Recommendations

1. The Remedial Action Plan is CBA's response to the recommendations contained in the Final Report of the Australian Prudential Regulation Authority (APRA) Prudential Inquiry into CBA released May 2018. 2. Recommendations that are underway - some requiring legislative action to complete. 3. No action required as action is with Government/regulator or CBA does not operate in that business. 7

1. Long term wholesale funding (>12 months). 2. Indicative funding costs across major currencies. Represents the spread in BBSW equivalent terms on a swapped basis.

# Capital

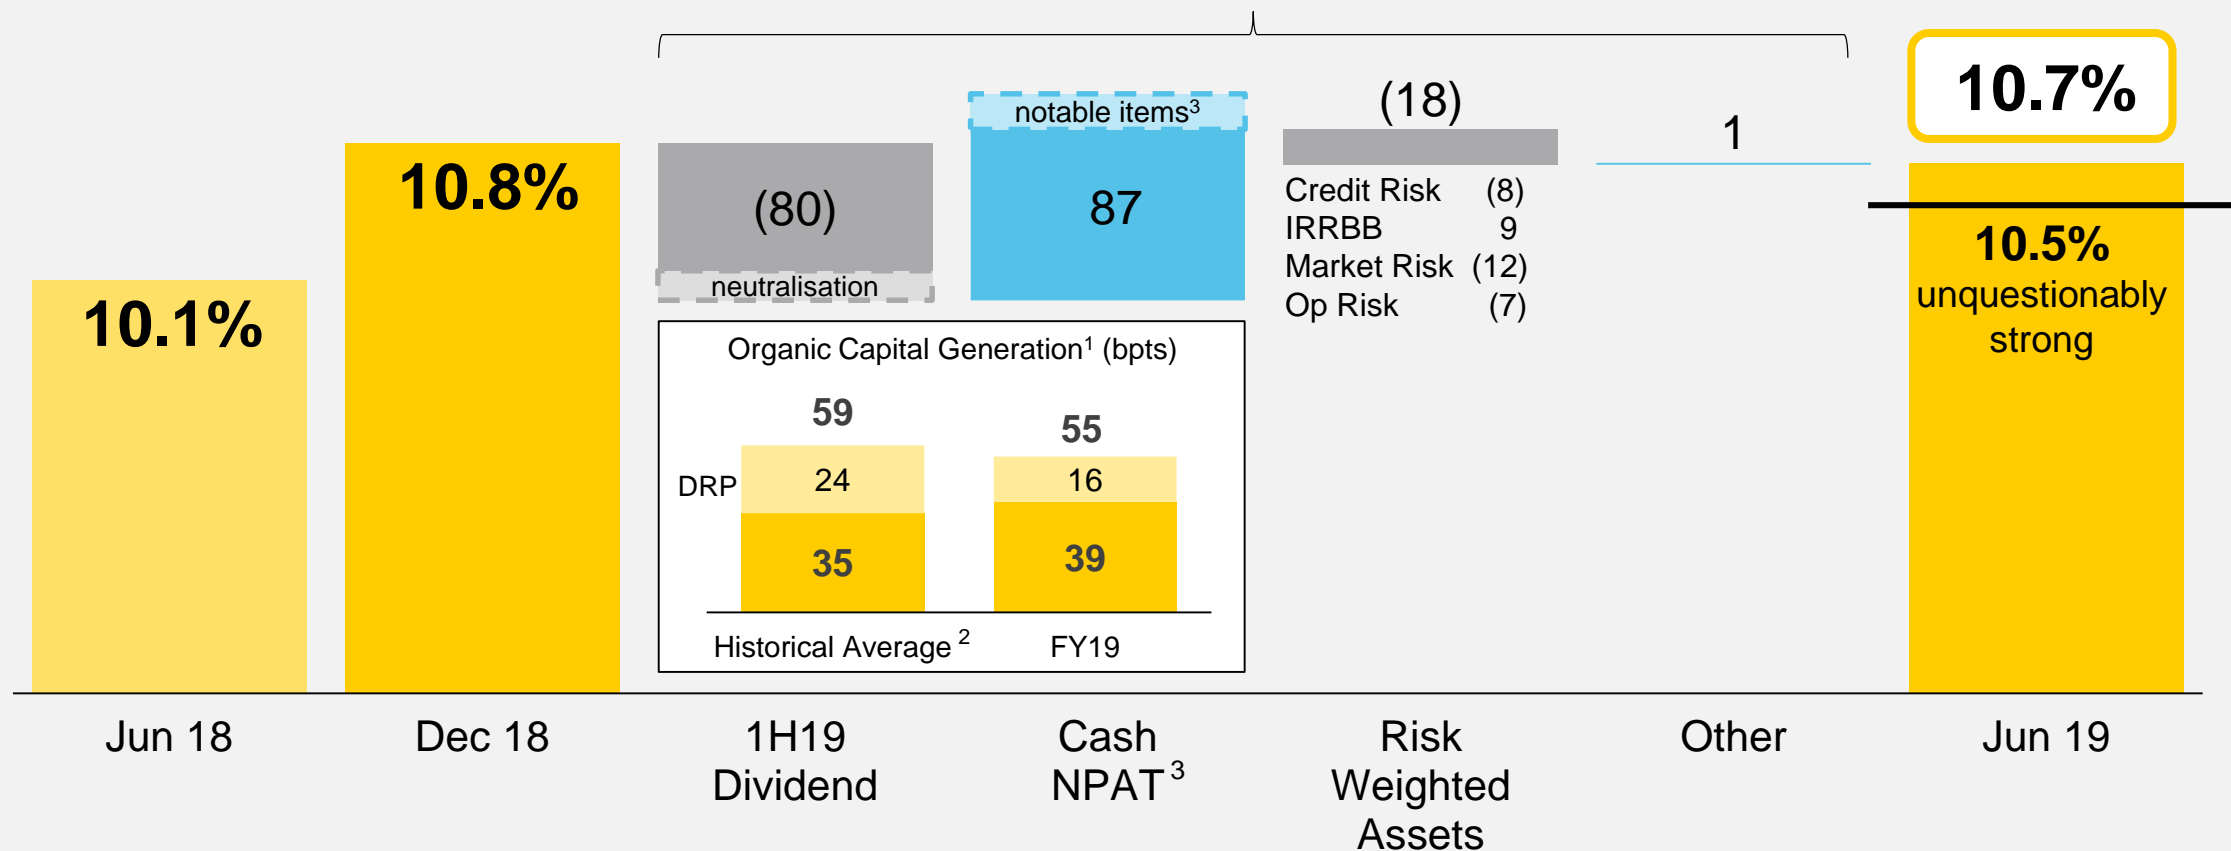

**Unquestionably strong – organic +55 bpts in FY19 (absorbing remediation/neutralisation)**

CET1, bpts

**-10bpts in 2H19**

(absorbing -18 bpts of notable items & -13 bpts interim dividend DRP neutralisation)

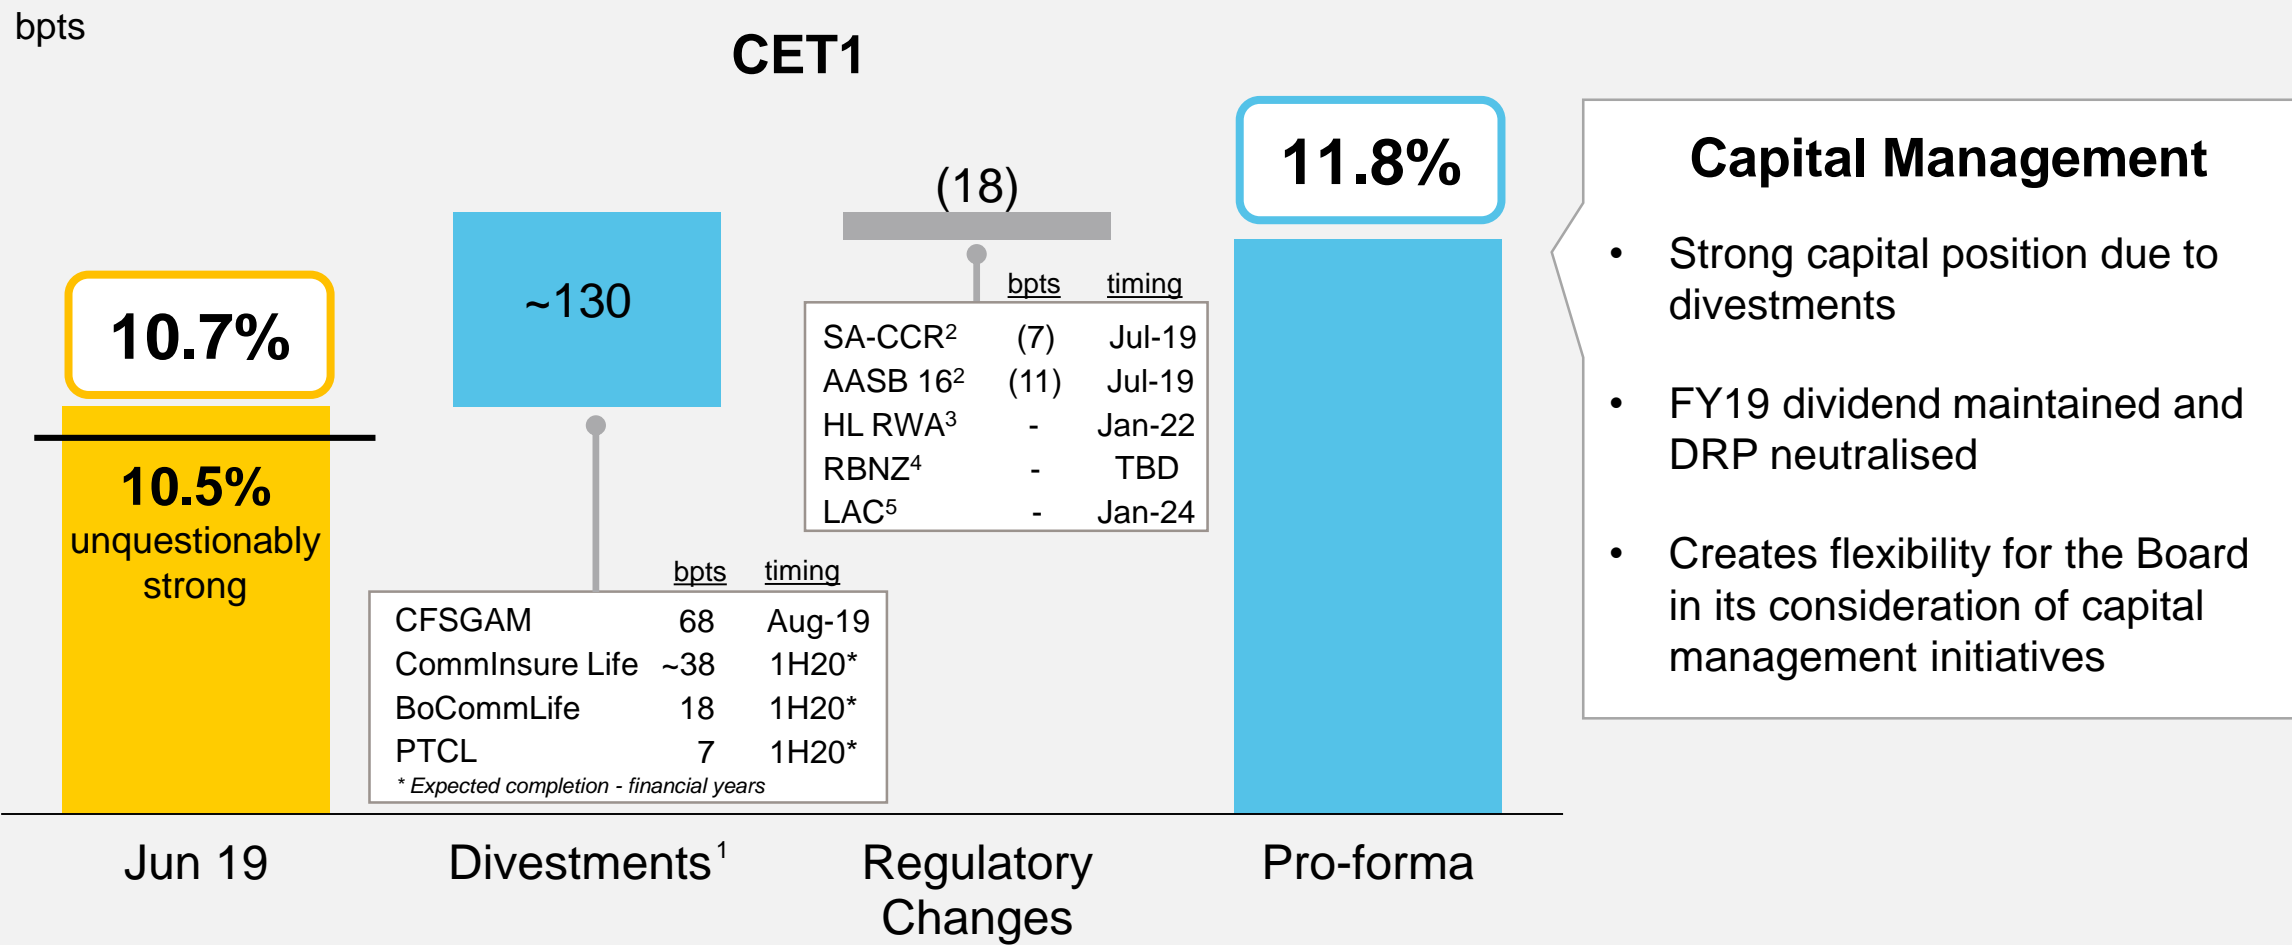

1. Organic capital generation is Cash NPAT less dividends (net of DRP) and underlying RWA (excluding major regulatory treatments). 2. Historical average since implementation of Basel III in 2013.

3. Cash NPAT includes -\$855m (pre-tax) in notable items, comprised of customer remediation costs (-\$639m), risk and compliance uplifts (-\$216m).

## Expect a significant capital surplus

1. Estimated CET1 increases from previously announced divestments. Divestments not yet completed are subject to regulatory approvals. The sale of BoCommLife is a condition precedent for the sale of CommInsure Life. 2. APS 180: Standardised approach for measuring counterparty credit risk exposures (SA-CCR) and AASB 16: Leasing. 3. APRA proposal for a simpler method for calculating capital requirements for residential mortgages. Whilst proposed changes are expected to have a minimal impact on CET1, this remains subject to consultation and calibration. 4. RBNZ capital proposals subject to finalisation – not expected to change reported Level 2 CET1 and manageable at Level 1 CET1 (within APS222 capacity limits). 5. APRA requirement for an additional 3% in Total Capital by 1 January 2024 – expected to be largely satisfied by Tier 2 issuance.

# Economic outlook

- ▶ Lower growth environment
- ▶ Housing market improving
- ▶ Unemployment likely to remain low
- ▶ Pipeline of stimulus: tax cuts and infrastructure
- ▶ Support from population growth and commodity prices
- ▶ Household income growth is key

# Summary

- ▶ Sustainable outcomes in a challenging environment
- ▶ Strong foundations: franchise, digital, balance sheet
- ▶ Build deeper, more trusted relationships
- ▶ Simpler bank – lower risk and lower cost
- ▶ Drive strong capital generation
- ▶ Invest for the long term; return excess to shareholders

Regulatory response

# Responding to heightened regulatory requirements

## Engaging with greater frequency with our regulators across a range of matters

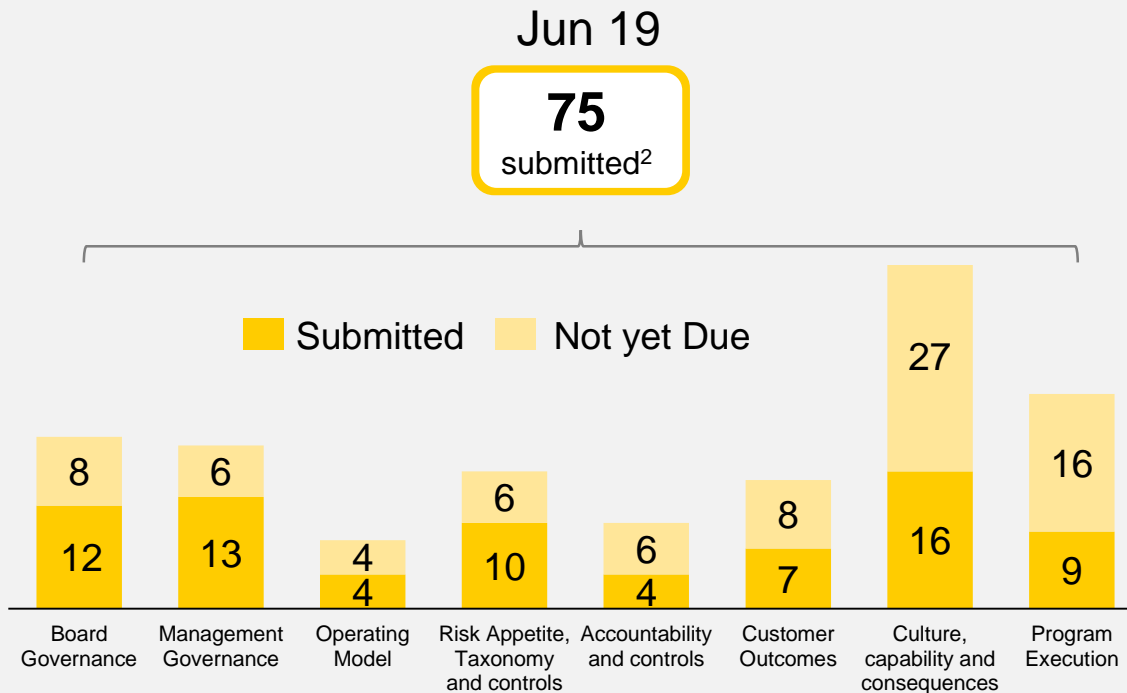

- **Royal Commission** – addressing recommendations and implementing the necessary changes
- **APRA** – delivering all 156 milestones of the Remedial Action Plan, with updates to APRA by the Independent reviewer every 3 months. Delivering on APRA requirements and recommendations as part of meeting their ongoing prudential supervision.
- **ASIC** – dealing with Enforceable Undertakings and addressing a number of matters in relation to the Group
- **Financial Crime** – continued strengthening of financial crime capabilities and responding to ongoing requests from domestic and offshore regulators
- **Risk uplift** – engaging with regulators on large improvement programs for data management and privacy
- **Remediation and Compliance programs** – promptly refunding customers and fixing business processes and systems
- **Banking Code of Practice** – ensuring compliance with the new code from 1 July 2019
- **New legislation** – ensuring we deliver on key government policies on comprehensive credit reporting and open banking
- **New regulatory obligations** – ensuring compliance with new requirements, including data security, large credit exposures and compliance with RBNZ BS11 requirements for our New Zealand subsidiary ASB
- **Class Actions** – managing ongoing shareholder and superannuation class actions
- **Employee matters** – working with applicable regulators / stakeholders to resolve identified discrepancies in employee arrangements and entitlements.

The Bank and its operations are subject to heightened regulatory scrutiny and requirements. Regulatory actions (including potential enforcement actions) or policy changes may negatively impact the Bank's financial position or standing. There are a range of matters where the outcome and any associated costs cannot be reliably estimated, therefore these matters would be treated as contingent liabilities. Further disclosure regarding the Group's contingent liabilities is provided in the 30 June 2019 year end Financial Statements.

# Regulatory engagement

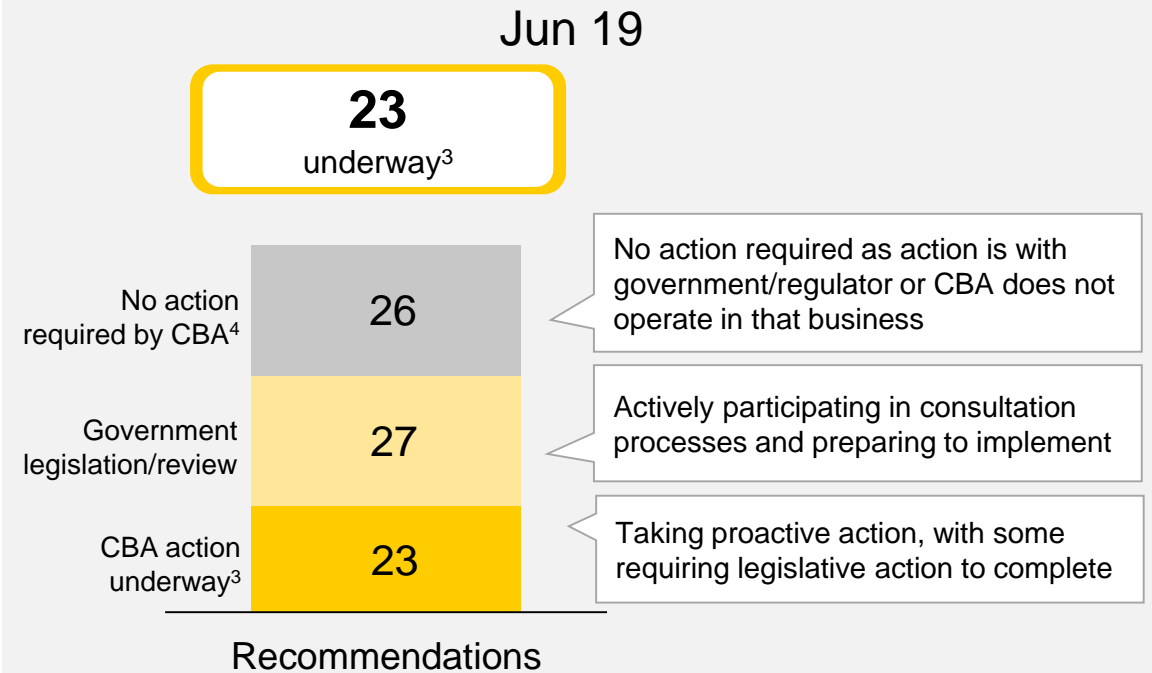

## Remedial Action Plan<sup>1</sup>

- ▶ 48% of milestones submitted<sup>2</sup>
- ▶ All milestones to be submitted by June 2021

## Royal Commission

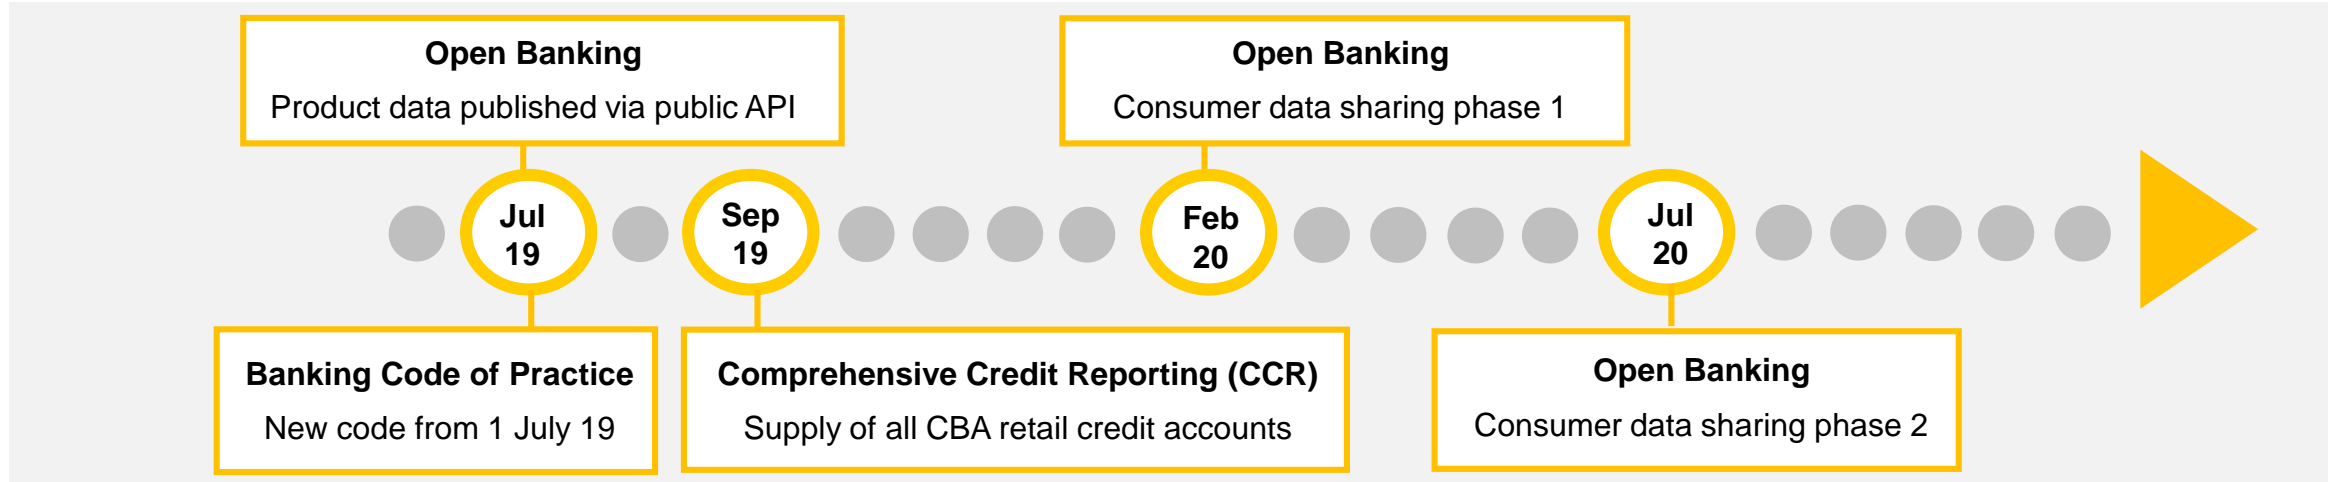

- ▶ CBA welcomed all recommendations
- ▶ Implementation Taskforce chaired by Deputy CEO

1. The Remedial Action Plan is CBA's response to the recommendations contained in the Final Report of the Australia Prudential Regulation Authority (APRA) Prudential Inquiry into CBA released in May 18. 2. To Independent Reviewer. 3. Recommendations that are underway - some requiring legislative action to complete. 4. No action required as action is with Government/ regulator or CBA does not operate in that business.

1. The Financial Stability Board's Task Force on Climate-related Financial Disclosures developed recommendations, released in June 2017, on financial disclosures to help investors better understand climate-related risks and opportunities to support more appropriate pricing of risks and allocation of capital globally. 2. Details on climate scenario analysis can be found on pages 55-63 in the 2019 Annual Report [www.commbank.com.au/annualreports](http://www.commbank.com.au/annualreports) 3. Reported exposure in the FY18 Annual Report (page 57) was \$7.3 billion. A review found this was overstated and the correct FY18 figure for low carbon project funding is \$4.6 billion.

# Energy value chain<sup>1</sup>

## Declining exposure to coal

1. All figures are Total Committed Exposures (TCE) as at 30 June 2019. Figures represented have been specifically derived based on material client exposures. Not included are 'Other energy-related' exposures (\$0.8bn) which comprise smaller loans and energy trading entities. 2. Thermal coal exposure within each diversified miner is calculated as the Group's exposure to the miner, excluding exposure to coal subsidiaries, multiplied by the percentage EBITA contribution of thermal coal in its latest annual financial statements. Exposure to coal subsidiaries of diversified miners are allocated to thermal coal.

1. Operating expenses to operating income. 2. The Group uses PACC as a key measure of risk adjusted profitability. It takes into account the profit achieved, the risk to capital that was taken to achieve it, and other adjustments. The decrease on the prior year includes the impact of increasing capital levels in order to meet APRA's "unquestionably strong" capital requirements by 1 January 2020 and the one-off impact of additional operational risk capital (and RWAs) from the Enforceable Undertaking with APRA.

## Increased provisioning for emerging risks

- AASB 9 adopted from 1 July 2018, increasing impairment provisions by \$1,058 million due to recognition of impairment losses on a forward looking basis.
- Collective Provisions include the impact of four probability-weighted economic scenarios<sup>1</sup> and adjustments for emerging risk at an industry, geography or segment level.
- Currently holding \$1.2 billion in impairment provisions over and above the Central (base case) economic scenario.
- Adequately provisioned for a Downside economic scenario.

1. Central, Upside, Downside and Severe Downside. Central: Considers the Group's base case assumptions. Upside and Downside: Reflect the lowest/highest impairment losses over an approximate 10 year cycle. Severe Downside: Extremely adverse conditions. 2. Assuming 100% weighting and holding all other assumptions including forward looking adjustments constant.

# Home lending – system overview

**The recent modest slowdown in housing credit growth is expected to extend into calendar year 2020**

# Home lending - CBA<sup>1</sup>

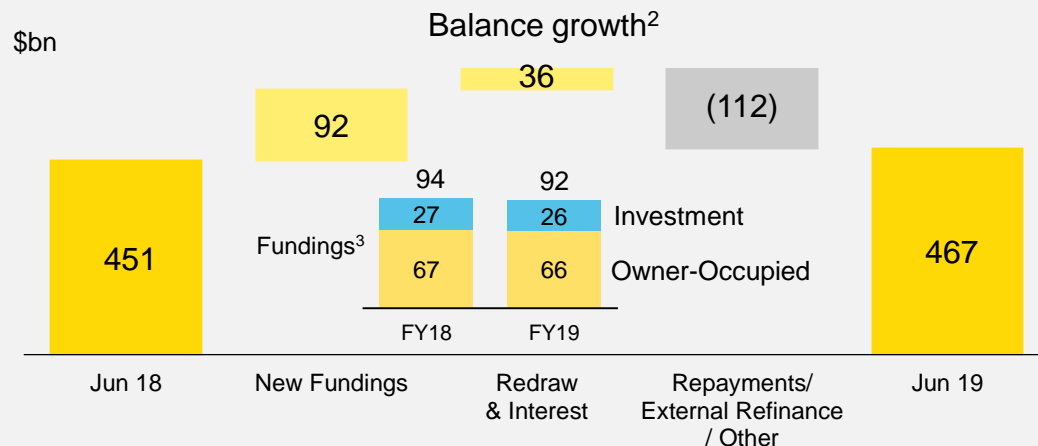

## CBA adopted regulatory changes early and avoided riskier segments at the peak of the market

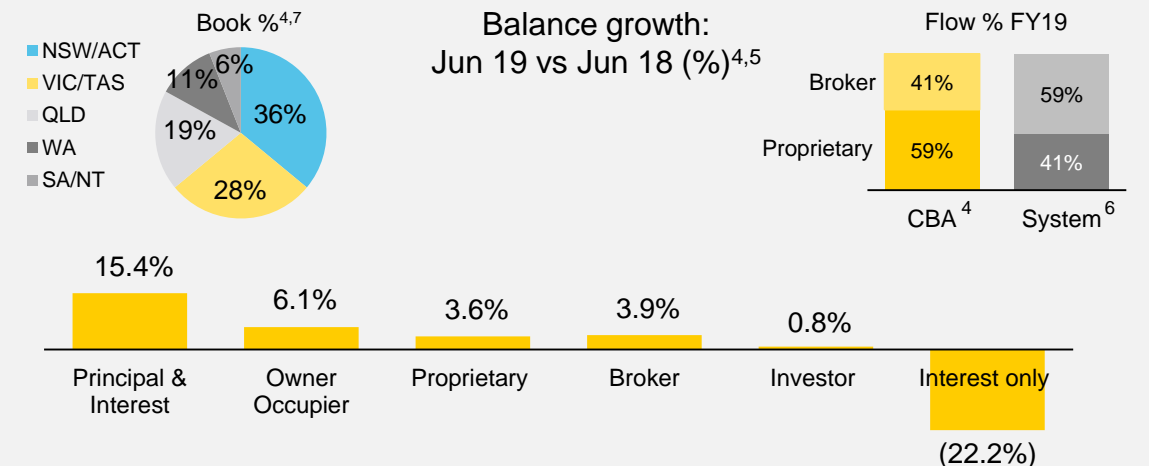

## Whilst some market share was ceded as a result, more recent growth has been at or above system

## FY19 funding levels were modestly lower than FY18, reflecting the market slowdown

## The Bank's focus remains on the core markets of owner-occupied and proprietary lending

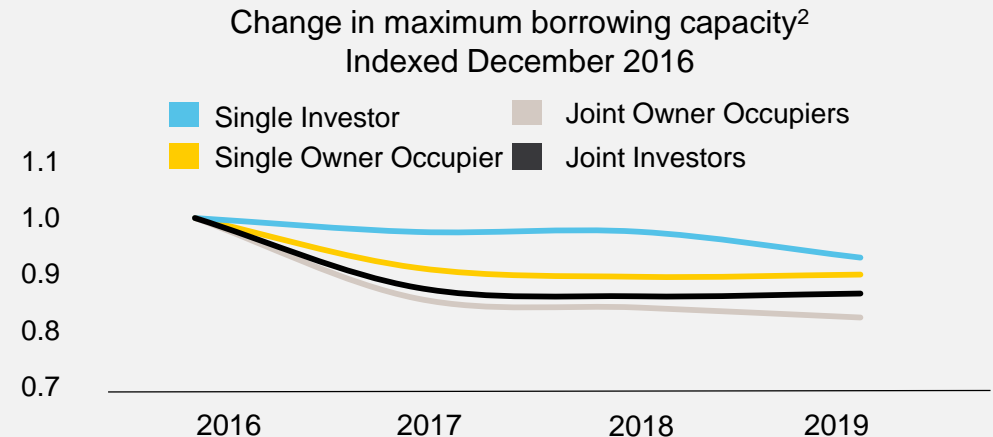

# Borrowing capacity relatively stable<sup>1</sup>

## A number of strengthened servicing policies and practices have been implemented since June 2015

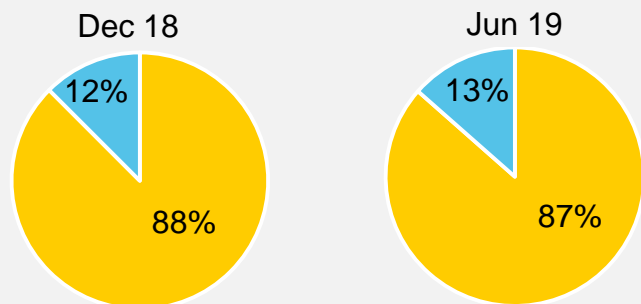

- ☐ Increased serviceability buffers on income and debt in line with regulatory guidance
- ☐ Income and household-scaled living expense models used in serviceability test
- ☐ Limits on lending in high risk areas, non-residents
- ☐ LVR limits on interest only and investment lending
- ☐ Removed Low Doc loans from sale
- ☐ Introduced limits on high Debt-to-Income ratios
- ☐ Serviceability assessments prior to in-life IO switching
- ☐ Data-driven liability verification tools, including Comprehensive Credit Reporting

## Despite tightening, maximum borrowing capacity has remained relatively stable over the last 12-18 months

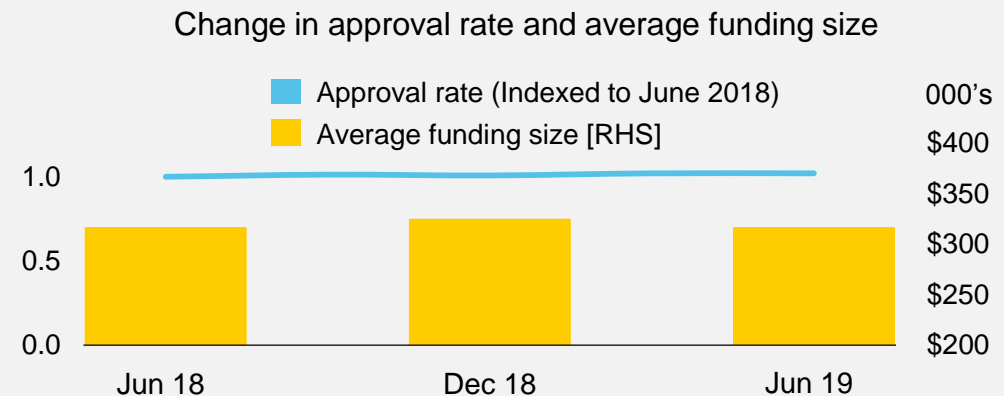

## Few borrowers are currently utilising their full borrowing capacity<sup>3</sup>

- CBA applicants with additional capacity to borrow
- CBA applicants who borrowed at capacity

## ...with minimal change in average loan size and approval rates

1. CBA excluding Bankwest. 2. Scenarios based on differing assumptions with respect to family types, number of dependents, loan size, income sources and existing liabilities/commitments.

3. Applications that have passed system serviceability test; borrowed at capacity reflects applicants with minimal net income surplus.

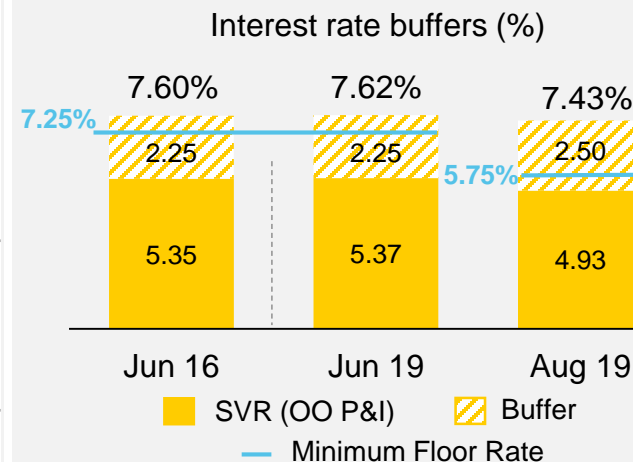

# Serviceability assessment<sup>1</sup>

## New loan applications are assessed based on a range of income and expenditure metrics

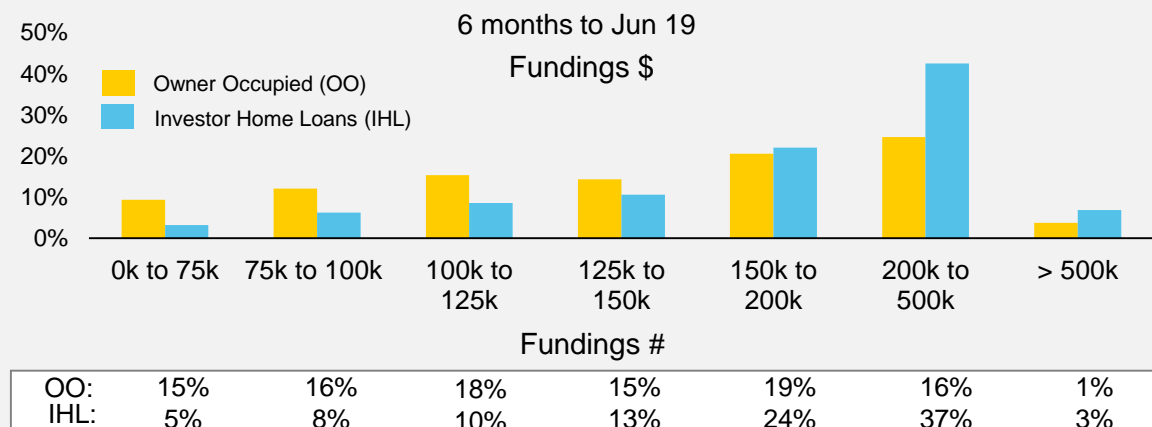

<b>Income</b>	<ul style="list-style-type: none"> <li>All income used in application to assess serviceability is verified</li> <li>80% or lower cap on less stable income sources (e.g rent, bonus)</li> <li>90% cap on tax free income, including Government benefits</li> <li>Limits on investor income allowances, e.g. RBS restrict rental yield to 4.8% and use of negative gearing where LVR&gt;90%</li> </ul>
<b>Living Expenses</b>	<ul style="list-style-type: none"> <li>Living expenses captured for all customers</li> <li>Servicing calculations use the higher of declared expenses or HEM adjusted by income and household size</li> <li>Continued focus on reducing HEM reliance</li> </ul>
<b>Interest Rates</b>	<ul style="list-style-type: none"> <li>Assess customer ability to pay based on the higher of the customer rate plus serviceability buffer<sup>2</sup> or minimum floor rate</li> <li>Interest Only (IO) loans assessed on principal and interest basis over the residual term of the loan</li> </ul>
<b>Existing Debt</b>	<ul style="list-style-type: none"> <li>CBA requires and reviews transaction statements to identify undisclosed debts</li> <li>Automatic review of CBA personal transaction account and Comprehensive Credit Reporting (CCR) data to identify undisclosed customer obligations</li> <li>All existing customer commitments are verified</li> <li>For repayments on existing mortgage debt: <ul style="list-style-type: none"> <li>CBA &amp; OFI repayments recalculated using the higher of the actual rate plus a buffer or min. floor over remaining loan term</li> <li>Credit cards calculated at an assessment rate of 3.82%</li> </ul> </li> </ul>

## An interest rate buffer is used in loan servicing tests

- Loans assessed based on the higher of the customer rate<sup>2</sup> + buffer, or minimum floor rate
- APRA advised that ADI's will set their own floor for use in serviceability assessments, effective 5 July 2019.
- CBA now applies a minimum floor rate of 5.75% and a buffer of 2.50%, effective 22 July 2019.

# Portfolio losses, insurance and stress testing<sup>1</sup>

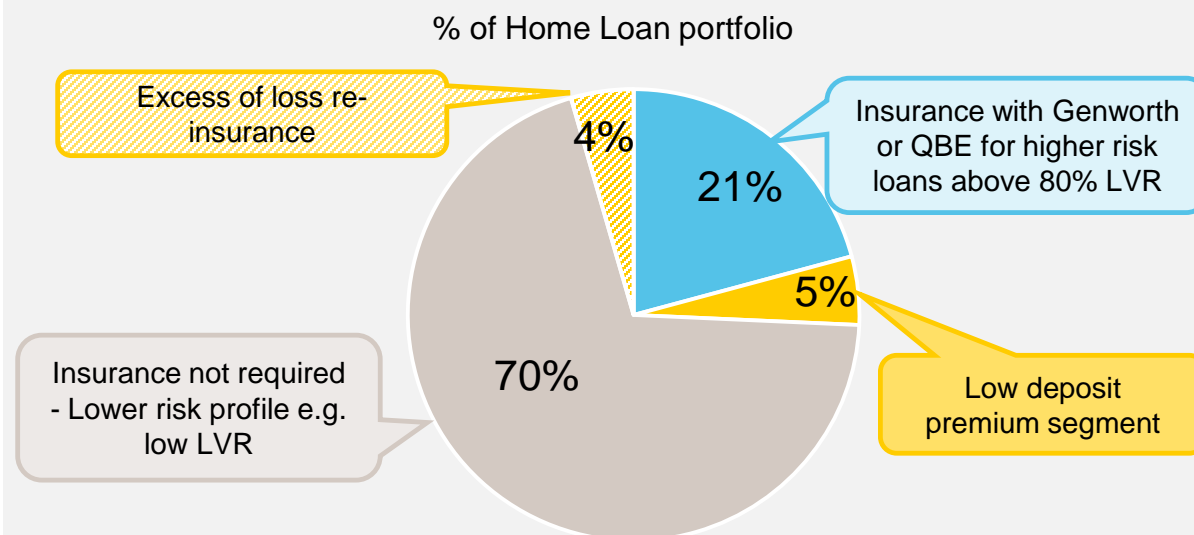

## Portfolio losses remain low - and manageable under a severe stress scenario

### Losses to average gross loans<sup>2</sup>

### Portfolio Insurance Profile<sup>3</sup>

### Stress testing

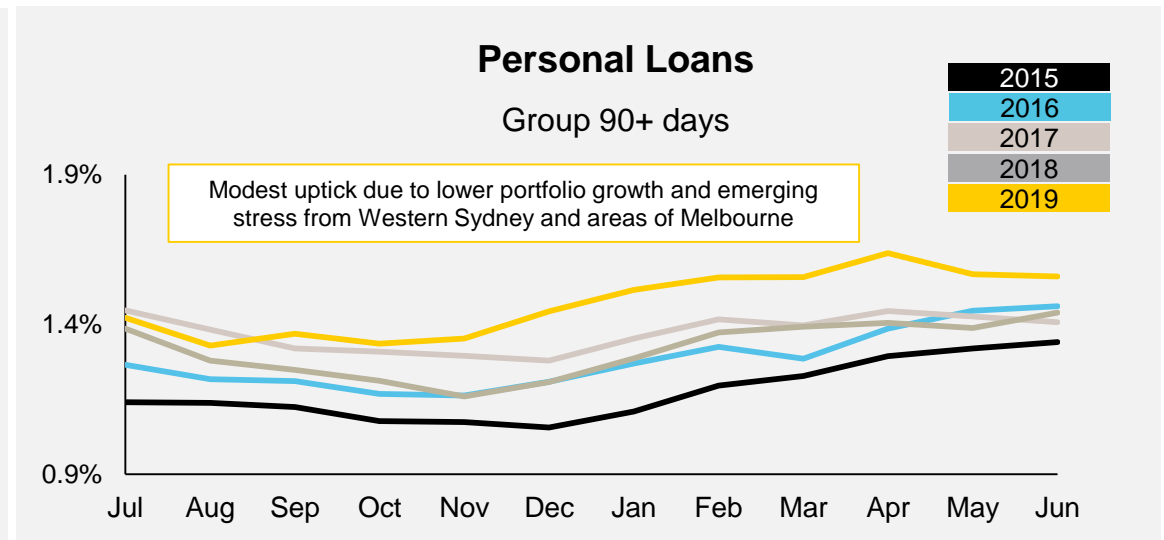

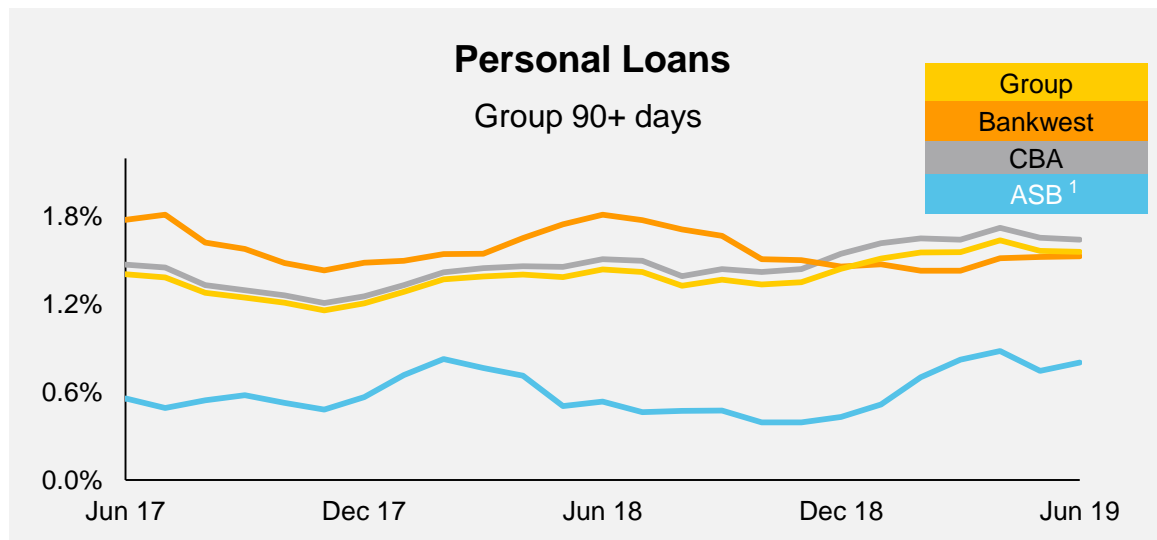

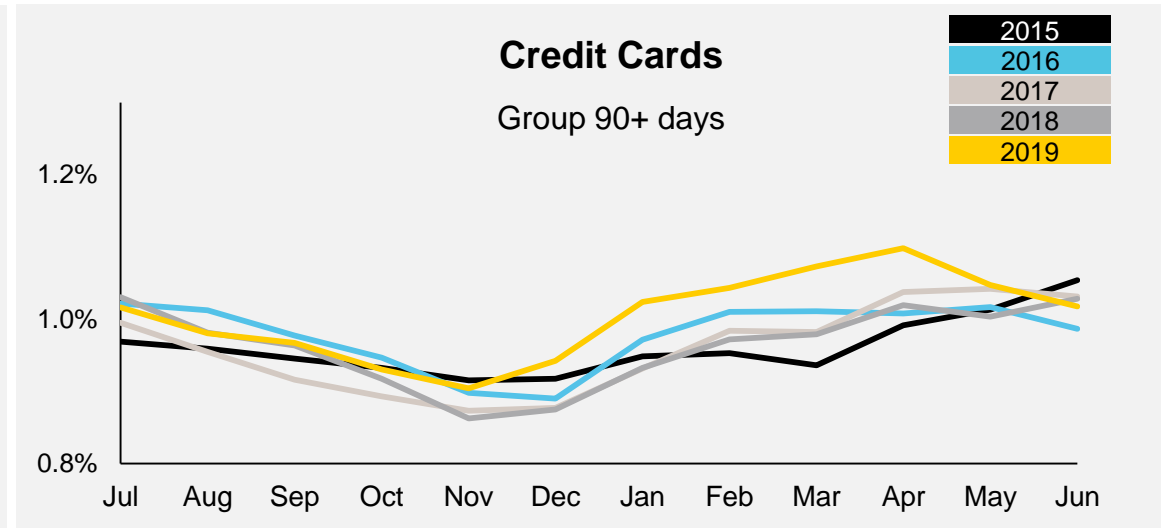

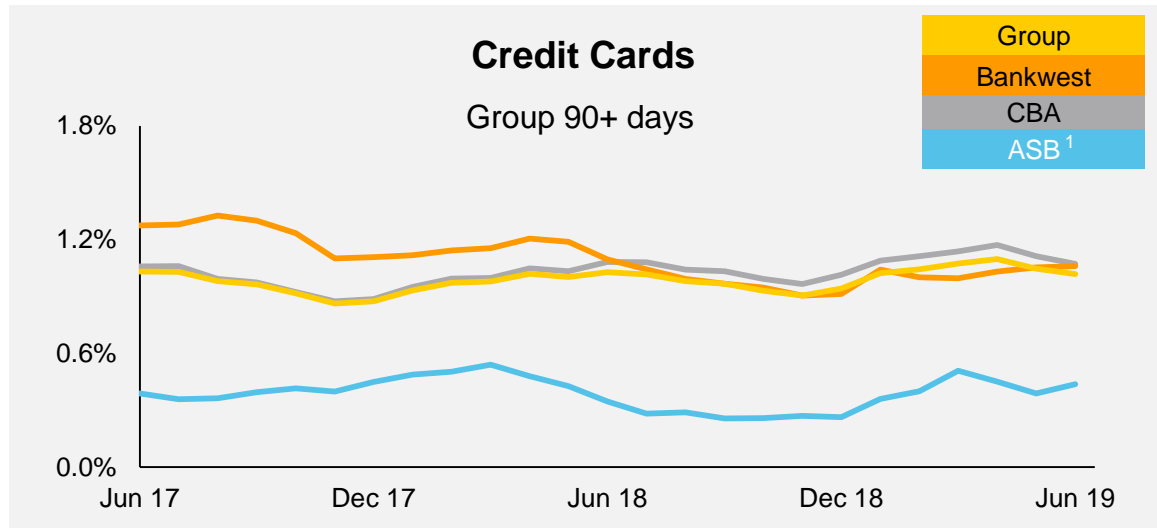

- A severe stress test scenario is modelled on an ongoing basis.
- Scenario includes stresses to house prices (31% decline), unemployment (11%), cash rates (reduced to 0.5%).
- Losses<sup>4</sup> are estimated over three years: Gross 3-year losses of \$4.09b, or \$3.17b net of insurance.

1. CBA including Bankwest. 2. Bankwest included from FY09. 3. Excludes Line of Credit, Reverse Mortgage, Commonwealth Portfolio Loan and Residential Mortgage Group. 4. Increase in gross stressed losses from last half reflects slow down in housing market. Net losses reflect stressed macroeconomic and LMI assumptions (50%). Results based on December 2018 data.

# Consumer arrears

## Personal Loan arrears moderating but remain elevated

1. ASB write-off Credit Card and Personal Loans typically around 90 days past due if no agreed repayment plan.

# Sectors of interest - Construction

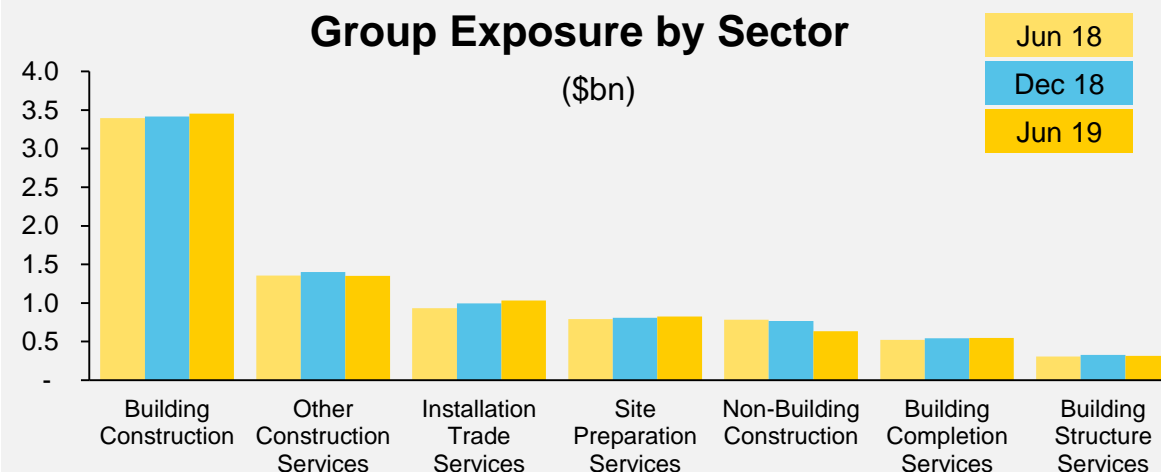

## Outlook remains cautious

- Exposures of \$8.2bn (0.8% of Group TCE) with no material changes to sector composition.
- Portfolio rated 18% investment grade and 41% of exposures secured.
- On-going higher risk is evidenced by elevated TIAs reflecting recent failures and challenging market conditions. Impaired portfolio is lower in the half following a large single name write off.
- Indirect risk is evident in other industry classifications not captured in Construction.
- Recent losses, while elevated, are consistent with the sector's disproportionate share of write offs over the longer term.
- Revised origination guides introduced and detailed portfolio monitoring continues.
- The credit outlook remains cautious despite a positive growth outlook largely from Government supported infrastructure projects.

### Group Exposure

### Group Exposure by Sector

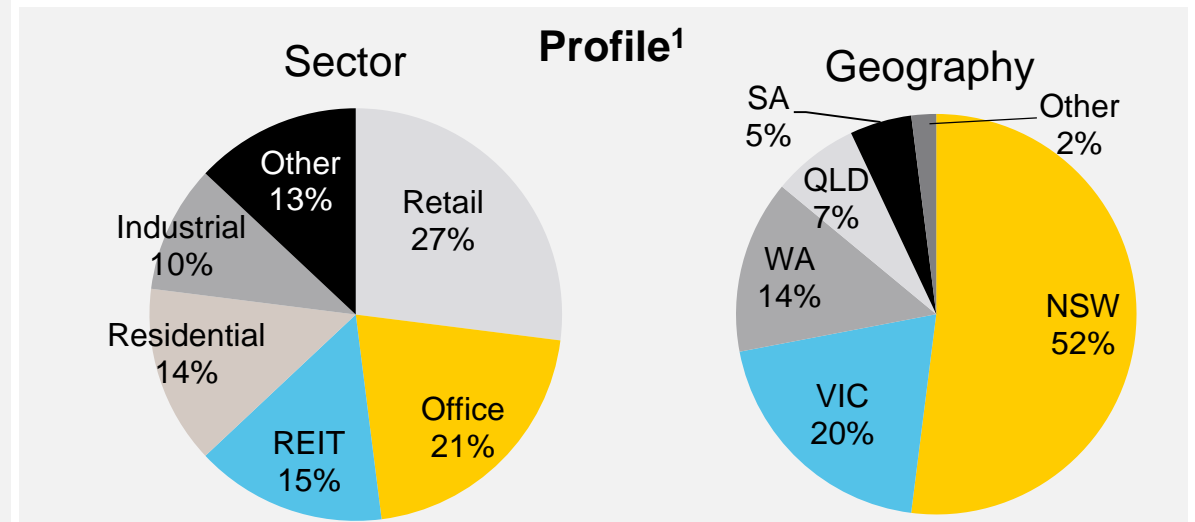

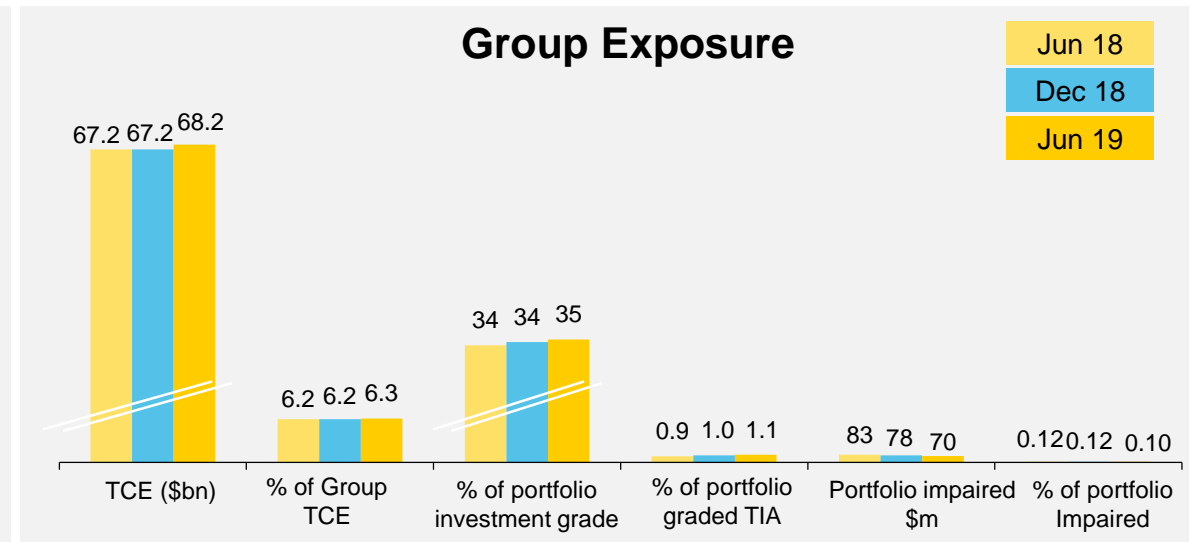

# Sectors of interest – Commercial Property

## Portfolio weighted to NSW – TIA low at 1.1%

- Increase in investment exposures driving moderate increase exposure for the half year (+1.4%).
- Diversified across sectors and by counterparty.
- Lower apartment development exposures.
- Top 20 counterparties primarily investment grade (weighted average rating of BBB equivalent) and account for 16.6% of Commercial Property exposure.
- 35% of the portfolio investment grade, majority of sub-investment grade exposures secured (91%).
- Impaired exposures remain low (0.10% of the portfolio).
- Geographical weighting remained steady this half.
- Ongoing comprehensive market, exposure monitoring of the portfolio.

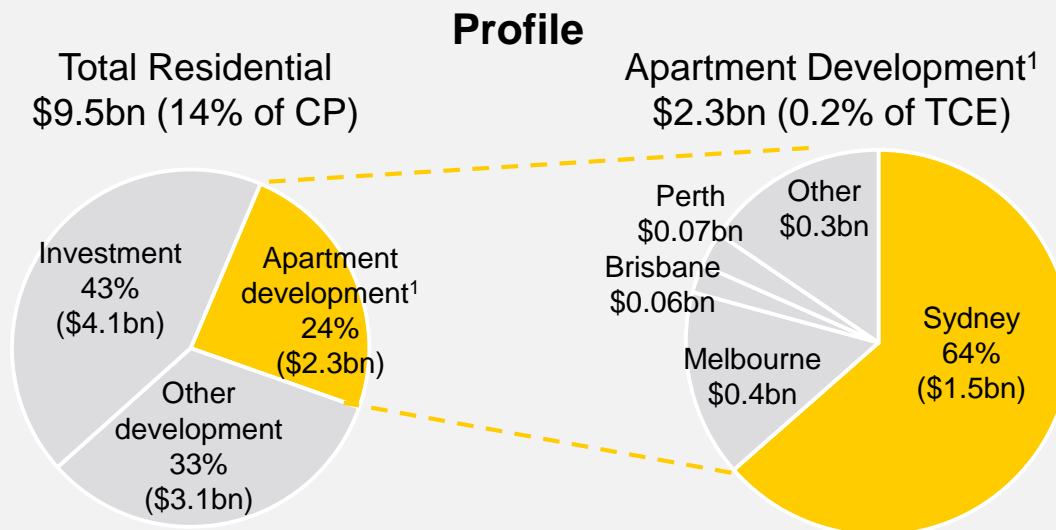

1. Sector profile is Group wide Commercial Property. Geographic profile is domestic Commercial Property.

# Sectors of interest – Residential Apartments

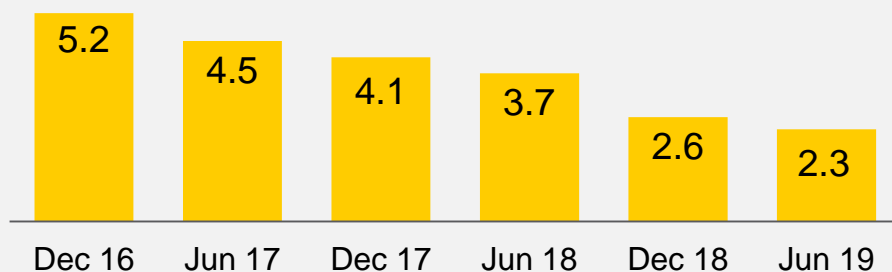

## Weighted to Sydney – portfolio dynamics broadly stable during the half year

- Apartment Development<sup>1</sup> exposure reduced by \$2.9bn (56%) since Dec 16.
- Facilities being repaid on time from pre-sale settlements.
- Weighting to Sydney - Sydney developments are diversified across the metropolitan area.
- Portfolio LVR and Qualifying Pre-sales (QPS)<sup>2</sup> broadly stable at 55.3% and 107.7% respectively.
- Ongoing comprehensive market, exposure and settlement monitoring on the portfolio.

# Sectors of interest – Agriculture

## Well diversified portfolio, weighted to NZ dairy

- Group agriculture exposure of \$22.5bn (2.1% of Group TCE) – diversified by geography, sector, client base.
- Australian agriculture portfolio is facing weak seasonal and drought conditions. The Australian dairy sector is encountering challenging conditions.
- NZ dairy sector outlook remains stable with market forecast for 2019/20 milk prices continuing to support recovery in the NZ dairy portfolio.

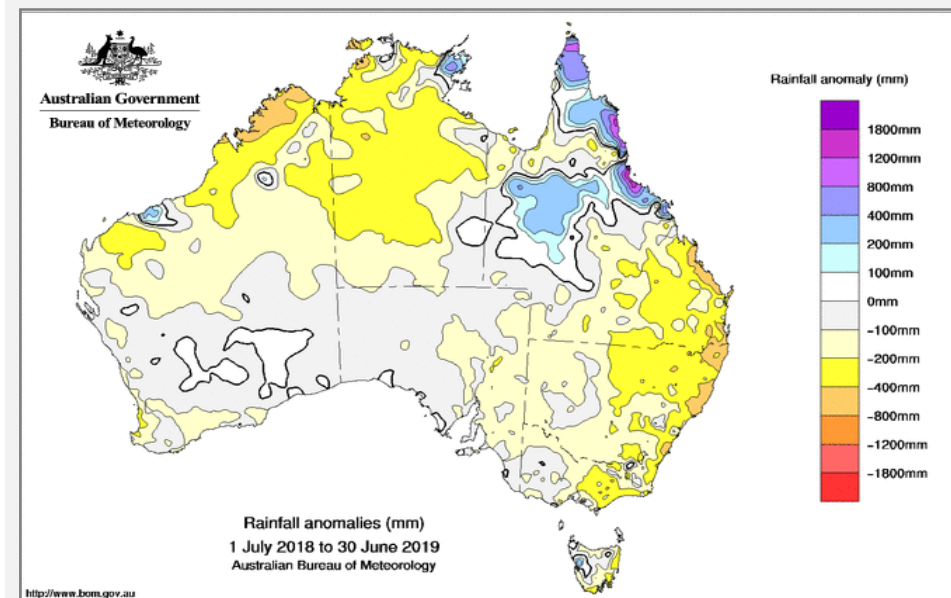

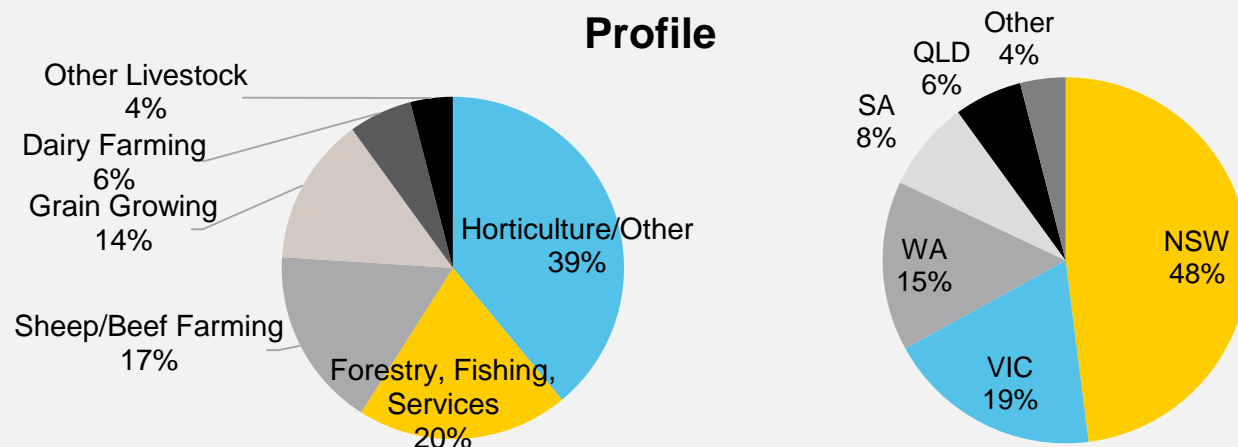

1. New Zealand dairy exposure (AUD) included in Group exposure.

# Sectors of interest – drought affected areas

## \$8 million raised to support farmers and communities in drought affected regions

- CBA enacted its emergency assistance package in June 2018 for drought impacted clients.
- Drought more pronounced in NSW and Victoria, with conditions drier than long term averages.
- Past droughts have not materially impacted the portfolio's performance due to diversification by geography, industry and exposure size.
- The impact on clients is being closely monitored, with the drought's severity expected to become more evident over the next 12 to 18 months. 2017 was a good crop year and commodity prices have been favourable, which assisted clients leading into the drought.

# Sectors of interest – Retail Trade

## Conditions remain challenging

- The retail trade sector remains weak, challenged by low wage growth, falling house prices, continued subdued consumer sentiment, and online disrupters.
- Retail trading conditions, particularly in the discretionary retail sectors, are expected to continue to be challenged by higher competition and downward pressure on prices and profitability, notwithstanding recent fiscal and monetary stimulus.
- Impairment increase due mainly to a single name exposure.

# APRA's LAC proposal

## 3% increase in Total Capital by 2024 to increase loss absorbing capacity (LAC)

- Additional 3% of RWA in Total Capital applicable to all domestically systemically important banks (D-SIBs) by 1 January 2024.
- This represents additional \$13.6bn of Total Capital requirement for CBA.
- Over the next four years, APRA will consider feasible alternative methods for raising additional 1-2% of RWA, in consultation with industry and other stakeholders.

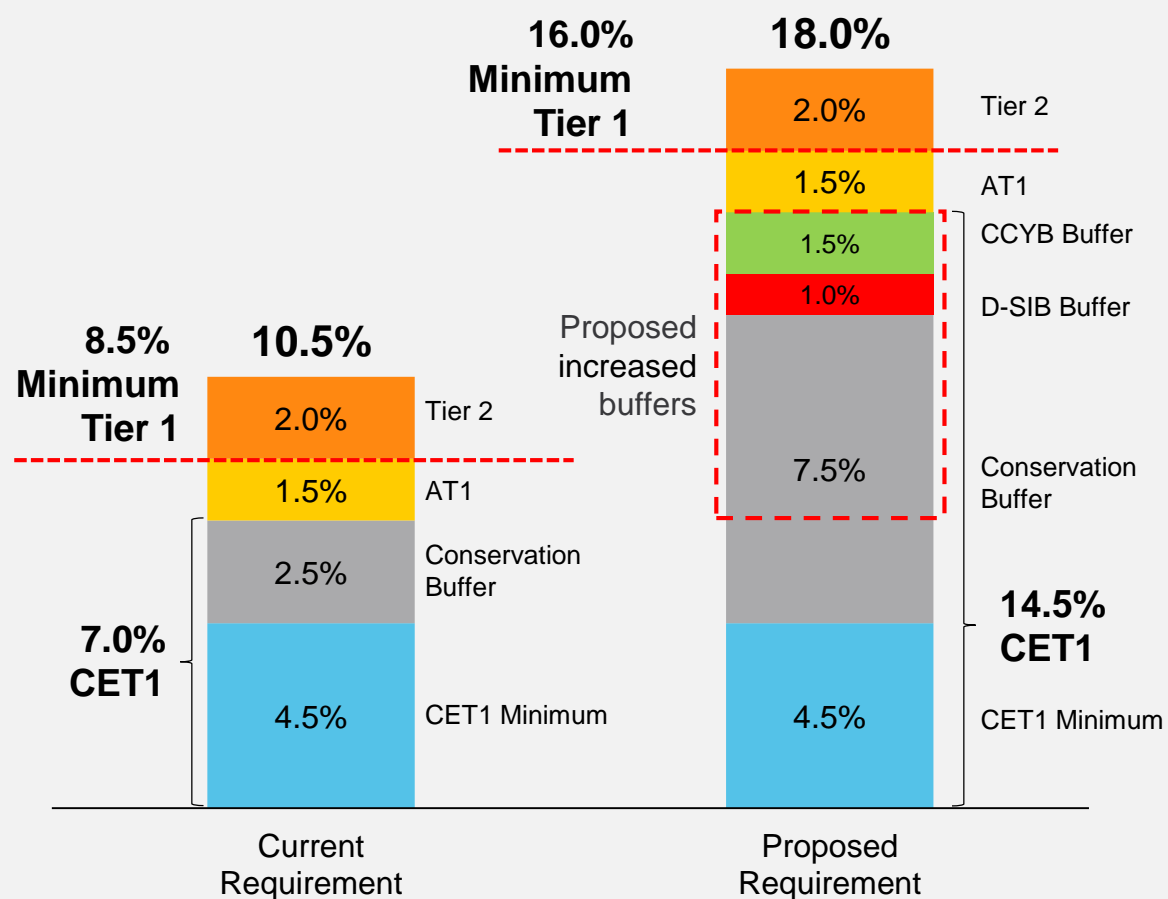

\$bn	Jun 19
Risk Weighted Assets	452.8
Additional Total Capital requirement @ 3%	13.6

# RBNZ capital proposal

## New Zealand Tier 1 minimum to increase to 16%

### RBNZ proposed capital requirement changes

- Potential capital increase in ASB of ~NZ\$3bn, assuming current balance sheet size and composition.
- RBNZ expected to finalise reforms towards the end of calendar year 2019.
- Implementation expected to commence from April 2020 with a transitional period of a number of years.
- Proposals not expected to change reported CBA Level 2 CET1 and manageable at Level 1 CET1.
- Sufficient capacity exists under both current and proposed APS222 (Association with Related Entities) limits to absorb the proposed additional capital requirement.

Education

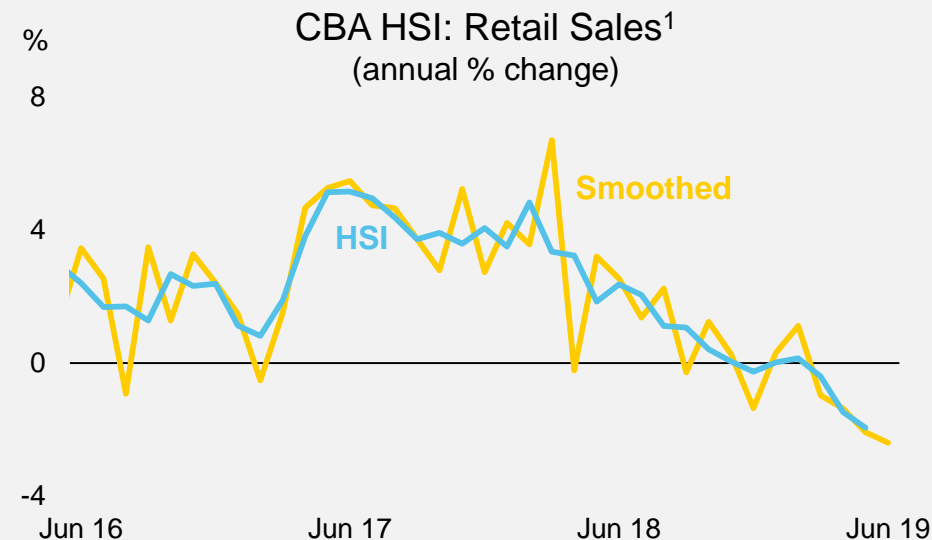

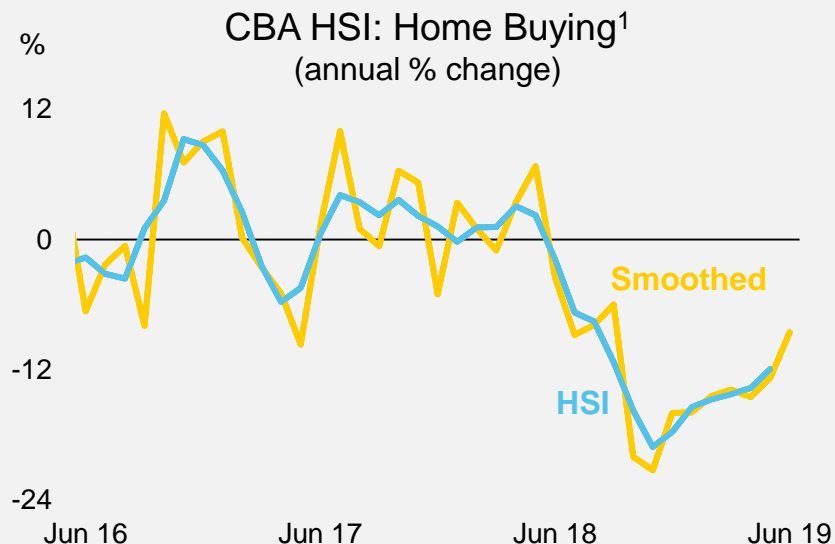

Health & Fitness

- ▶ Household Spending Intentions Series (HSIS) – combines actual CBA transactional data and publically available Google Trends search data.
- ▶ Combined, these two data sets provide unique insights and a new perspective on the Australian economy.
- ▶ Results to be published monthly for 7 different categories of the economy: Home buying, Retail, Travel, Health & Fitness, Entertainment, Education and Motor Vehicles.
- ▶ The July 2019 launch showed some improvement in Home buying and Health & Fitness.
- ▶ Travel, Entertainment and Education are tracking sideways, while Retail and Motor Vehicle sales remain weak.

# Household Spending Intentions Series

## Home buying intentions and retail sales

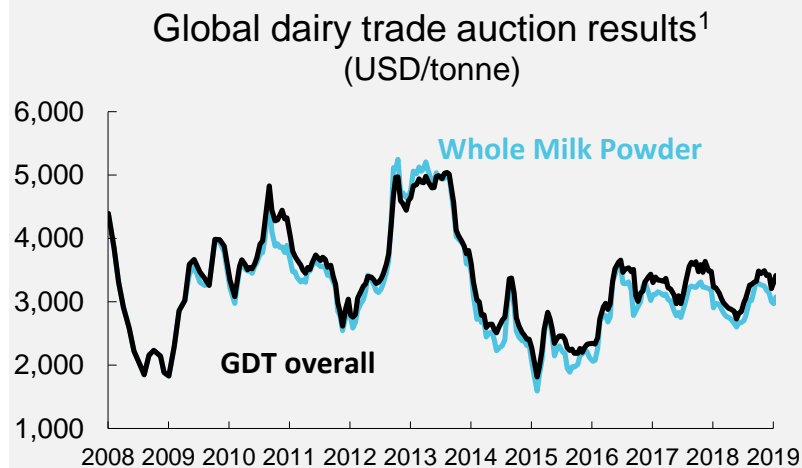

- ▶ Home buying intentions have been in negative territory since mid 2018. The pull back in buying intentions indicates demand weakness was the trigger for falling prices, rather than a supply glut as was the fear in 2017-18.
- ▶ Current HSIS readings suggest the market is now turning.
- ▶ Retail spending intentions have steadily trended lower since the start of 2018. The indications are that, aside from the occasional bounce, retail spending remains fairly lacklustre.

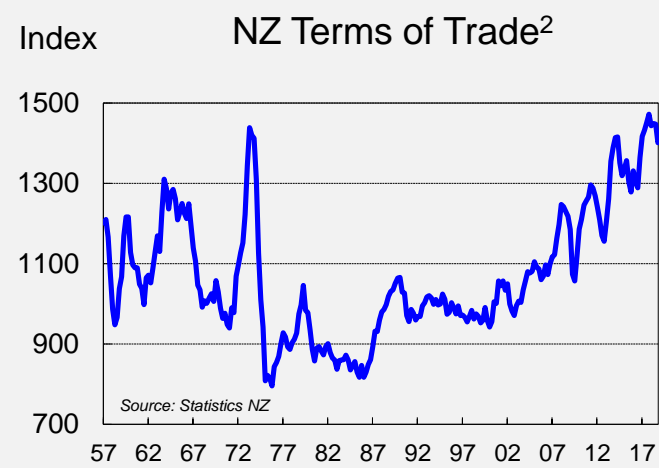

# New Zealand

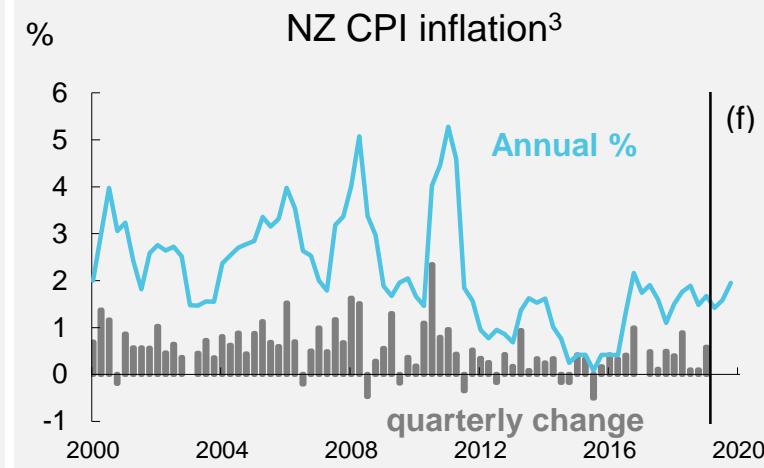

**Dairy prices have remained relatively steady since late 2016**

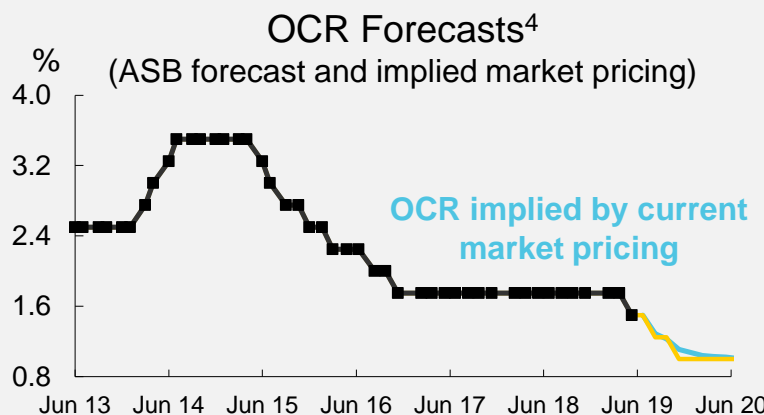

**NZ's terms of trade expected to remain near record highs**

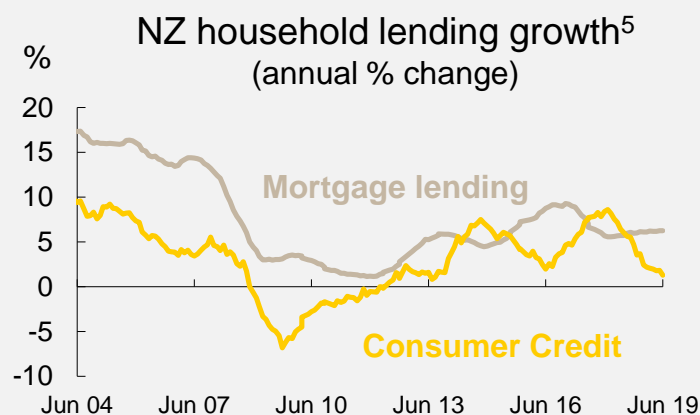

**Inflation is likely to range between 1-2% over next few years**

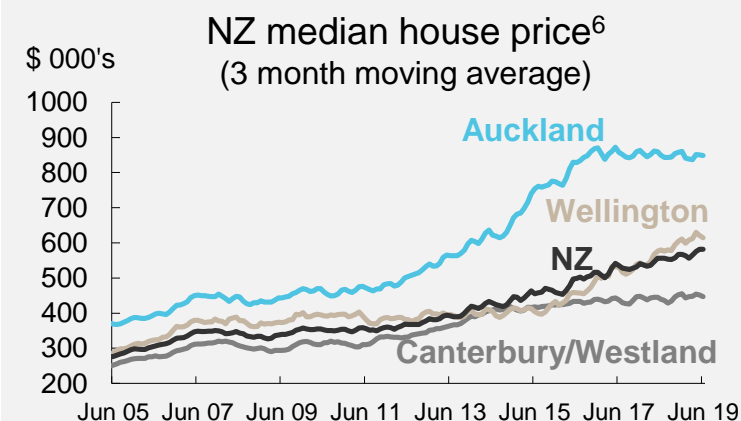

**Expect RBNZ to cut OCR to 1% by the end of 2019**

**Home lending growth steadied in 2018 after decelerating in 2017**

**House prices down in Auckland, flat in Christchurch, growing in other regions**

Capital & Other		Funding & Risk	
Risk Weighted Assets or RWA	The value of the Group's On and Off Balance Sheet assets are adjusted by risk weights calculated according to various APRA prudential standards. For more information, refer to the APRA website.	Liquidity coverage ratio (LCR)	The LCR is the first quantitative liquidity measure that is part of the Basel III reforms. It was implemented by APRA in Australia on 1 Jan 2015. It requires Australian ADIs to hold sufficient liquid assets to meet 30 day net cash outflows projected under an APRA-prescribed stress scenario.
CET1 Expected Loss (EL) Adjustment	CET1 adjustment that represents the shortfall between the calculated EL and eligible provisions (EP) with respect to credit portfolios which are subject to the Basel advanced capital IRB approach. The adjustment is assessed separately for both defaulted and non-defaulted exposures. Where there is an excess of EL over EP in either assessments, the difference must be deducted from CET1. For non-defaulted exposures where the EL is lower than the EP, this may be included in Tier 2 capital up to a maximum of 0.6% of total credit RWAs.	High quality liquid assets (HQLA)	As defined by APRA in Australian Prudential Standard APS210: Liquidity. Qualifying HQLA includes cash, government and semi-government securities, and RBNZ eligible securities.
Leverage Ratio	Tier 1 Capital divided by Total Exposures, with this ratio expressed as a percentage. Total exposures is the sum of On Balance Sheet items, derivatives, securities financing transactions (SFTs), and Off Balance Sheet items, net of any Tier 1 regulatory deductions that are already included in these items.	Committed liquidity facility (CLF)	Given the limited amount of Commonwealth government and Semi-government debt in Australia, participating ADIs can access contingent liquidity via the RBA's CLF. The amount of the CLF for each ADI is set annually by APRA. To access the CLF, ADIs need to meet certain conditions and pledge qualifying securities to the RBA.
Internationally comparable capital	The Internationally Comparable CET1 ratio is an estimate of the Group's CET1 ratio calculated using rules comparable with our global peers. The analysis aligns with the APRA study entitled "International capital comparison study" (13 July 2015).	Net Stable Funding Ratio (NSFR)	The NSFR is the second quantitative liquidity measure of the Basel III reforms, in addition to the LCR. It was implemented by APRA in Australia on 1 Jan 2018. It requires Australian ADIs to fund their assets with sufficient stable funding to reduce funding risk over a one year horizon. APRA prescribed factors are used to determine the stable funding requirement of assets and the stability of funding.
Derivative Valuation Adjustments (XVA)	A number of different valuation adjustments are made to the value of derivative contracts to reflect the additional costs or benefits in holding these contracts. The material valuation adjustments included within the CBA result are CVA and FVA.	TIA	Corporate Troublesome and Group Impaired assets.
Credit value adjustment (CVA)	The market value of the counterparty credit risk on the derivative portfolio, calculated as the difference between the risk-free portfolio value and the true portfolio value that takes into account the possibility of a counterparty's default.	Corporate Troublesome	Corporate Troublesome includes exposures where customers are experiencing financial difficulties which, if they persist, could result in losses of principal or interest, and exposures where repayments are 90 days or more past due and the value of security is sufficient to recover all amounts due.
Funding valuation adjustment (FVA)	The expected funding cost or benefit over the life of the uncollateralised derivative portfolio.	Total Committed Exposure (TCE)	Total Committed Exposure is defined as the balance outstanding and undrawn components of committed facility limits. It is calculated before collateralisation and excludes settlement exposures.
		Credit Risk Estimates (CRE)	Refers to the Group's regulatory estimates of long-run Probability of Default (PD), downturn Loss Given Default (LGD) and Exposure at Default (EAD).

## Cash Profit

The Profit Announcement discloses the net profit after tax on both a statutory and cash basis. The statutory basis is prepared in accordance with the Corporations Act and the Australian Accounting Standards, which comply with International Financial Reporting Standards (IFRS). The cash basis is used by management to present a clear view of the Bank’s operating results. It is not a measure based on cash accounting or cash flows. The items excluded from cash profit, such as hedging and IFRS volatility and losses or gains on acquisition, disposal, closure and demerger of businesses are calculated consistently with the prior year and prior half disclosures and do not discriminate between positive and negative adjustments. A list of items excluded from cash profit is provided on page 3 of the Profit Announcement (PA), which can be accessed at our website:
