SciDev chemistry qualified for use with North American MoU partner Phoenix Process Equipment Company

Highlights

- **Heads of Agreement signed with MoU partner Phoenix Process Equipment Company for supply of chemistry into the United States**

SciDev Limited (ASX:SDV; **SciDev**, or the **Company**) is delighted to advise that it has signed a Heads of Agreement (HoA) with Phoenix Process Equipment Company (Phoenix) following successful validation of the Nuocer produced chemistry delivered in to Houston (refer ASX 26 June 2019).

The chemistry was qualified in both the Oil & Gas and Mineral Processing spaces for use in waste dewatering and water recovery. These applications are core to the SciDev expertise in the development, production, supply and application of chemistry and process control technology.

The HoA builds on the existing relationship with Phoenix (refer ASX 26 June 2019) and also the relationship with Nuocer (ref ASX 25 May 2019) where the company's know-how can be utilised to add value to both of its business partners. The trial order sales into Phoenix June and July this year have been >\$120,000 AUD with these volumes expected to grow over the term of the agreement.
