## **Amsterdam Project Update – Construction Begins**

Further to the announcement on 8 March 2018, the directors of Integrated Green Energy Solutions Ltd (“IGES”) are pleased to advise that the initial site work phase on the Amsterdam project has been completed and piling is now underway. The below photo shows the first pile being driven into the ground until it hits bedrock. There will be in excess of 780 piles driven into the site over the next 8 weeks. This key stage creates the foundation for the Amsterdam facility superstructure and is expected to be completed by 15 June 2018.

Construction of the Amsterdam project is due to conclude and road ready fuel is scheduled to be produced by 22 November 2018.

The board of directors look forward to providing you with further updates as construction of the Amsterdam facility progresses.
