ASX ANNOUNCEMENT
23 April 2020

Quarterly Cashflow Report

Bionomics Limited (ASX: BNO, OTCQB: BNOEF), a global, clinical stage biopharmaceutical company, today released its Appendix 4C - Quarterly Cashflow Report. During the quarter:

- the Company completed the sale of its two wholly owned subsidiaries, Neurofit SAS (“Neurofit”) and PC SAS (“Prestwick Chemical”), to Domain Therapeutics (“Domain”). The sale price of €1,790,028.97 was the final amount of intercompany debt owed by Bionomics to the subsidiaries for the scientific research conducted by them on Bionomics’ drug candidates and was assumed by Domain at close.
- Cash balance at 31 March 2020 was \$4.65 million (31 December 2019: \$9.39 million) with net operating cash outflow during the quarter ended 31 March 2020 of \$2.060 million.
- Cash receipts for the quarter ending 31 March 2020 mainly related to receipts from customers totalling \$0.997 million (31 December 2020: \$1.55 million).
- Research & development expenditure decreased to \$0.70 million from \$1.45 million compared with the previous quarter, that is, a decrease of 38%. Details of the research & development activities are summarised in the **Activity Report** below.

Upcoming Milestones:

- The Company is examining its funding sources with an announcement expected not later than Q3 CY2020.
- CEO recruitment is now expected to be completed by Q4 CY2020.
- The Directors will take a reduction of 25% in Directors fees for Q2 CY2020 given the impact of COVID-19 and the current economic uncertainty.
- Bionomics is progressing optimisation of its BNC210 tablets for use in its proposed second Phase 2 Post-Traumatic Stress Disorder (PTSD) trial by conducting testing in an animal study; completion projected in Q2 CY2020.
- Whilst the internal focus and current R&D spend is restricted to CNS programs, Bionomics continues limited activities to maximize the value of its legacy oncology programs BNC101 and BNC105 through external funding of clinical development and divestment/out-licensing.

Activity Report

Bionomics is progressing its lead CNS drug candidate, BNC210, towards a Phase 2 clinical trial in PTSD. During Q1 CY2020 the key activities focussed on developing a new solid dose formulation of BNC210 to improve its exposure in clinical trial subjects.

To achieve this, a contract was signed with Patheon (Oregon, US) at the end of Q4 CY2019 to optimise a tablet formulation of BNC210 and manufacture small batches for evaluation in an animal

pharmacokinetic (PK) study. During Q1 CY2020, the team successfully developed tablet formulations using spray dried dispersion technology and produced *in vitro* characterisation and stability data supporting a promising formulation. At the end of Q1 CY2020, four spray dried dispersion formulations were manufactured into tablets and shipped to Covance (New Jersey, US) for evaluation in a dog PK study. The aim of this study is to compare the PK parameters of these tablets in order to select the best tablet formulation to take into a human multiple dosing PK study projected for Q4 CY2020. PK data from the dog study are anticipated in late Q2 CY2020.

Bionomics is also supporting two Investigator-initiated clinical trials of its oncology drug candidate, BNC105, by providing drug for the trials. Both trials continued to recruit patients during Q1 CY2020. One of these trials, sponsored by the Australasian Gastro-Intestinal Trials Group, completed its recruitment towards the end of Q1 CY2020.

On 3 March 2020 Bionomics completed the sale of its two wholly owned subsidiaries, Neurofit SAS and PC SAS, to Domain Therapeutics ("Domain"). The sale price of €1,790,028.97 was the final amount of intercompany debt owed by Bionomics to the subsidiaries for the scientific research conducted by them on Bionomics drug candidates and was assumed by Domain at close.

For the purpose of Listing Rule 4.7C.3, Directors were paid \$135,000 during the quarter.

Factors Affecting Future Performance

This announcement contains "forward-looking" statements within the meaning of the United States' Private Securities Litigation Reform Act of 1995. Any statements contained in this announcement that relate to prospective events or developments, including, without limitation, statements made regarding Bionomics' drug candidates (including BNC210, BNC101 and BNC105), its licensing agreements with Merck & Co. and any milestone or royalty payments thereunder, drug discovery programs, ongoing and future clinical trials, and timing of the receipt of clinical data for our drug candidates are deemed to be forward-looking statements. Words such as "believes," "anticipates," "plans," "expects," "projects," "forecasts," "will" and similar expressions are intended to identify forward-looking statements. There are a number of important factors that could cause actual results or events to differ materially from those indicated by these forward-looking statements, including unexpected safety or efficacy data, unexpected side effects observed in clinical trials, risks related to our available funds or existing funding arrangements, our failure to introduce new drug candidates or platform technologies or obtain regulatory approvals in a timely manner or at all, regulatory changes, inability to protect our intellectual property, risks related to our international operations, our inability to integrate acquired businesses and technologies into our existing business and to our competitive advantage, as well as other factors. Results of studies performed on our drug candidates and competitors' drugs and drug candidates may vary from those reported when tested in different settings.
