WORLEY LIMITED

(ASX:WOR)

Aramco renews General Engineering Services Plus contract

Aramco has awarded Worley a General Engineering Services Plus (GES+) contract for an additional five (5) years with potential for an extension of up to three (3) one-year increments. This renews the long-standing relationship between Aramco and Worley in relation to services provided under the GES+ contracts¹.

Worley's scope includes the provision of project management and engineering services to support Aramco's capital programs in Saudi Arabia across onshore, green and brownfield projects in gas, oil and new energy infrastructure. Worley categorizes this contract as traditional work in accordance with Worley's definition of sustainability-related work².

Under the terms of the contract, Worley will continue to build its in-Kingdom engineering capabilities, with a focus on developing and using local talent to undertake more complex projects in the Kingdom.

"We're pleased to continue our long-term relationship with Aramco to support the delivery of their capital programs through this contract renewal while expanding on our substantial in-Kingdom capability," said Chris Ashton, Chief Executive Officer of Worley.

Authorized for release by Nuala O'Leary, Group Company Secretary.
