Site signs another PTTEP training agreement

The Directors of Site Group International Limited (“Site”, ASX: SIT) are pleased to announce the award by PTTEP (Thailand’s National Oil Company), for the delivery of SGI energy division’s 12 month Competence Based Junior Technician Development Programme. The programme will be delivered at our centre in Yangon, Myanmar where we jointly manage and operate with our in-country partner, Uniteam Training. PTTEP have enrolled 31 trainees for the programme, comprising, production and mechanical junior technicians, with an award value of approx. AUD\$1.8 million.

Vern Wills, Managing Director and Chief Executive Officer of Site said “This is an important award and further emphasises our approach to support major oil and gas companies, such as PTTEP, with their local and national workforce development programmes. This award is particularly pleasing as we have just successfully completed PTTEP’s group 4, comprising 44 junior technicians including production, instrument, electrical and mechanical and to roll into the development of the 5th group is a great indication of the trust and reliability we have developed with our client PTTEP.”

Phil Costelloe, Chief Executive Officer of SGI Energy, said “We are delighted to be supporting PTTEP with their competence development programme. Our Safe Live Process Plant (SLPP) comprising, real process equipment, systems, centralised control room and electrical motor control centre, continues to be the central platform for the success of the training, coaching and competence development programme. The trainees are able to demonstrate their newly acquired knowledge and skills in a real work place environment, working with the client’s operating and maintenance procedures including safety, emergency response, permit to work, risk assessment and safe isolations. This form of On the Job training and coaching allows the trainees to graduate from the programme with “Job Ready” status to join PTTEP’s on site workforce.”
