1 February 2018

Animoca Brands, iCandy Interactive and NITRO to launch *MasterChef* mobile game

Highlights

- Animoca Brands, iCandy Interactive and NITRO to co-develop and launch app based on globally renowned television franchise *MasterChef*
- *MasterChef* TV series has a total audience of over 250 million viewers across 200 territories
- Animoca Brands will contribute 50%, while iCandy Interactive and NITRO will contribute 25% each toward development, publishing, and marketing costs
- Potentially significant revenue opportunity driven by in-app purchases
- Head designer on first app will be Torulf Jernström, CEO of Finland-based Tribeflame

Animoca Brands Corporation Limited (ASX:AB1) (“**Animoca Brands**” or “**the Company**”) is pleased to advise it has entered into a binding term sheet (the “**Agreement**”) with iCandy Interactive Limited (ASX:ICI) and Nitro Interactive Ltd. (“**NITRO**”) to co-develop and co-invest in a global iOS and Android mobile game application based on the *MasterChef* franchise, one of the world’s top-rated competitive cooking reality television programs.

MasterChef is a series of world-renowned television programs based on competitive cooking. The franchise has an established audience of over 250 million viewers. It is produced in over 50 countries worldwide and broadcast in over 200 territories.

Animoca Brands has a non-exclusive global brand and content licence agreement with Endemol Shine North America for the rights to use the *MasterChef* brand in a series of up to five mobile products. Torulf Jernström, an internationally acclaimed game industry executive and CEO of Finland-based game studio Tribeflame, has been appointed to be head designer for the first mobile app.

Animoca Brands, iCandy Interactive and NITRO have committed to co-develop the *MasterChef* mobile app, with Animoca Brands contributing 50% of the total development, publishing, and marketing costs, while iCandy Interactive and NITRO will contribute 25% each of the same. Animoca Brands will own all intellectual property rights relating to the mobile app and grants to NITRO an irrevocable, fully paid-up, royalty-free worldwide license to those rights.

This agreement paves the way for the first games to be funded through the recently launched NITRO Project, a revolutionary blockchain cryptocurrency initiative that completed its first ICO round at the end of 2017. The *MasterChef* app will be among the first games to accept NOX Tokens for in-game purchases.

NITRO is an independent blockchain online collaboration project that is designed to address videogame economy ecosystem problems. NITRO is building an online marketplace that funds game development, and that encourages direct interaction between gamers and game makers. NITRO operates on the recently launched cryptocurrency NOX Token. Both NITRO Project and

NOX have the backing of iCandy Interactive, a publicly traded award-winning mobile games company. NOX Token is listed on COSS and livecoin.net, and will list on additional cryptocurrency exchanges.

Robby Yung, CEO of Animoca Brands, commented:

"We are pleased to announce that our first app based on the top-rated TV show *MasterChef* will be launching later in 2018 in partnership with NITRO. NITRO's novel blockchain and cryptocurrency solutions represent the next evolution in game development, and we're looking forward to working together."

Kin-Wai Lau, Chairman of iCandy Interactive, commented:

"We are excited to create a product based on the well-loved and internationally renowned MasterChef brand. MasterChef game ideas will soon be available on the NITRO platform, and NOX holders will be able to vote for and support their favourite ones."
