

Additional information regarding new customer contract

Further to intelliHR Holdings Limited's (ASX: IHR) announcement this morning, IHR wishes to provide the following additional information regarding a new customer contract.

IHR has entered into a contract to provide our People Management Software to a US headquartered customer with operations throughout Australia, the United States, New Zealand, Thailand, India, the UK and North America.

This new customer contract is IHR's largest customer win to date, based on contract value. The contract entered into is for a period of three years and if fully implemented will represent revenue of approximately \$350,000 - \$400,000 over the life of the contract.

The implementation involves rolling out our People Management Software across multiple countries (800 head count). Timing and completion of these implementations could impact the pace and certainty of realisation of the full value of the contract.

In the opinion of the Board, this contract with DBM Vircon (Australia) Pty Ltd, a subsidiary of DBM Global Inc, part of the HC2 Holding Inc Group, whilst significant to our commercial history to date, and a validation of our ability to service global customers, is not material in the context of our fast-growing pipeline and overall business strategy.

Suzanne Yeates
Company Secretary
