

## ASX ANNOUNCEMENT

### PeriCoach® Production Update

**18 December 2018.** Analytica Ltd (ASX:ALT) wishes to update shareholders on the status of production of its PeriCoach product for the US market. Analytica has re-opened sales in the US and its territories after resuming production with a new Contract Manufacturer, re-registering its establishments with the USFDA, and clearing the first shipment through US customs.

#### About Analytica Limited

Analytica's lead product is the PeriCoach® System – an e-health treatment system for women who suffer Stress Urinary Incontinence. This affects 1 in 3 women worldwide and is mostly caused by trauma to the pelvic floor muscles as a result of pregnancy, childbirth and menopause.

PeriCoach comprises a device, web portal and smartphone app. The device evaluates activity in pelvic floor muscles. This information is transmitted to a smartphone app and can be loaded to a cloud database where physicians can monitor patient progress via web portal. This novel system enables physicians to remotely determine if a woman is performing her pelvic floor exercises and if these are improving her condition. Strengthening of the pelvic floor muscles can also potentially improve sexual sensation or satisfaction and orgasm potential in some women.

PeriCoach has regulatory clearance for urinary incontinence in Australia and has CE mark and USFDA 510(k) clearance.

PeriCoach also has clearance in Australia for the treatment of pelvic organ prolapse, a condition that affects up to 1 in 5 women during their lifetime.

The product is available for sale from [pericoach.com](http://pericoach.com) in Australia, New Zealand, UK and Ireland, and the USA.
