

ASX RELEASE.

28 August 2020

Extended Residual Claims for Aeris Active now approved in Australia

Key Points

- Aeris Active granted additional Australian Register of Therapeutic Goods (ARTG) product claims in Australia, further demonstrating technical leadership and product differentiation.
- ARTG 'on-label' claims now include 'Residual COVID-19 kill for up to seven days' and 'Residual antibacterial for up to 30 days (or 200 touches) against gram-negative E. coli and gram-positive S. aureus'.
- Validation studies were conducted at accredited NATA laboratory, Eurofins AMS, that are well known and accepted by Australian, Asian and American authorities.

Aeris Environmental Ltd is pleased to announce that it has now been granted extended residual protection claims in Australia. These claims are the result of extensive independent scientific testing, validating that Aeris Active provides demonstrated efficacy and proven ability to kill COVID-19 for up to seven days on surfaces, together with an approved residual antibacterial efficacy for up to 30 days (or 200 touches) against the test organisms of gram-negative E. coli and gram-positive S. aureus'.

Aeris believes it has now established the new 'gold standard' in environmental hygiene, with products that are effective in a single-step application, that have been tested in Option B 'dirty conditions' and meeting the hospital grade disinfectant standards.

Importantly, Aeris Active offers **validated** residual protection on surfaces and is not only effective in killing COVID-19 (in one minute), but also offers residual protection of the surface, 'actively' killing COVID-19 for up to seven days and offering residual antibacterial protection for up to 30 days (or 200 touches) against gram-negative E. coli and gram-positive S. aureus".

Peter Bush, CEO:

"I am proud that Aeris is able to offer its proprietary dual-active technology, supported with outstanding 'on-label' claims consistent with an approval set that we are developing internationally. This recognition confirms the 'real world' performance of our products, and I am pleased that this Australian developed, manufactured and patented technology is being recognised globally for its unique position of 'clean-green-protect'.

It is imperative that during this global pandemic products gain the trust of the consumer and deliver on the promise of proven performance."

Mr Maurie Stang
Chairman

Mr Peter Bush
Chief Executive Officer

This announcement was authorised by the Board of Directors.

About Aeris Environmental Ltd

Aeris develops, manufactures and markets proprietary, environmentally-friendly technology that drives measurable improvements in asset performance and sustainability. Aeris' whole-of-system approach ensures that systems perform better, are safer, last longer and cost less to run.

Aeris' products solve real world problems more effectively than conventional toxic chemicals. Uniquely based on validated, green formulations, Aeris' enzymes and treatments with residual protection provide long-term remediation and prevention of mould, bacteria growth and corrosion, and improved hygiene.

AerisVIEW, Aeris' cloud-based visualisation network, is uniquely scalable across all climate-controlled environments, including buildings of all sizes and vehicles. Aeris' solution delivers dramatic and proven energy savings, alongside documented benefits to system efficiency, and independently-validated indoor air quality, with proven immediate improvements in sustainability and cash flow savings.
