# Private Vehicle Ownership (USA)

---

- Going up
- Even in big cities
- Hate to share
- Do you want a commuting time of zero to and from work?  
Think about it carefully.

# What differentiates AP Eagers?

---

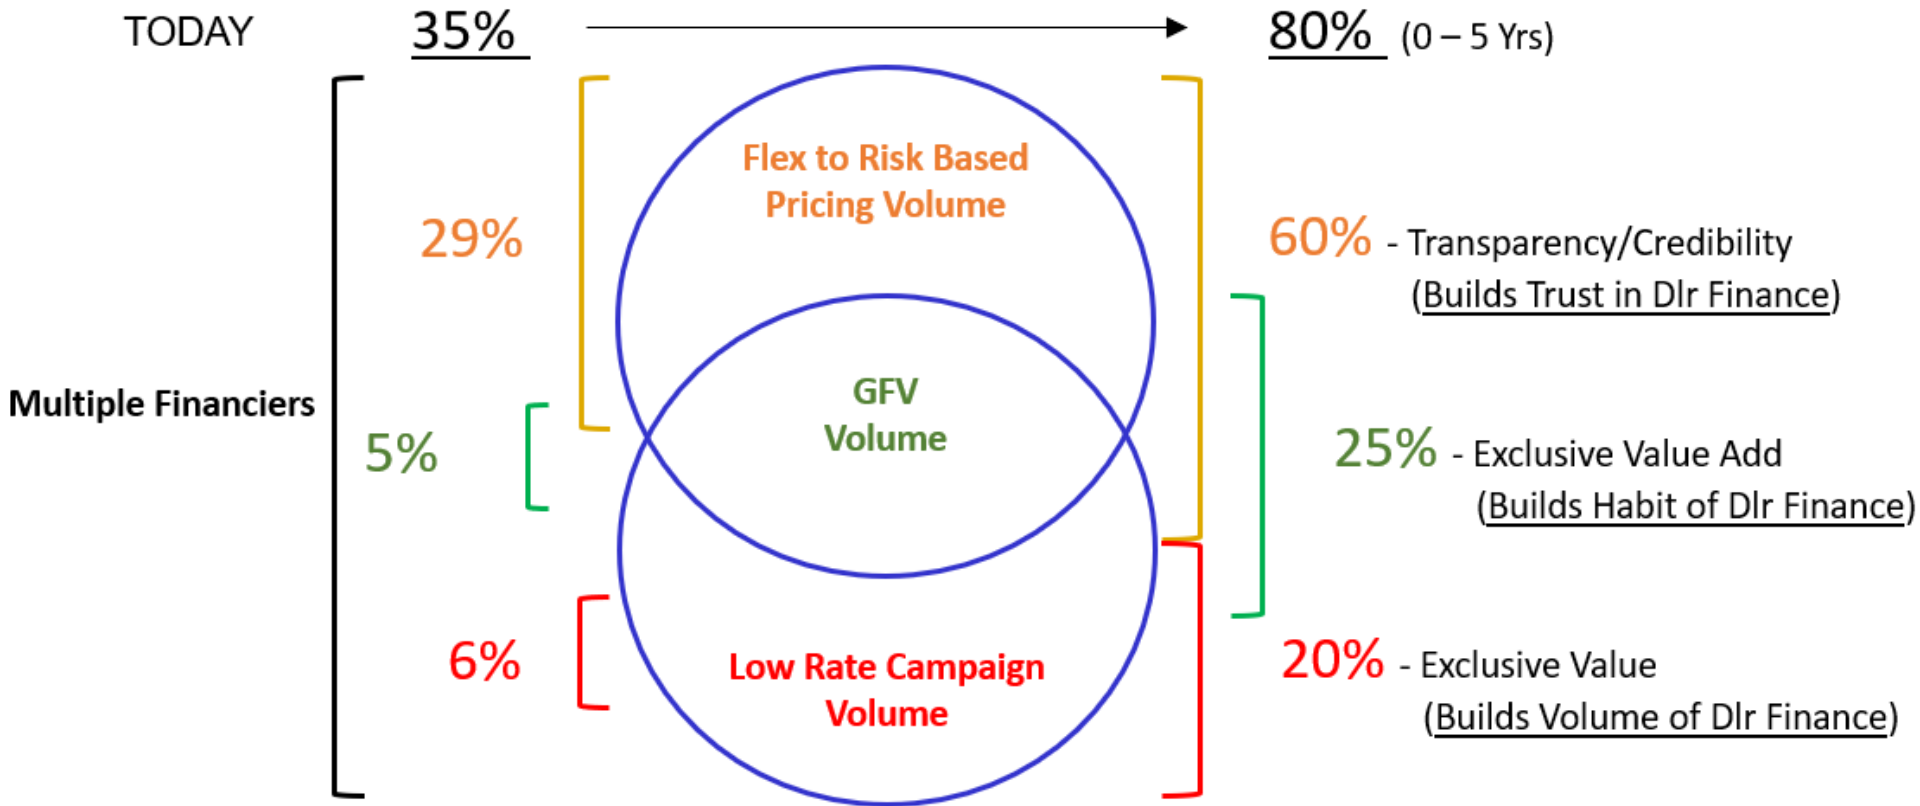

- AP Eagers Board
- Shareholder base
- Management stability – everywhere
- Partnership relationships with stakeholders
- Property flexibility

# Outlook (From August result briefing)

---

- Implement new Risk Based Pricing (RBP) finance models from our multiple financiers
- Through superior process, procedures and training excel in RBP penetration
- Complete portfolio adjustments related to underperforming operations
- Continue to redevelop and reorganise our inner City Brisbane facilities to provide long term solutions for all stakeholders. These include the airport, satellites and shopping centres

# Industry Flex Commission to Risk Based Pricing – Starting Nov 2018

# The Result – UK and USA

## Consumer car finance market up by 9% in May

6 July 2018

New figures released today by the Finance & Leasing Association (FLA) show that new business in the point of sale (POS) consumer new car finance market grew 15% by value and 10% by volume in May, compared with the same month in 2017.

The percentage of private new car sales financed by FLA members through the POS was 89.3% in the twelve months to May 2018, unchanged compared with the same period to April 2018.

The POS consumer used car finance market also reported new business growth in May 2018 of 12% by value and 9% by volume.

Geraldine Kilkelly, Head of Research and Chief Economist, said:

“The POS consumer car finance market reported new business volumes overall up by 4% in the first five months of 2018, consistent with expectations for the year as a whole.”

Table 1: Cars bought on finance by consumers through dealerships

# Flexible Land and Building Portfolio

- 39 Properties (QLD / NSW / VIC / SA) owned \$298m (35%)
- 174 Leased Properties nationwide approx. value \$549m (65%)
- Average lease expiry 3 years 6 months
- Blended (\*) 2.6 years average = great flexibility
- Automotive retailing will adapt over the coming decades to accommodate a greater proportion of electric vehicles and then eventually more autonomous vehicles
- Along with the industry product changes, the private and business consumer (guest) needs and expectations will continue to evolve
- AP Eagers is extremely well placed due to its flexible land and buildings portfolio both owned and leased, coupled with its experience in shopping centres, to adjust if automotive retailing requires a different physical presence in 2025 and beyond

\*based on 1 year of flexibility to sell owned property
