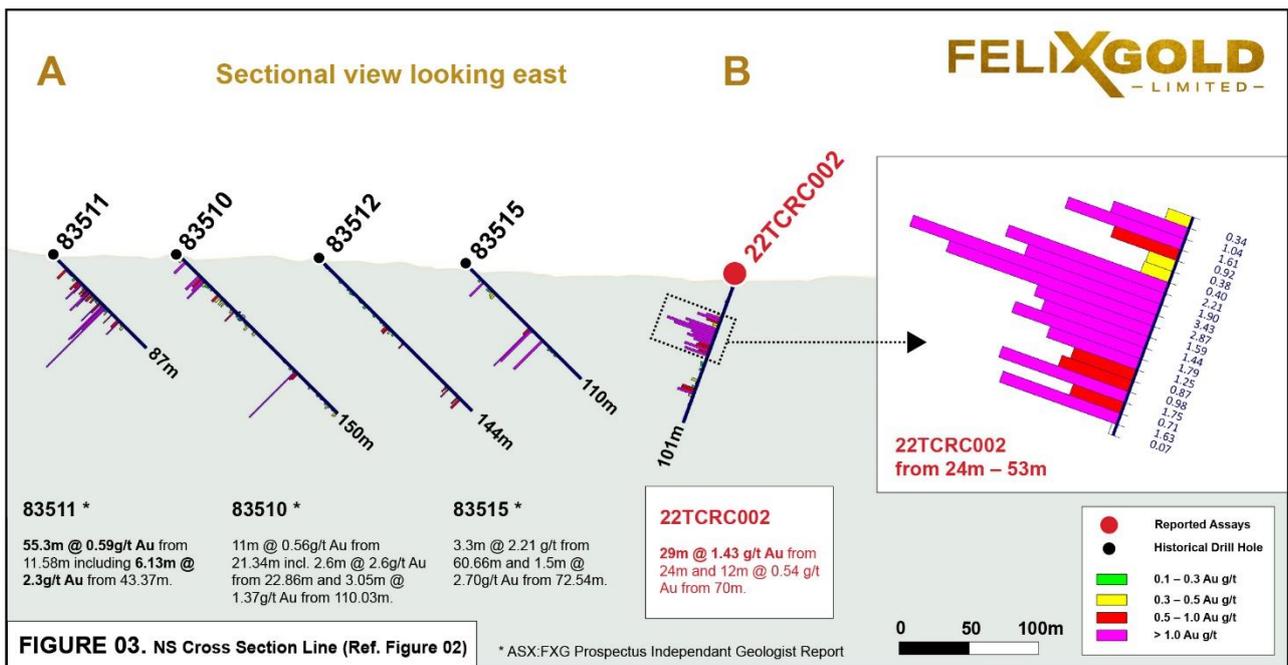

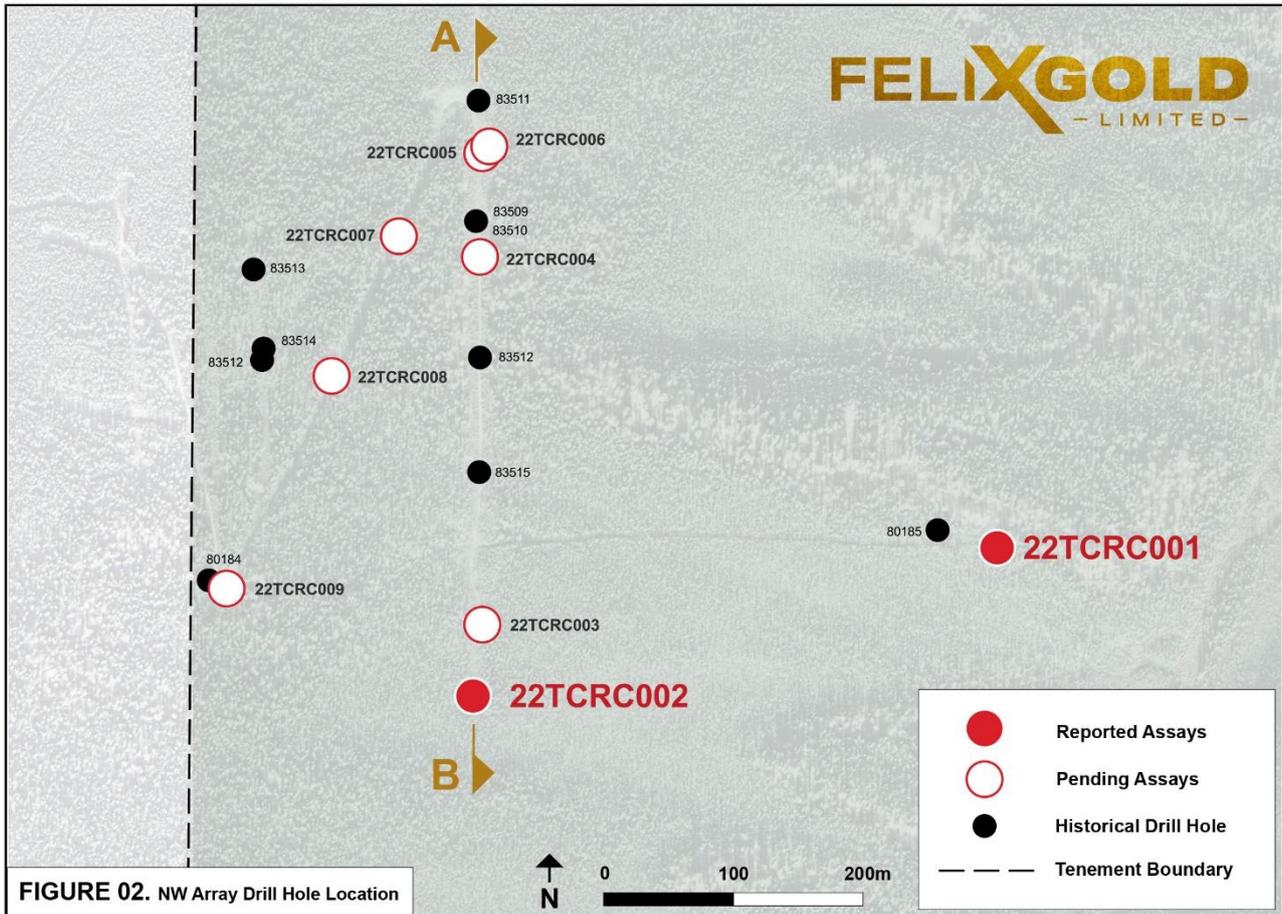

The initial drilling at Treasure Creek is focussed on shallow Reverse Circulation (RC) drilling to test multi-kilometre, high-grade (+100 ppb Au) gold soil geochemical anomalies with historical intercepts that remain untested at depth and open in multiple directions. Select deeper holes (up to 200m vertical depth) are also planned to follow up prospects containing historical drill intercepts with coincident geophysics and gold soil anomalies.

Felix plans to drill approximately 10,000 - 15,000 metres across its FGMD tenure through 2022. With only approximately 150m of assays received to date, Felix expects to have extensive drilling news flow through the remainder of 2022.

Assay results have been returned for the first two holes of the program, representing the first 146 metres of drilling (one full hole and one partial hole; see Felix ASX release dated 22 June 2022 for full details). The following mineralised intercepts were returned (using a cut-off of 0.1 g/t Au over a minimum continuous mineralised zone of 3.0m downhole):

- **Hole 22TCRC002:** 29.0m @ 1.43 g/t Au from 24m downhole  
and 12.0m @ 0.54 g/t Au from 70m downhole.
- **Hole 22TCRC001:** 3.1m @ 0.16 g/t Au from 7.6m downhole  
and 3.1m @ 0.20 g/t Au from 22.8m downhole.

Drillhole 22TCRC002 represents a significant step-out discovery, being located over 200m south of the previous southern-most drillhole at NW Array (see Figure 2). It is a shallow zone of gold mineralisation that is open to the south, east and west, and planned for rapid follow-up testing (see Figure 3).

## Further tenure acquisition

The Company also continued its aggressive consolidation strategy of the FGMD during the quarter, with the successful acquisition of the MHT tenure shown in Figure 1. The MHT tenure is located directly between Felix's Treasure Creek and NE Fairbanks claim positions. It is within 400 metres of Kinross Gold's (TSX: KGC) Fort Knox Gold Mine process plant and approximately 200 metres from Freegold Ventures' (TSX: FVL) key Dolphin deposit within its emerging Golden Summit Project.

There are five key historic prospects contained within the MHT tenure, as reported through the Alaska Resource Data File. It also contains multiple previous mine workings and evidence of extensive historical placer mining activities.

**About Felix**

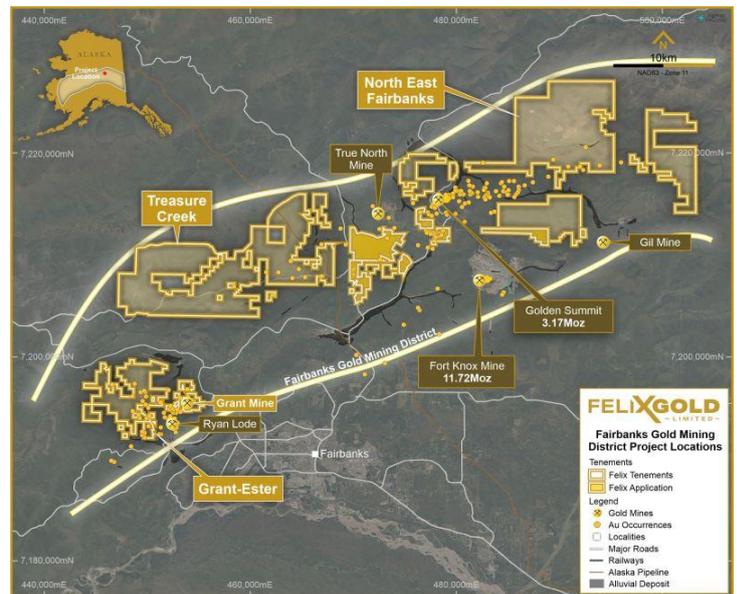

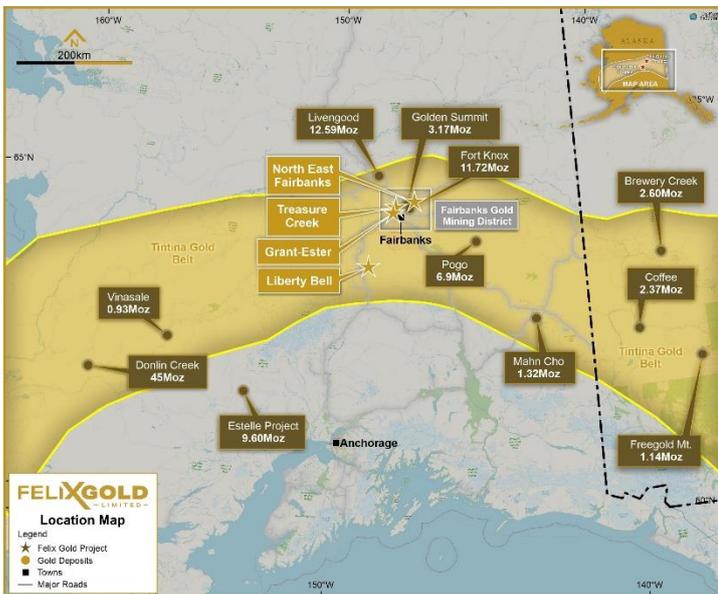

Felix Gold Limited (ASX: FXG) is an ASX-listed gold discovery business operating in the highly endowed Tintina Gold Province of Alaska in the United States.

Our flagship asset is a substantial landholding in the world-class Fairbanks Gold District, where historical gold production exceeds 16 Moz. In Fairbanks, our tenements sit within one of the largest gold production centres in the entire Tintina belt and lie in close proximity to both Kinross Gold’s Tier 1 gold mine, Fort Knox, and the rapidly growing Freegold Ventures’ discovery, Golden Summit. We hold four key projects across over 392 km<sup>2</sup> of tenure in the heart of this premier gold production district.

Felix’s key projects are located only 20 minutes from our operational base in the central mining services hub of Fairbanks City, Alaska. This base is a huge advantage for Felix with its existing infrastructure, low-cost power, skilled workforce and long history of gold production. It allows us to explore year-round and delivers genuine potential development pathways for our assets.

Our key projects are located along the main Fairbanks gold trend and contain dozens of identified prospects, extensive alluvial gold production, large gold-in-soil anomalies and historical drill intercepts which remain wide open and mimic other major deposits in the district. We have multiple walk-up drill targets with evidence of large-scale gold potential. We also possess an existing Mineral Resource at Grant-Ester with significant upside opportunity.

**Felix’s value proposition is simple: we are striving to be the premier gold exploration business in the Tintina Province through the aggressive pursuit and realisation of Tier 1 gold discoveries.**
