

# Growing a known high-grade gold deposit in a Tier-1 jurisdiction

DATELINE  
RESOURCES

COLORADO  
USA

# Disclaimer - Important Information

This presentation is an overview of Dateline Resources Limited (Dateline or the Company) and its minerals project prepared with good intention. It is not (and does it purport to be) a prospectus prepared in accordance with Chapter 6D of the Corporations Act (Cth) (Corporations Act) and offers no securities for subscription or sale in any jurisdiction, nor a securities recommendation.

All information necessary for investment decisions is not contained in this presentation and investors are encouraged to conduct their own research of Dateline in conjunction with legal, tax, business and financial consultation.

Dateline, its directors, officers, employees, advisers and agents disclaim liability for any loss or damage suffered by reliance on information contained in this presentation when making investment decisions. In addition, no express or implied representation or warranty is given in relation to the completeness and sufficiency of the information, opinions or beliefs contained in this document or any other written or oral information made or to be made available to any interested party or its advisers.

This presentation may refer to the intention of Dateline but it does in no way intend to provide a forecast in relation to future matters for the purposes of the Corporations Act or any other law. Future events are subject to risks and uncertainties, and as such, results, performance and achievements may in fact differ materially from those referred to in this presentation.

While reasonable care has been taken in relation to the preparation of this presentation, no liability is accepted for any loss, cost or damage suffered or incurred by the reliance on the sufficiency or completeness of the information, opinions or beliefs contained in this presentation

Statements in this presentation are made only as of the date of this presentation (unless stated otherwise) and the information in this presentation remains subject to change without notice.

Research, evaluation and analysis of the Company's business, data and projects are encouraged before making financial investments. Any estimates, projections or opinions contained herein may involve subjective judgment, analysis and interpretation, and satisfaction of ones own decisions should be undertaken.

We caution you not to place undue reliance on any forward-looking (or indeed any other) statements contained in this presentation.

This presentation is provided for general information purposes only. The information contained in this presentation is not intended to be relied upon as advice to investors and does not take into account the investment objectives, financial situation or needs of any particular investor. Investors should assess their own financial circumstances and consider talking to a financial adviser or other professional before making any investment decision. We undertake no obligation to update this information.

Any information in this presentation relating to exploration targets should not be misunderstood or misconstrued as an estimate of mineral resources or ore reserves. Hence the terms resource(s) or reserve(s) have not been used in this context (or at all). Furthermore, any reference to potential target size, quantity and/or grade is conceptual in nature, since there has been insufficient work completed to define them beyond exploration targets and in any event it is uncertain if further exploration will result in the determination of a mineral resource.

The information in this report relating to Exploration Results, or Mineral Resources is based on information compiled by Mr Gregory Hall who is a Fellow of the Australasian Institute of Mining and Metallurgy and has sufficient exploration experience which is relevant to the various styles of mineralisation under consideration to qualify as a Competent Person as defined in the 2004 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Mr Hall is a Director of Dateline Resources Limited. Mr Hall consents to the inclusion in the report of the matters based on his information in the form and context in which it appears.

NOT FOR DISTRIBUTION OR RELEASE IN THE UNITED STATES.

- **Located within Tier-1 jurisdiction** - Flagship 100% owned Gold Links Project in Colorado
- **History of High Grade Production** - over 150,000 oz Au with average grades of between 15-20 g/t Au, with grades up to 240 g/t
- **Extensive evidence of a large high-grade gold system within project area**
- **Low risk exploration plan** - targeting well established and clearly understood mineralisation, several highly prospective drill targets have already been identified
- **Low capex to production** - underground access already developed and an operational modern processing plant is in place
- **Market cap is just \$7.2m:** Significant leverage to high-grade drilling results and maiden JORC Resource

The Gold Links Project has the potential to be a high grade multi-M oz gold project

## Capital Structure

Ordinary Shares on Issue	724,495,810
Share Price (ASX: DTR)	1.0¢
Market Cap (undiluted)	\$7.24m
Options (3.3 – 3.9c exercise)	45m
Est. Cash	\$0.1m
Current Debt	\$7.7m

Stephen Baghdadi	Executive Director
Greg Hall	Non-Executive Director
Glenn Dovaston	CEO
John Smith	Company Secretary

# Shareholders	400
Southern Cross Exploration	33%
Mr. Mark Johnson	10%
Red Star Development Pte Ltd	8%
Mr K. D. Vinci	8%
Other	41%

**Mark Johnson AO, Chairman**

+40 years investment banking experience. Retired as Deputy Chairman of Macquarie Bank in mid-2007, and now divides his time between work in the private and public sectors. Mr Johnson is a senior adviser to Gresham Partners, chairman of Alinta Energy, and a former director of Westfield Group. Mr Johnson has been a director of a number of public companies, including Macquarie Group, AGL Energy, Pioneer International, GPG Plc, Santos and the Sydney Futures Exchange.

**Glenn Dovaston, CEO**

+30 years experience in the mining and resource sectors. Mr Dovaston is a mining engineer with extensive experience in corporate development, strategic planning, project feasibility, project development and operational excellence. Previously Mr Dovaston was CEO for Millennium Minerals and has held senior roles with a number of gold companies including Newcrest, Barrick, Resolute, Sons of Gwalia and North Ltd . Mr Dovaston holds a Bachelor of Engineering from University of South Australia and a Masters of Mineral Economics from Curtin University

**Stephen Baghdadi, Director**

Mr. Baghdadi is experienced in identifying and securing opportunities across a range of sectors. Since 1991 he has been a director of several ASX listed companies including the Horizon Group, Afro-West, Alamain Investments, Marino as well as privately held controlling interests in manufacturing, software development and property concerns. Mr. Baghdadi has completed several transactions in Australia, South East Asia, Europe and North America.

**Greg Hall, Non-Executive Director**

+40 years experience as an exploration geologist. From 1988-2005, Mr Hall was employed by the Placer Dome group of companies, serving as Chief Geologist - World Wide (2000-2005). Placer Dome was acquired by Barrick Gold Corporation in 2006. Over the course of his career, Mr Hall played an integral role in the discoveries of both Gold Field's Granny Smith mine and Rio Tinto's Yandi iron ore mine. Mr Hall holds a Bachelor of Applied Science from the University of New South Wales.

**John Smith, CFO / Company Secretary**

Mr Smith is a Certified Practising Accountant with over 35 years experience as CFO and Company Secretary of ASX listed and unlisted companies. He holds a Bachelor of Commerce from University of NSW and a Masters of Business Administration from University of New England.

**Clint Fletcher, Onsite General Manager**

26+ years of experience as a plant processing professional focused primarily on mill processing and plant operations management. Mr Fletcher's experience has included working with BHP Copper and Rio Tinto. While at Rio. Mr Fletcher has significant experience in plant automation and distributed control systems and is considered an expert at mill processing (crushing, grinding, flotation and tails management).

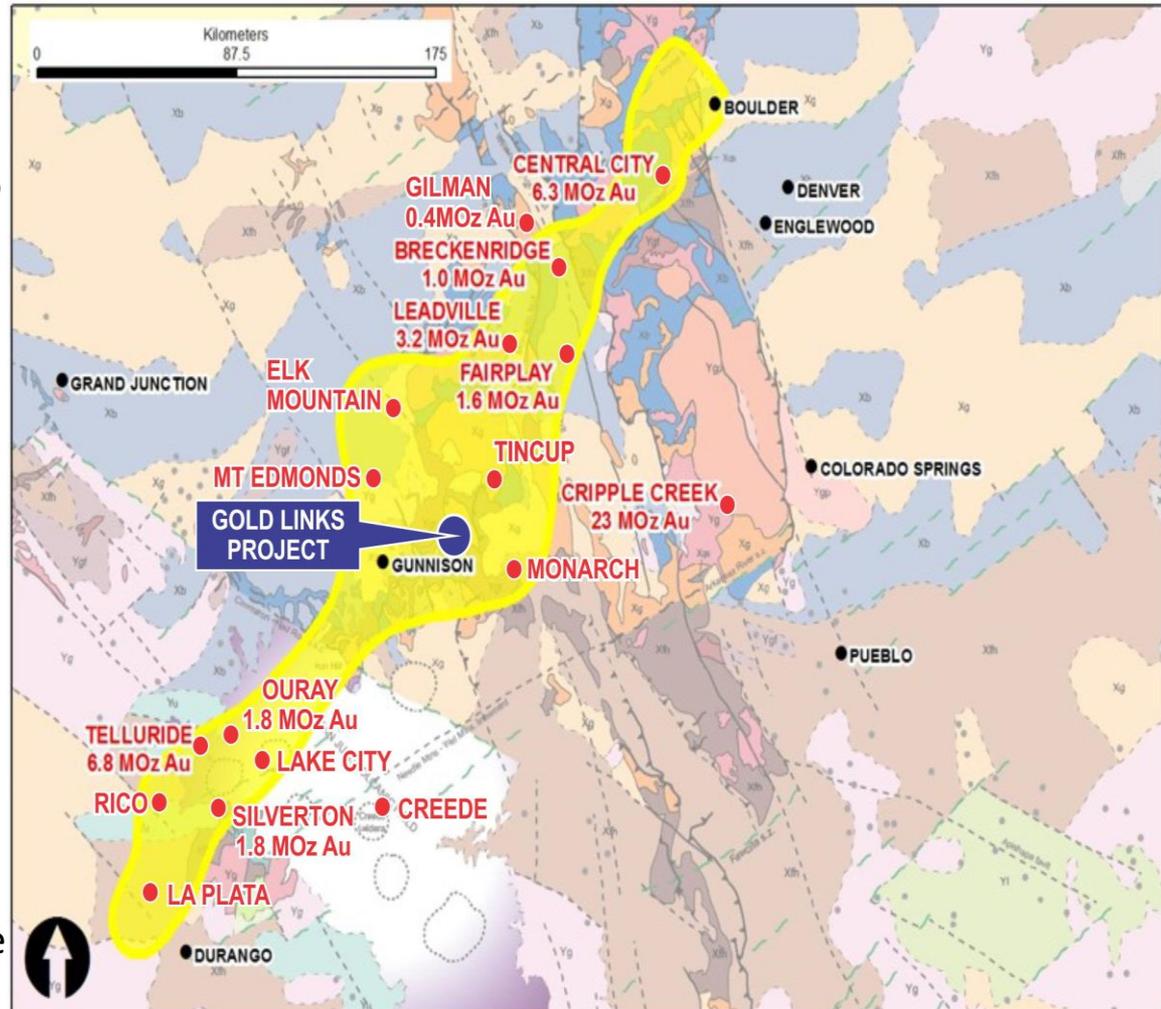

**Leonard Karr, Onsite Chief Geologist**

39 years of exploration and mining experience on five continents, roles included Chief Mine Geologist at the London Mine, and Project Geologist at Lihir. Subsequently Mr. Karr worked as a consulting exploration geologist, project manager and VP of Exploration for a variety of companies including Placer Dome and Orvana Resources. His exploration experience covers the spectrum of mine site to regional scale programs and includes the design, budgeting and implementation of these programs. Mr. Karr has an MSc in Geology from Colorado State University and a BSc in Geological Engineering from Michigan Technological University. He is a Certified Professional Geologist with the American Institute of Professional Geologists and a Qualified Person under NI 43-101.

# Colorado – A Tier 1 Jurisdiction

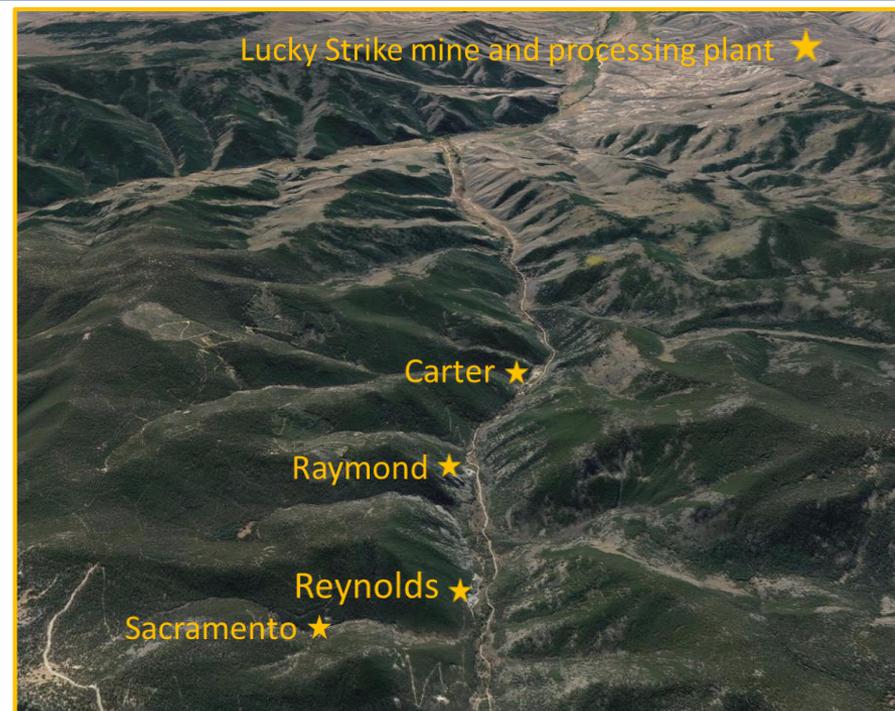

- World class gold region in a Tier 1 jurisdiction, USA
- 250km SW of Denver, Colorado, within the 25 million ounce Colorado Mineral Belt
- Under US law, the owner of the freehold also owns mineral rights in perpetuity
- **Dateline owns the freehold**
- No state or Federal royalties
- Reliable mining and permitting state codes
- Reputable exploration and mining suppliers and contractors readily available
- Modern communication and transport infrastructure
- Skilled resource industry labour force

Located in a world class gold mining region

# Consolidation of Gold Links Project

- District-wide but individually owned mining operations commenced in the 1880's through to WWII
- Disparate ownership of the 250+ different mining claims prohibited the evaluation of the district as a large and connected regional system
- Since September 2016 and with the assistance of funding from its major shareholders, Dateline has completed 8 transactions to consolidate 100% ownership of this district
- Assets acquired include
  - Almost 2,000 acres of freehold land
  - 4 known high grade gold zones
  - A modern sulphide processing plant
  - Production, Geology and Metallurgy data
- All operating permits required have been granted

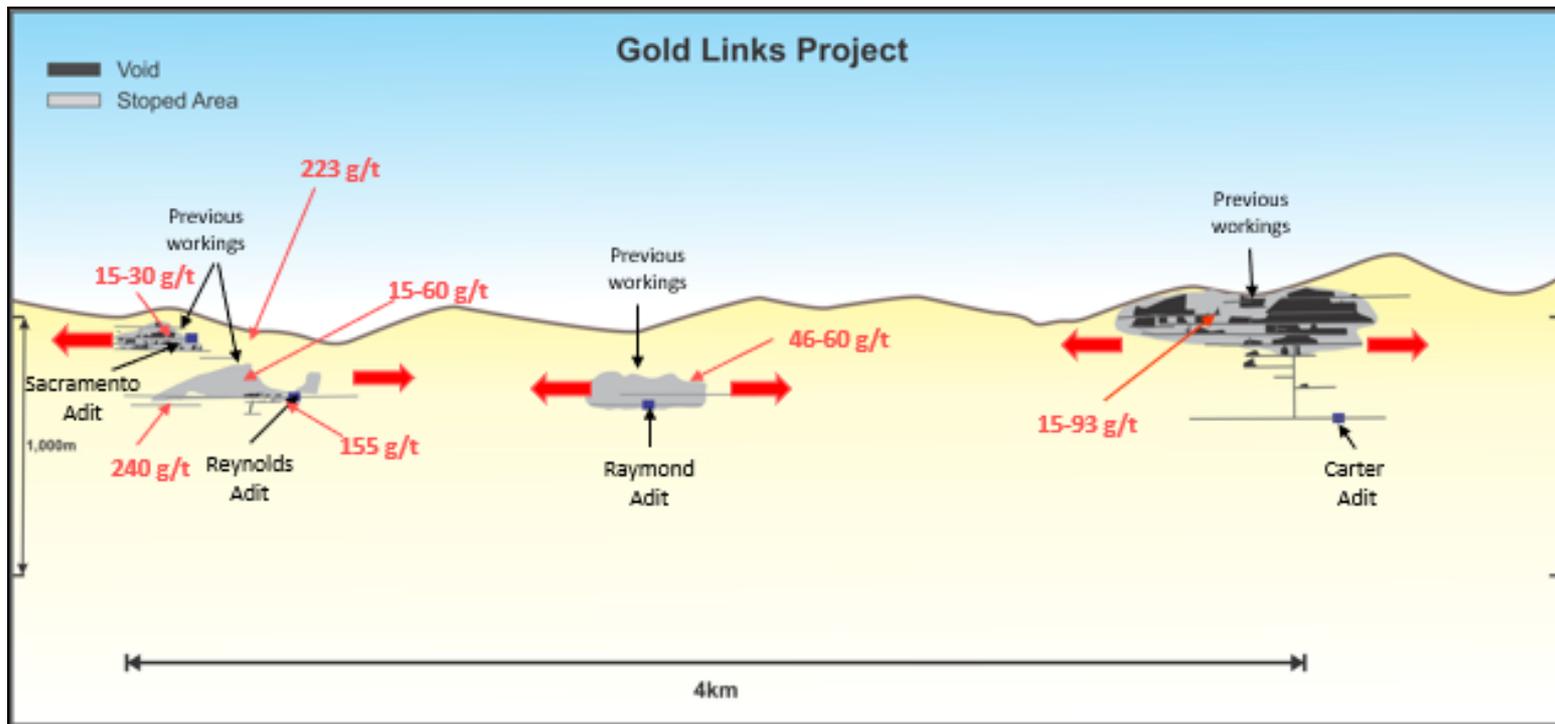

Consolidation has provided a pathway to identifying a large regional resource

# Gold Links Project

# Gold Links - A high-grade gold system

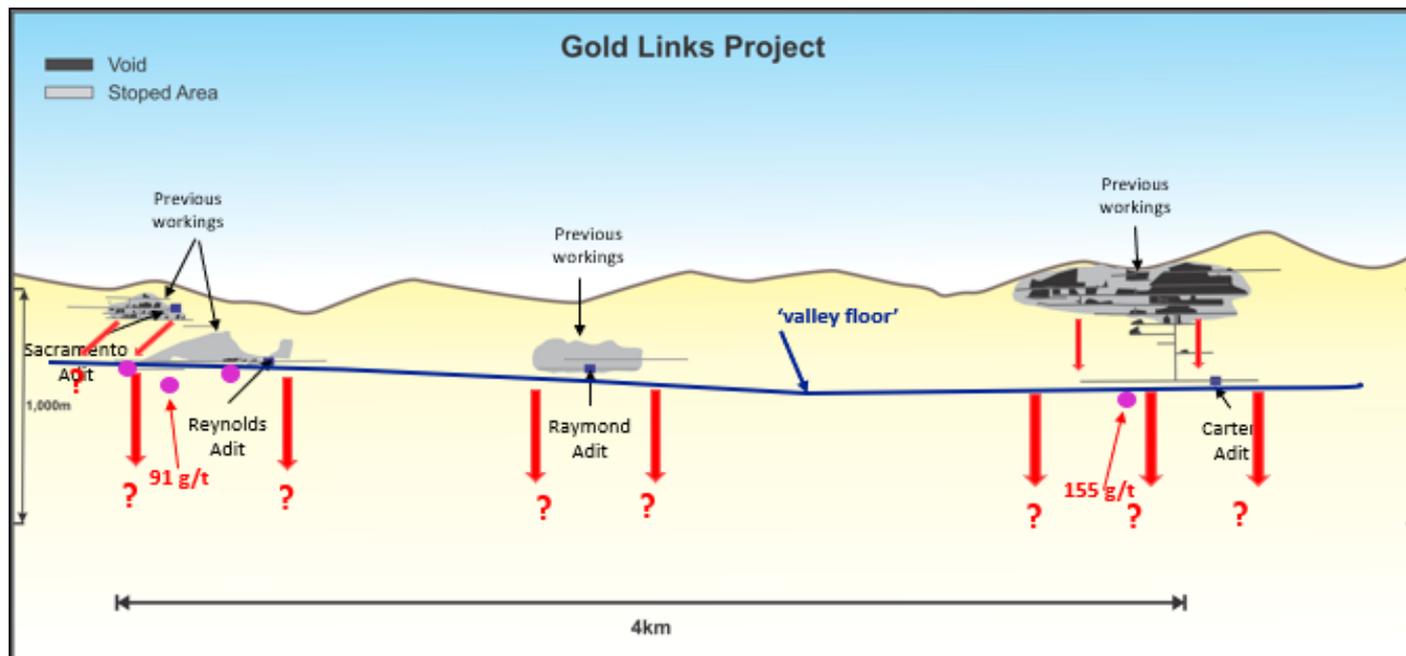

- Consolidation of significant quantity of data and records indicate wide-spread distribution of high-grade gold
- Smelter and production records indicate grades up to 240 g/t with an average grade at 15-20 g/t within all 4 previously mined areas\*
- Recent drilling and sampling by Dateline at the Gold Links have returned similarly high grades of up to 250g/t

Consistent high-grade gold system over 4km

\* Production records were sourced from the following documents: R.D. Crawford and P.G. Worcester – Bulletin 10, Geology and ore deposits of the Gold Brick District COLORADO 1916; R. J. Kehmeier – Carter-Raymond Project – Detailed evaluation report, Atlas Precious Metals 1984; H. L Bird Summary of available information on the Gold Links mine, Geologic Surveys 1956

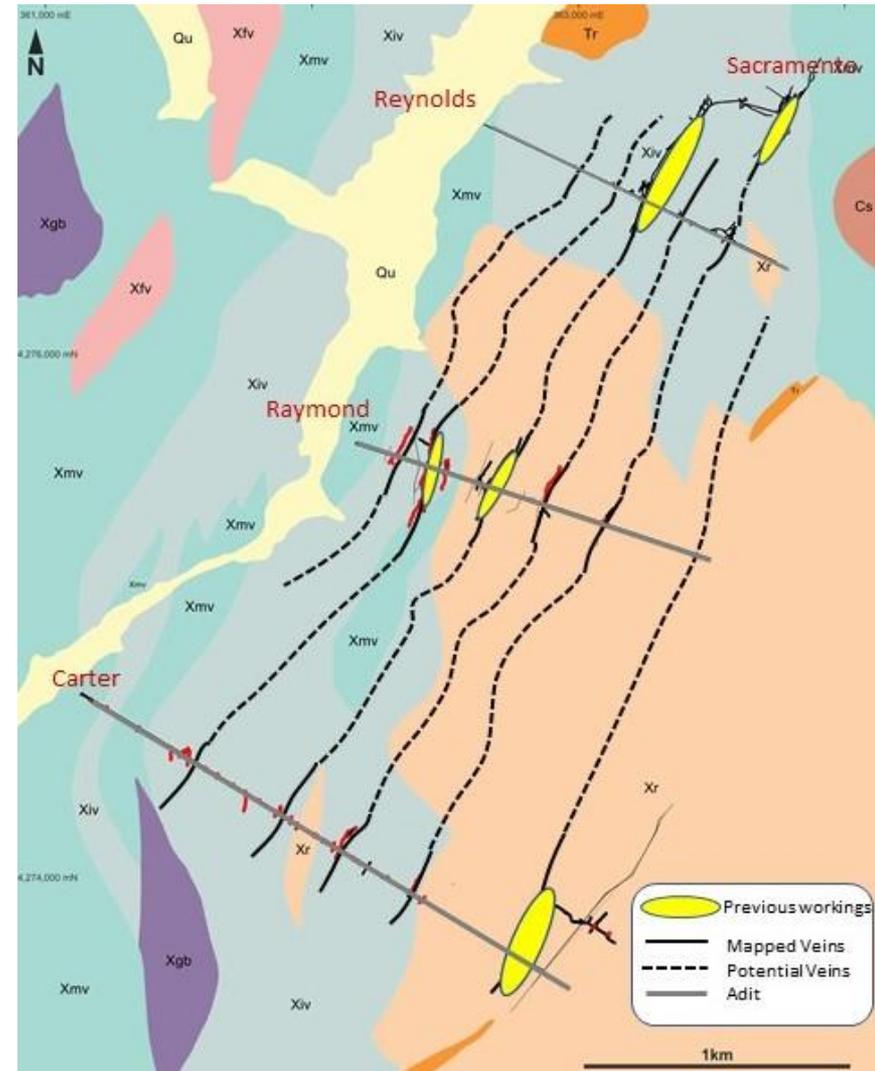

- Access to previous mining areas was via adits driven from valley floor.
- Mining generally went up from the adits and used gravity to feed the ore onto level rail cars
- Modern and cost effective declines open up potentially significant ore zones below previous working levels.
- Reports from the Carter zone indicate grades up to 155 g/t 30 metres below the adit level.
- Drilling at the Reynolds completed 80m below the previous workings on the 2150 vein (C8 hole) returned 91 g/t
- Exploration and Development below the adit levels confirm that mineralisation exists below the previous workings.

Evidence of high-grade gold below previous workings

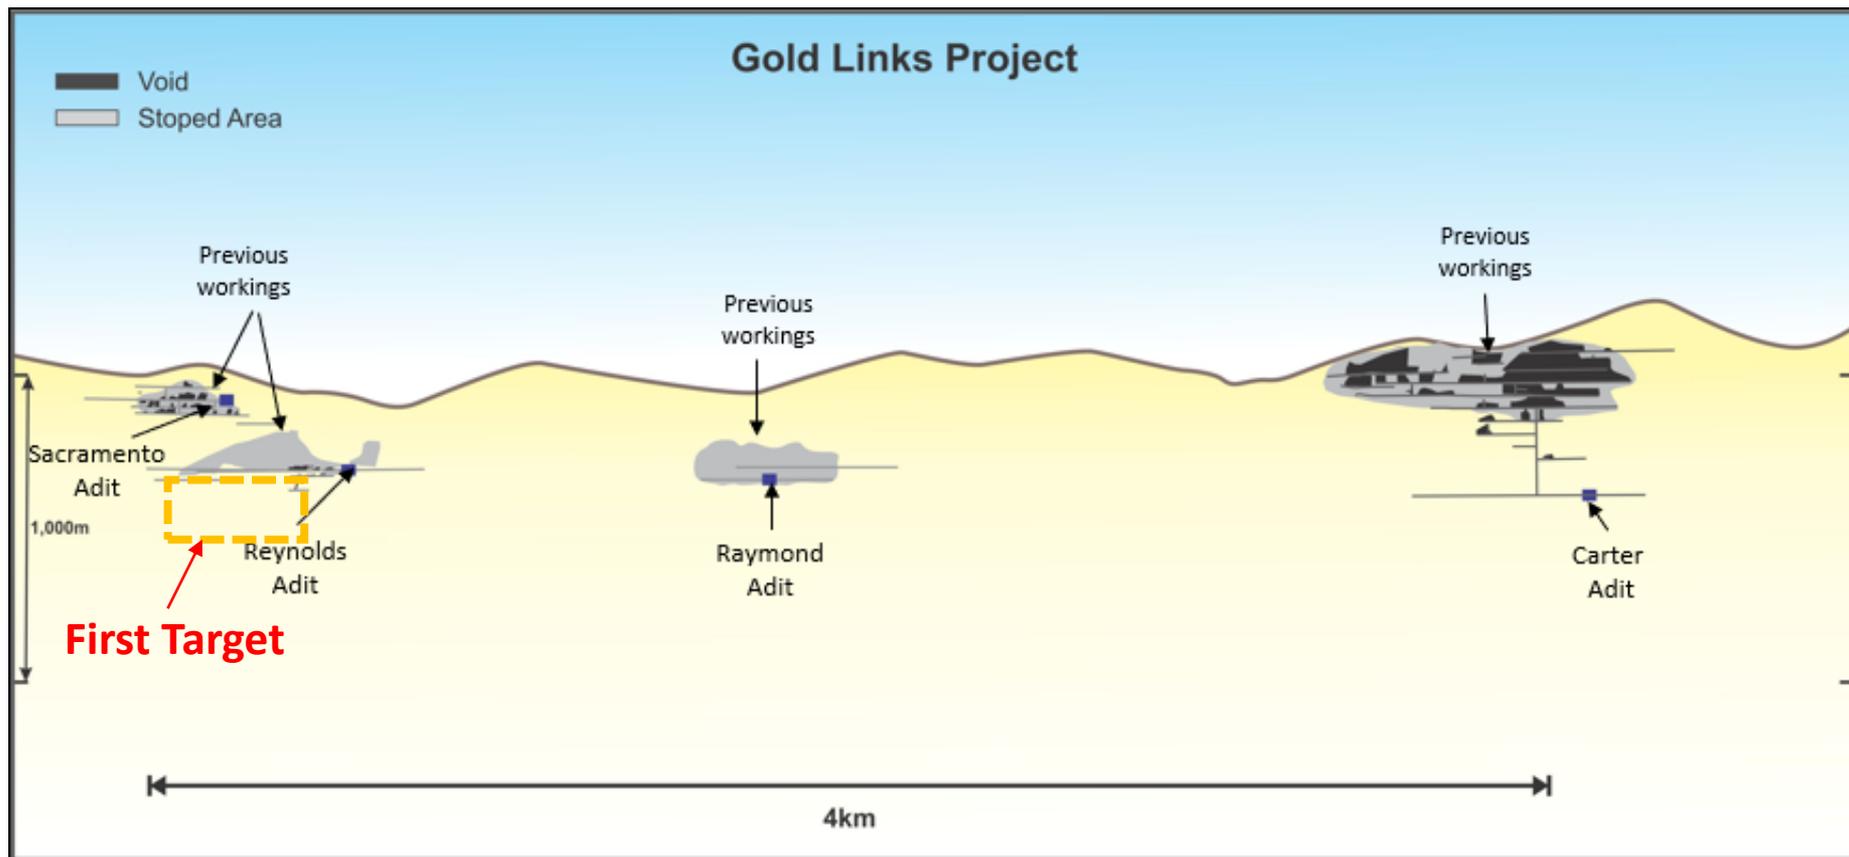

# Gold Links – Multiple mapped veins

- Mapping from underground and on surface proves existence of multiple veins
- High grade ore recorded in all previous mine workings
- Only a fraction of this area has been mined
- Similarities in the Geology and vein geochemistry indicate veins will link up between the adits
- Significant additional discovery upside from multiple veins over a 4km strike

Significant evidence of a large high-grade gold system

# Gold Links – First Target

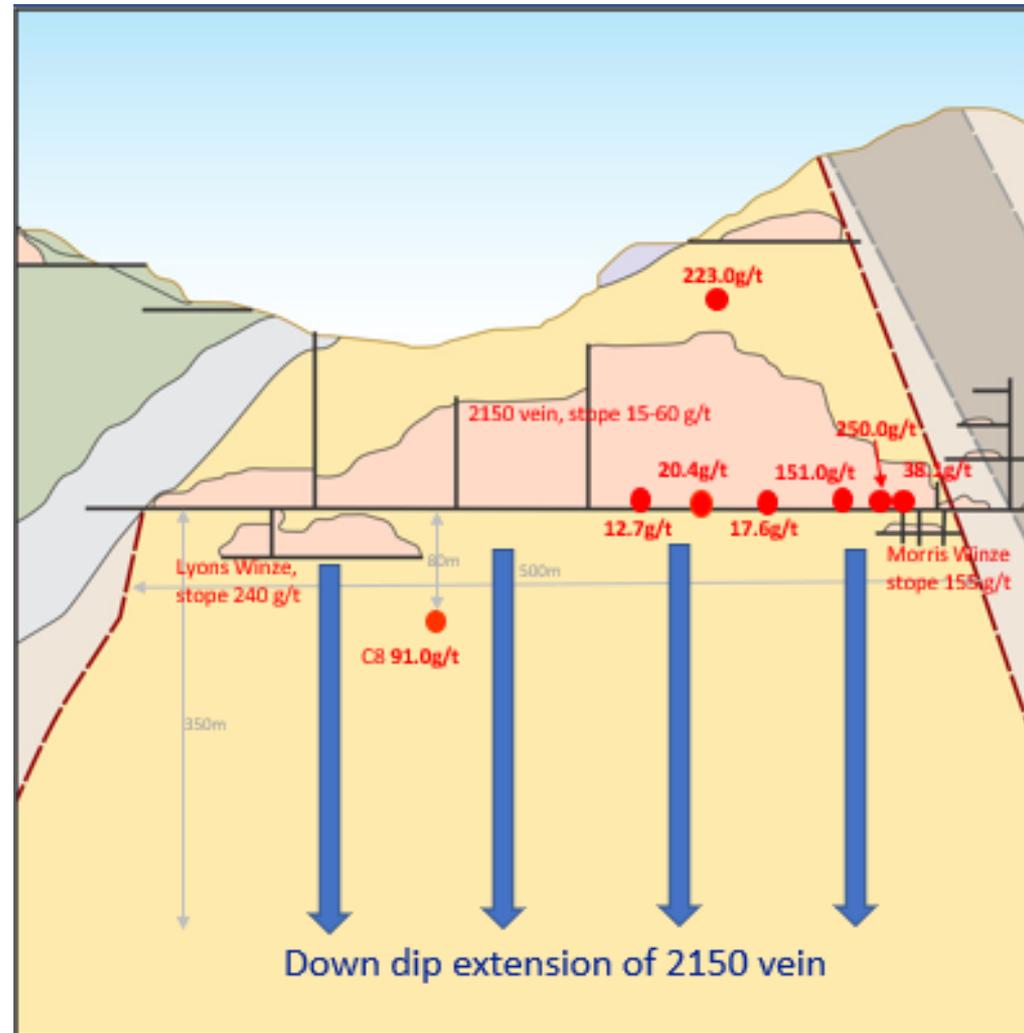

500,000t @13-17 g/t for JORC resource of 190-240koz\*

\* Please see disclaimer for further detail in relation to the conceptual nature of Dateline's mineral target and estimates.

# Gold Links – The 2150 Vein

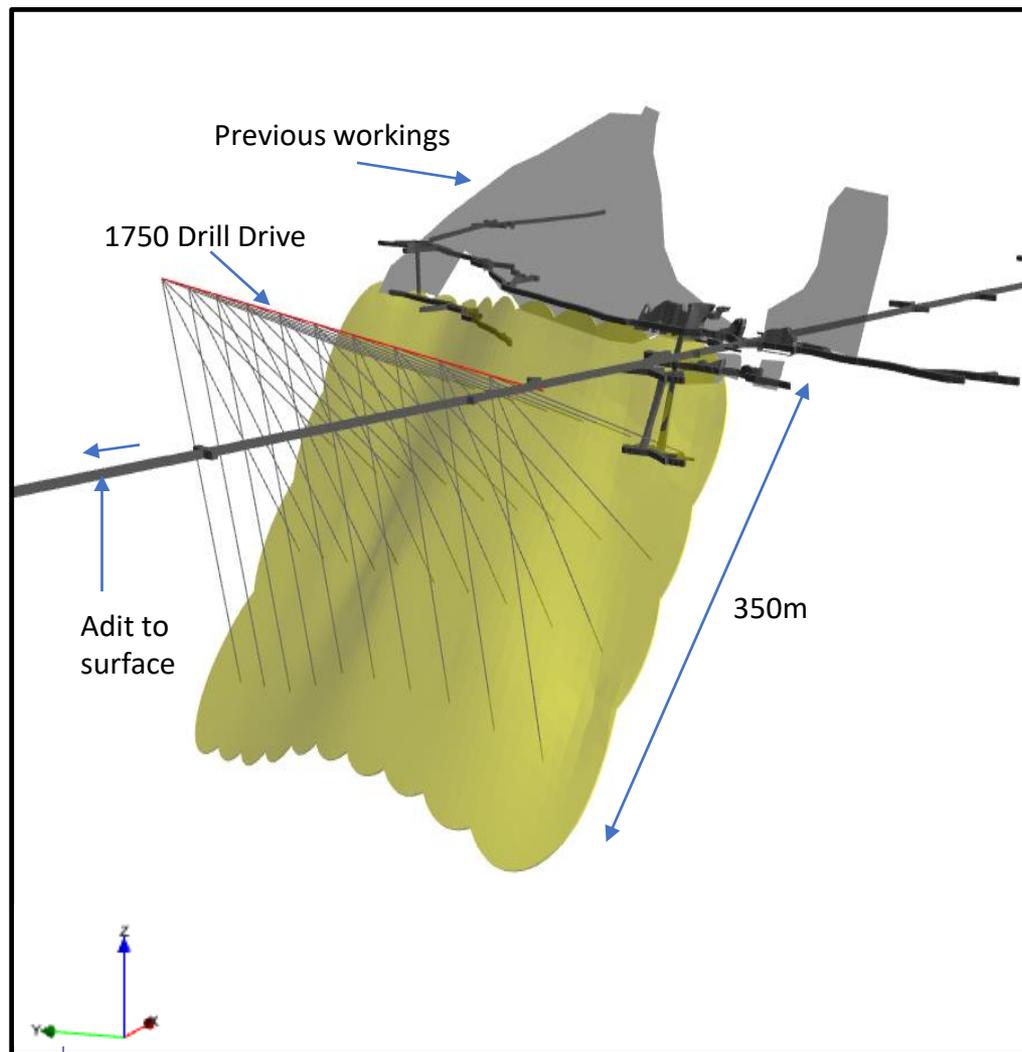

- Records estimate up to **50,000oz** previous production from the 2150 vein
- Dateline's 2018 drilling of the up-dip extension of the 2150 vein include Intersects of:
  - 1.9m @ 80.0 g/t
  - 2.2m @ 34.8 g/t
  - 1.9m @ 29.7 g/t
  - 0.3m @ 223g/t
- Dateline's recently completed sampling of 2150 vein includes **250g/t, 151g/t** and **38g/t** samples
- High grade ore extracted from the Lyons winze in 1915 averaged over **8 oz/t (240g/t)** (Bird 1956)
- High grade ore extracted from the Morris winze in 1922 averaged over **3.3 oz/t (100g/t)** (Bird 1956)
- 1977 C8 drill hole grading **91g/t over 1.2 m true width** confirmed continuity of grade 80m below main workings.

Pursuing extensions of known high grade mineralisation

# Gold Links – The 2150 Vein Drill Program

- Develop 500m drill drive from existing adit and establish drill stations
- Drill to intersect the 2150 vein (North-side) down to 350m below the base of the previous workings
- Diamond Drilling of ~9,150m
- Log and assay core and provide updates to market on an ongoing basis.
- Program to target grade of 13-17g/t

Simple and well-defined drilling program

## Delineate a maiden JORC resource by August 2019

July to December 18

January to May 19

June to July 19

August to December 19

### CONFIRMATION AND CLARIFY

- ✓ Confirmed continuity or ore zone below previous workings on 2150 vein
- ✓ Review all previously produced data
- ✓ Mapping and sampling below existing stopes on 2150 vein
- ✓ Design drill program below previous working on the 2150 vein

### DEVELOPMENT DRILLING

- Develop 500m drill drive from existing adit
- Diamond drill 2150 vein up to 400m below existing previously mined level

### JORC RESOURCE

- Complete diamond drilling
- Assay, log and interpretation of core
- Wireframing and defining ore zones
- Announce maiden JORC resource
- Determine second target area for brownfields exploration program

### DEVELOPMENT AND GROWTH

- Commence drilling of second target area with view of increasing inventory
- Commence mining feasibility study

Focusing on developing a large high-grade resource and move to production

# Top 5 Gold Mines in the world by grade

Mine	Country	Owner	Au Grade in Milled Ore Q4 2017 g/t
Fosterville	Australia	Kirkland Lake	21.50
Yaramoko	Burkina Faso	Roxgold	17.60
Segovia	Colombia	Gran Colombia Gold	17.48
Cerro Negro	Argentina	Goldcorp	16.74
Turquoise Ridge	USA	Barrick Gold	15.22

Gold  
Links  
Project

USA

Dateline  
Resources

13-17 g/t ?

Dateline expects to be a high grade gold producer

# Potential Valuation

Description	Ounces	Market Cap \$A	Grams of Gold per tonne
Doray Minerals (DRM)	300,000*	156m	5
Artemis Resources (ARV)	300,000**	101m	2.0
Millennium Minerals (MOY)	300,000*	164m	1.57
Pantoro (PNR)	200,000*	142m	8
Orminex (ONX)	200,000**	116m	10.9

Valuation upside on success of exploration program

\*Reserve \*\*Resource \*\*\* Assuming rights issue is fully subscribed

# Positioned to deliver outstanding returns for Investors

- **Low risk Tier 1 mining Jurisdiction**  
Colorado USA
- **High Grade Previous Production**  
Average grades of 15-20g/t
- **Low risk exploration plan**  
Targeting established and understood mineralised veins
- **High probability for a large high grade resource**  
Multiple veins over 4km
- **Low Capex to Production**
  - Access to underground already developed
  - Modern processing plant has produced high-grade concentrate up to 767g/t\*
- **Low market cap with significant upside**  
Current market cap is \$7.24

The Gold Links Project has the potential to be a high grade multi-million oz gold project

\* As disclosed to ASX in June 2018 Quarterly report

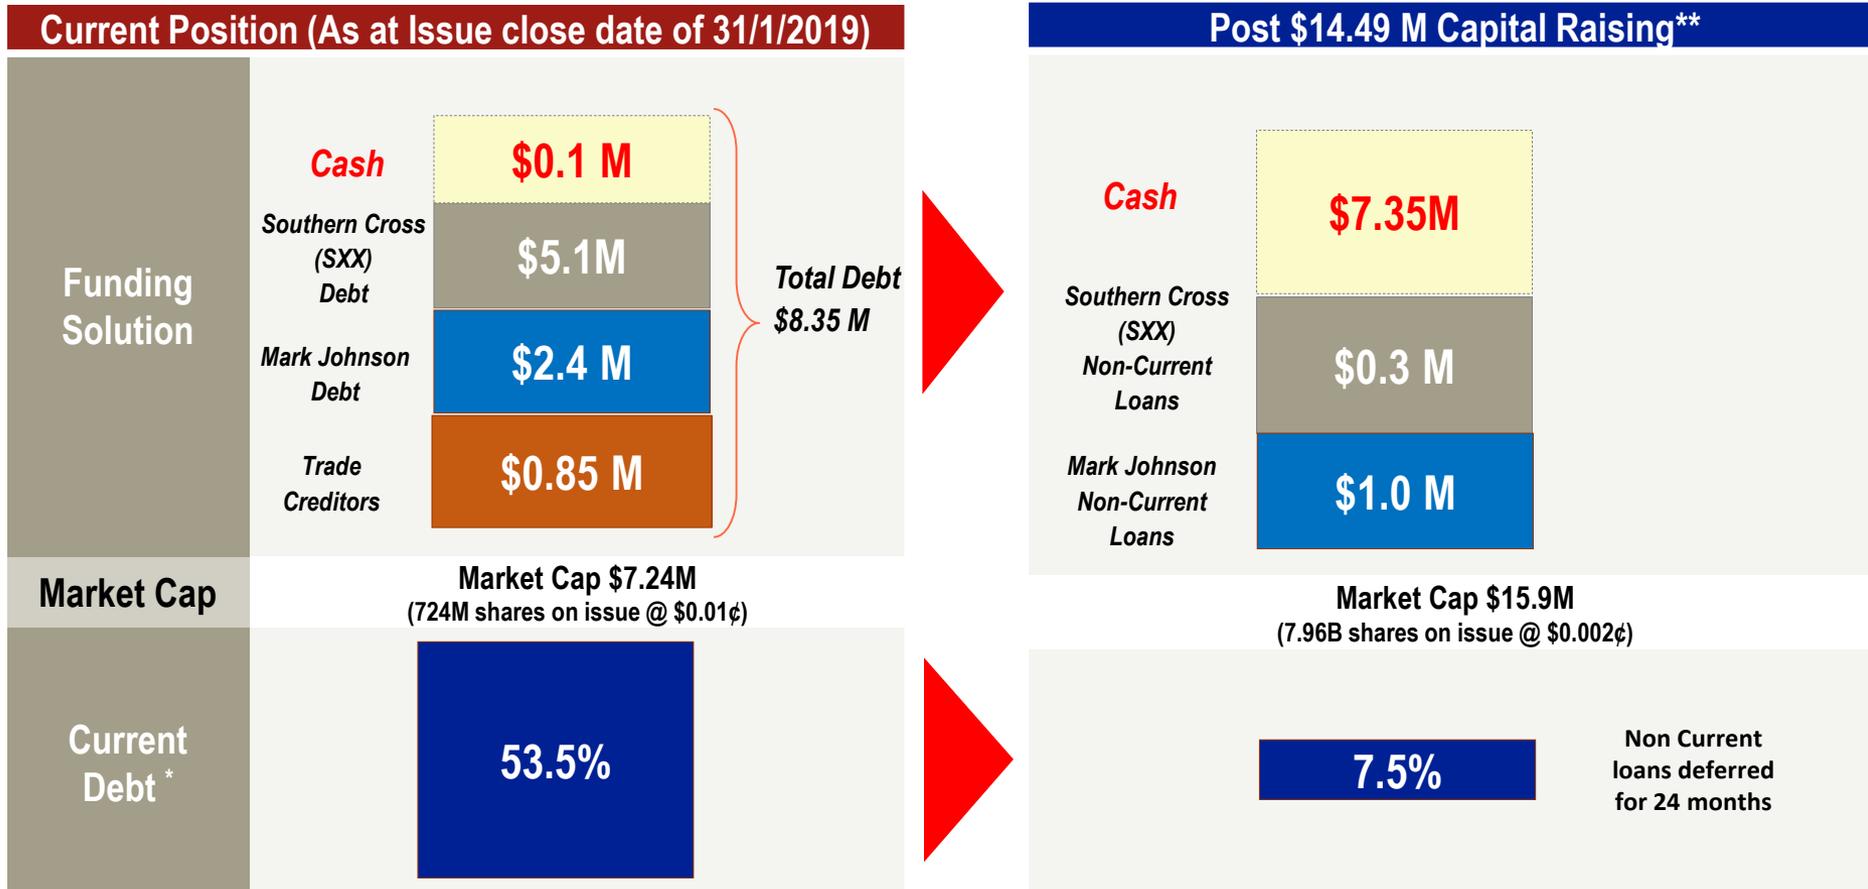

# Capital raising overview – the opportunity

<b>Offer Size</b>	<ul style="list-style-type: none"> <li>▶ Equity issue to raise up to \$14.49M</li> </ul>
<b>Overview</b>	<ul style="list-style-type: none"> <li>▶ Aggressively priced</li> <li>▶ Pro-rata issue ensures that all shareholders can participate equally</li> </ul>
<b>Offer Price</b>	<ul style="list-style-type: none"> <li>▶ \$.002 per fully paid ordinary share             <ul style="list-style-type: none"> <li>▶ 80% discount to last closing price of \$0.01 per share</li> <li>▶ 88.7% discount to 30 day VWAP of \$0.0093 per share</li> <li>▶ 26.7% discount to TERP of \$0.0027 per share</li> </ul> </li> </ul>
<b>Ranking</b>	<ul style="list-style-type: none"> <li>▶ New Shares issued under the Rights Issue will rank equally with existing Dateline shares</li> </ul>
<b>Underwriting</b>	<ul style="list-style-type: none"> <li>▶ Partially underwritten to \$7,243,851 of the issue</li> <li>▶ Management is contributing \$1m in cash as part of the underwriting</li> </ul>
<b>Major Shareholders</b>	<ul style="list-style-type: none"> <li>▶ Southern Cross Exploration NL and Mr. Mark Johnson to take up their full entitlement by converting loans advanced to the Company into equity</li> </ul>
<b>Use of Funds</b>	<ul style="list-style-type: none"> <li>▶ Eliminate \$7.15M of debt. Apply \$7.34M towards brownfields exploration and working capital *</li> </ul>
<b>Further Information</b>	<ul style="list-style-type: none"> <li>▶ Further details of the Right Issue, including how to participate is included in the Offer document</li> </ul>
<b>Eligibility</b>	<ul style="list-style-type: none"> <li>▶ Rights Issue is made only to eligible shareholders resident in Australia and New Zealand and also to shareholders based in Singapore who qualify as "institutional investors" as defined in the Securities and Futures Act of Singapore at the record date of Wednesday, 5 December 2018.</li> </ul>

**The Company will be adequately funded to execute its growth strategy**

# Strengthened Balance Sheet

Equity issue will right size Dateline's capital structure  
enabling a focus on brownfields exploration, creating a JORC resource and increasing gold inventory

Strong Balance Sheet and a Defined Credible Strategy for building a Sustainable Gold Mining Company

\* Defined as Total current Debt/(Total current Debt + Market Capitalisation) \*\* Assuming rights issue is fully subscribed

1. Balance sheet Strengthened
2. \$5.0m allocated to underground development and exploration.
3. Near term valuation upside from exploration success
