

ASX Announcement

Tata Steel signs with Envirosuite

6 March 2019

Key Highlights

- Global steel supplier and manufacturer Tata Steel adopts the Envirosuite platform
- First win globally in the steel manufacturing sector
- First industrial manufacturing win in the European region
- Significant potential for further contracts in the sector

Envirosuite Limited (ASX: EVS) (the “Company”) is pleased to announce that Tata Steel has adopted the Envirosuite platform. The win is significant as it represents both the first steel manufacturing operation globally to subscribe to Envirosuite as well as the first industrial manufacturing win in the European region.

Envirosuite will be used at Tata Steel’s Port Talbot operation in West Glamorgan, Wales, UK to proactively manage and drive improvement in the air quality impacts of their operations. Through the platform the Tata Steel plant will be able to take action before air quality issues occur and respond rapidly and effectively while incidents are emerging. Envirosuite’s unique set of tools for air quality management will be configured to allow a wide variety of operational and environmental staff to better manage the relationship between Tata Steel’s operations and the air quality in the surrounding community.

In the short-term, approximately sixty existing real-time air quality sensors and three weather stations around the facility will feed data directly into the Envirosuite platform.

Envirosuite, Chief Executive Officer, Peter White said,

“The Envirosuite platform is extremely well-suited for steel manufacturers, and working with Tata Steel at this initial site is an excellent commercial entrance for us into this sector. We congratulate Tata Steel in taking a global leadership position in their sector to implement a proactive management approach to the air quality experienced in their neighbouring communities. We look forward to broadening our relationship with Tata Steel as well as other participants in the metals manufacturing sector.”

In accordance with ASX GN8 for LRs 3.1-3.1B, the Company further advises that the contract is on standard commercial pricing and conditions and that there is no other material information or conditions to be satisfied.

About Tata Steel

Tata Steel Limited is a multinational steel-making company headquartered in India, and a subsidiary of the Tata Group. It is one of the top steel producing companies globally with annual crude steel deliveries of 27.5 million tonnes (in FY17). Tata Steel has over 74,000 employees, spread across 5 continents with operations in 26 countries and a commercial presence in over 50 countries.

Tata Steel's Port Talbot operation is an integrated steel production plant in Port Talbot, West Glamorgan, Wales, capable of producing nearly 5 million tonnes of steel slab per annum, making it the larger of the two major steel plants in the UK and one of the largest in Europe. The plant employs over 4000 people.

About Envirosuite

Envirosuite Limited (ASX:EVS) is an environmental management technology company that has developed a leading Solution-as-Service offering which translates data into action in real-time.

Using proprietary algorithms built on more than 30 years of environmental consulting experience, Envirosuite's platform provides a range of environmental monitoring, management and investigative capabilities.

Envirosuite's platform is used worldwide by a range of clients in the mining, water and waste management, heavy industry, ports and agricultural industry sectors and as well by governments looking to regulate industry in accordance with community well-being.
